CRITERION 7. LEADERSHIP AND INSTITUTIONAL SUPPORT

A. Leadership

1. Describe the leadership of the program and discuss its adequacy to ensure the quality and continuity of the program, and how the leadership is involved in decisions that affect the program. Provide the organizational chart along with the corresponding functional descriptions and relationships.

Leadership and institutional support are critical components of any successful organization or institution. Effective leadership guides and inspires individuals and teams toward achieving common goals and objectives. At the same time, institutional support ensures that the necessary resources and structures are in place to facilitate and sustain those efforts. To ensure the program's quality and continuity, the university provides the following support:

The Polytechnic University of the Philippines administrators take an active role in program-related decision-making, including program design and implementation, resource allocation, and program evaluation. Polytechnic University of the Philippines administrators are adept at understanding the program's goals and objectives, as well as the needs and expectations of the various stakeholders. With the support and guidance provided by the Polytechnic University of the Philippines Management Committee, the teaching and non-teaching personnel are driven to cooperate, collaborate, and perform well.

Institutional Performance and Support

The Polytechnic University of the Philippines (PUP) demonstrates sustained institutional leadership and support for its academic programs through an established Quality Management System, international benchmarking, employer recognition, and external accreditation. These mechanisms provide the governance and quality assurance framework that supports the administration and continuous improvement of the Bachelor of Science in Civil Engineering (BSCE) program.

PUP implements an institution-wide Quality Management System aligned with ISO 9001:2015. The University began its ISO certification initiatives in 2018 and has since undergone continuing surveillance and recertification audits covering major academic and administrative processes. As of 2026, PUP has maintained its ISO-based quality management system for approximately eight years. It has also strengthened its institutional quality assurance framework through certification under ISO 21001:2018 for Educational

Organizations Management Systems, becoming the **first state university in the National Capital Region to obtain two ISO certifications.**

Figure 7.1 PUP ISO Quality Management System Certifications

The University operationalizes these standards through approved Quality Procedures, Work Instructions, process controls, internal quality audits, management reviews, corrective actions, and risk-based planning. These mechanisms promote consistency, accountability, traceability, and continuous improvement in areas such as admissions, curriculum development, faculty assignment, student services, records management, procurement, laboratory operations, research, extension, and internship administration.

For the BSCE program, together with the whole College of Engineering, the institutional Quality Management System supports the implementation of standardized processes for curriculum review, instructional delivery, faculty development, laboratory management, assessment of Student Outcomes, and Continuous Quality Improvement. Findings from internal and external audits are used to identify gaps, implement corrective actions, and improve the effectiveness of academic and support services.

Figure 7.2 College of Engineering Internal Quality Audit Completion

The University has likewise maintained a three-star overall rating under the QS Stars Rating System, with five-star ratings in Employability, Facilities, and Online Learning. It has also received favorable ratings in governance, research, academic development, social impact, and inclusiveness. These results indicate the presence of institutional systems that support the quality of instruction, learning resources, digital education, research, and graduate preparation.

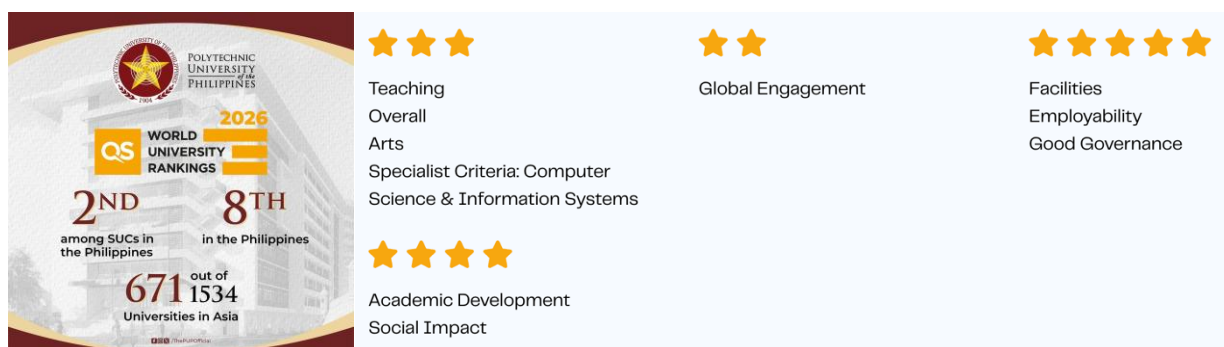

Figure 7.3 PUP's QS World University Rankings Rating

PUP also participates in international university rankings and rating systems as part of its institutional benchmarking activities. The university is recognized to be ranked 801-1000th institution globally for the Times Higher Education Impact Ranking. In the World University Rankings for Innovation, the University has been recognized among the Global Top Innovative Universities, with notable performance in cost-benefit management, sustainability funding, and technology development and application. These areas are relevant to the BSCE program,

particularly in promoting sustainable engineering, applied research, technological innovation, and socially responsive infrastructure solutions.

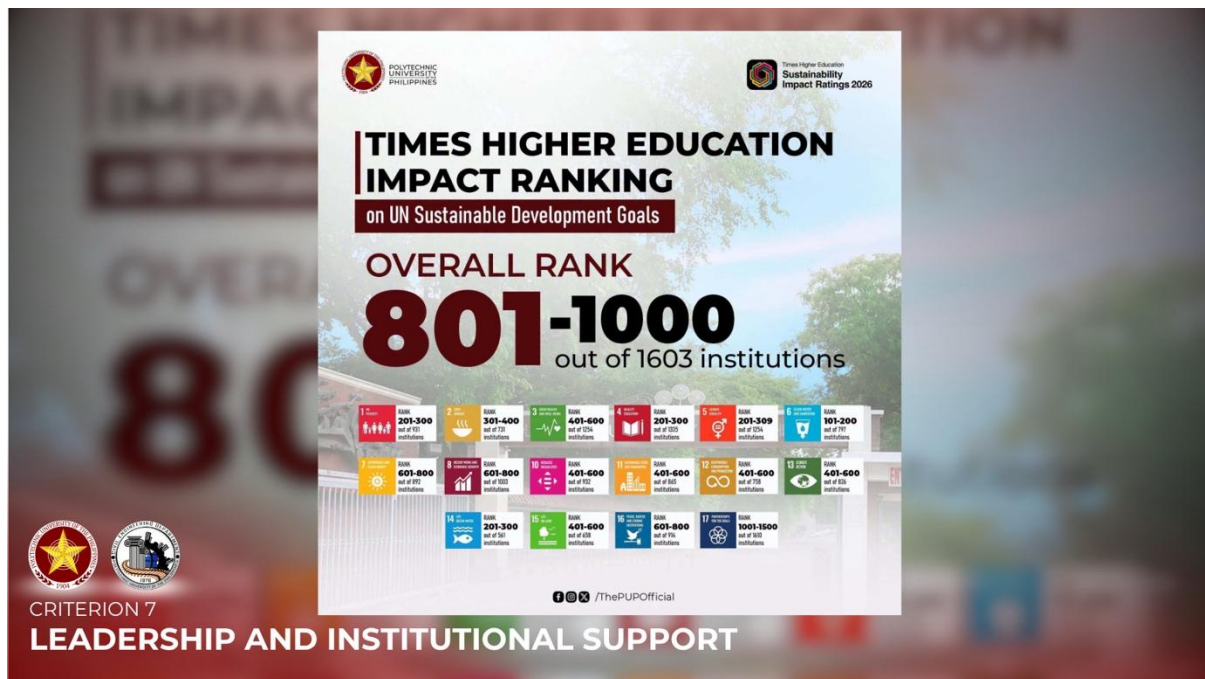

Figure 7.4 The University rated as Rank 801-1000 globally for the THE Impact Ranking.

Figure 7.5 PUP's World University Rankings for Innovation (WURI) Rank

PUP's performance in employability is further supported by its recognition as one of the leading universities preferred by employers in the Philippines, based on JobStreet surveys. This recognition reflects the perceived competence, adaptability, work ethic, and workplace readiness of PUP graduates. For the BSCE program, employer confidence is reinforced

through an outcomes-based curriculum, internship programs, industry consultations, technical seminars, research projects, and professional development activities.

Figure 7.6 JobStreet Employers' Top Choice of School of Employees

External accreditation further demonstrates the effectiveness of the University's quality assurance system. PUP has attained Level III Institutional Accreditation from the Accrediting Agency of Chartered Colleges and Universities in the Philippines (AACCUP) and has maintained a substantial number of accredited and re-accredited academic programs at different levels.

The Polytechnic University of the Philippines demonstrates institutional commitment to quality management through its Level 2 Philippine Quality Award (PQA)—Recognition for Proficiency in Quality Management. This recognition indicates that the University has established and implemented systematic processes in leadership, strategic planning, performance management, student services, resource administration, and quality assurance. It also reflects the University's capacity to monitor institutional performance and use evaluation results to support continuous improvement.

Figure 7.7 President Muhi accepting the PQA Level II Award of PUP

At the program level, the Commission on Higher Education issued Certificate of Program Compliance No. 108, Series of 2021, confirming that PUP–Main Campus complies with the prescribed minimum requirements for offering the Bachelor of Science in Civil Engineering program, effective Academic Year 2020–2021. The certification provides external assurance that the program satisfies the applicable standards for its curriculum, faculty, facilities, laboratories, equipment, and other instructional resources. Its continued validity requires the University to maintain the prescribed program standards.

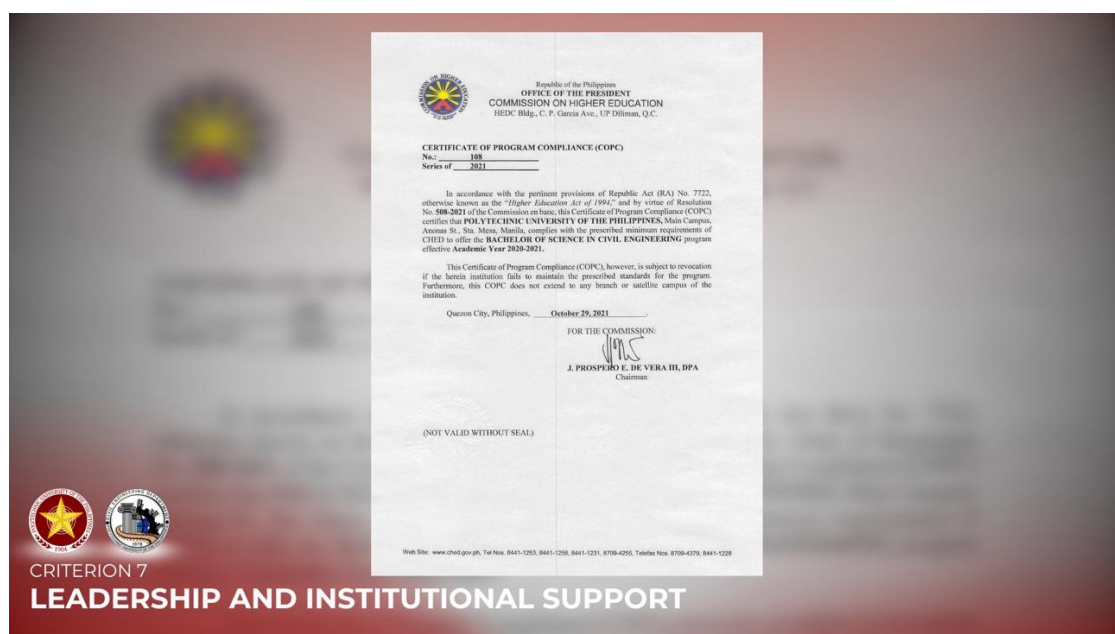

Figure 7.8 Certificate of Program Compliance of the BSCE Program

The program's compliance with professional requirements is further supported by the Certificate of Compliance issued by the Professional Regulation Commission on February 27, 2024. Following the inspection and monitoring conducted by the Professional Regulatory Board of Civil Engineering and the PRC, PUP was found to be compliant with the requirements of Republic Act No. 544. The certificate is valid for three years from its date of issuance.

Figure 7.9 PRC Certificate of Compliance awarded to the BSCE Program of PUP

Within the College of Engineering, six programs have attained Level IV Re-accredited Status: Civil Engineering, Computer Engineering, Electrical Engineering, Electronics Engineering, Industrial Engineering, and Mechanical Engineering. The Bachelor of Science in Railway Engineering has attained Level II Re-accredited Status. Thus, seven degree programs under the College of Engineering have secured AACCUP accreditation or re-accreditation.

The BSCE program has attained Level IV Re-accredited Status, the highest level of program accreditation granted by AACCUP. This recognition reflects the program's sustained performance in governance, curriculum and instruction, faculty development, student services, research, extension, linkages, laboratories, physical facilities, and quality assurance.

Figure 7.10 PUP BSCE Program's Level IV Re-accredited Status Certification

The attainment of Level IV Re-accredited Status is supported by the coordinated efforts of the University administration, Quality Assurance Center, Internal Quality Management System Office, College of Engineering, Department of Civil Engineering, and other academic and administrative units. It demonstrates that institutional policies, resources, and support mechanisms are aligned with the objectives and intended outcomes of the BSCE program.

Overall, PUP's sustained ISO certification, international ranking performance, employability recognition, institutional accreditation, and extensive program accreditation record provide evidence of effective leadership and institutional commitment to quality education. These accomplishments establish a strong institutional foundation for the continuing development and improvement of the BSCE program.

PUP's Well-Developed Planning Process

The University's planning, implementation, monitoring, and assessment scheme is conducted year-round. It follows a top-down and bottom-up management review style. This

ensures that the PDCA (Plan-Do-Check-Act) cycle is practiced and observed. This also encapsulates the principles of continuous quality improvement (CQI).

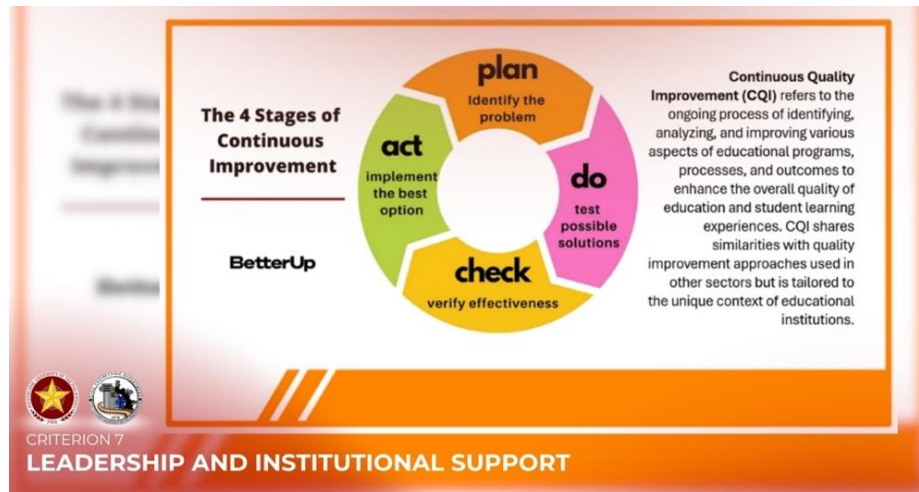

Figure 7.11 PUP CQI Model based on P-D-C-A (Plan – Do – Check and Act)

The College of Engineering and Department of Civil Engineering's Well-Developed Planning Process

The Planning Process of the University is anchored on the VMGO. There is a comprehensive plan crafted for the covered years of the University President. To ensure that each goal will be achieved, each goal (pillar) has a number of Key Results Areas (KRAs), which also have a number of Key Performance Indicators (KPIs). The University's top management is the key player in identifying the KRAs and KPIs. These are then cascaded to the sectors and middle managers who will develop an action plan.

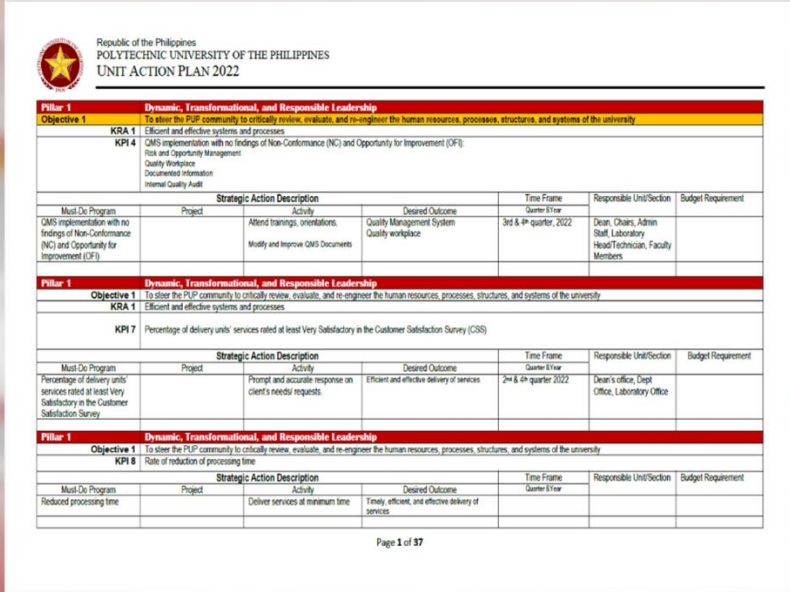

Figure 7.12 PUP Vision, Mission, Strategic Goals, and Core Values

The College of Engineering, headed by its dean, formulates the Unit Action Plan ([Attachment C7-01 – PUP College of Engineering Unit Action Plan](#)). The department chairpersons are involved in the brainstorming and preparation of the Action Plan. It consists of the following:

- Must Do Programs
- Projects
- Activity
- Desired Outcome
- Time Frame
- Responsible Unit/Section
- Budget Requirement

Once the Action Plan is done, the faculty, students, and staff involved will be informed of their roles and responsibilities. These are reflected in the Office Performance Commitment Review (OPCR) by the College and in the Individual Performance Commitment Review (IPCR) of all the members involved ([Attachment C7-02 – Department of Civil Engineering IPCR](#)).

Apart from the University Development Plan ([Attachment C7-03 – PUP University Development Plan](#)), the College Dean and the Department Chair submit the five-year and three-year development plan, respectively. Aspiring unit and section heads are required to submit their development plans which put into perspective their goals for unit/section.

Republic of the Philippines
POLYTECHNIC UNIVERSITY OF THE PHILIPPINES
UNIT ACTION PLAN 2022

Pillar 1: Dynamic, Transformational, and Responsible Leadership						
Objective 1: To steer the PUP community to critically review, evaluate, and re-engineer the human resources, processes, structures, and systems of the university						
KRA 1: Efficient and effective systems and processes						
KPI 4: QMS implementation with no findings of Non-Conformance (NC) and Opportunity for Improvement (OFI)						
Strategic Action Description						
Must-Do Program	Project	Activity	Desired Outcome	Time Frame	Responsible Unit/Section	Budget Requirement
QMS implementation with no findings of Non-Conformance (NC) and Opportunity for Improvement (OFI)		Attend trainings, orientations	Quality Management System	3rd & 4th quarter, 2022	Dean, Chairs, Admin Staff, Laboratory Head/Technician, Faculty Members	
		Monitor and improve QMS Documents	Quality workplace			

Pillar 1: Dynamic, Transformational, and Responsible Leadership						
Objective 1: To steer the PUP community to critically review, evaluate, and re-engineer the human resources, processes, structures, and systems of the university						
KRA 1: Efficient and effective systems and processes						
KPI 7: Percentage of delivery units' services rated at least Very Satisfactory in the Customer Satisfaction Survey (CSS)						
Strategic Action Description						
Must-Do Program	Project	Activity	Desired Outcome	Time Frame	Responsible Unit/Section	Budget Requirement
Percentage of delivery units' services rated at least Very Satisfactory in the Customer Satisfaction Survey		Prompt and accurate response on client's needs/ requests	Efficient and effective delivery of services	2nd & 4th quarter 2022	Dean's office, Dept Office, Laboratory Office	

Pillar 1: Dynamic, Transformational, and Responsible Leadership						
Objective 1: To steer the PUP community to critically review, evaluate, and re-engineer the human resources, processes, structures, and systems of the university						
KPI 8: Rate of reduction of processing time						
Strategic Action Description						
Must-Do Program	Project	Activity	Desired Outcome	Time Frame	Responsible Unit/Section	Budget Requirement
Reduced processing time		Deliver services at minimum time	Timely, efficient, and effective delivery of services	Quarter 1/Year

CRITERION 7
LEADERSHIP AND INSTITUTIONAL SUPPORT

Figure 7.13 College of Engineering 2022 Unit Action Plan

The Implementation Stage (Do)

This stage is strictly guided by the OPCR of the College and the Department ([Attachment C7-04 - PUP College of Engineering OPCR](#)). Two mechanisms are used to ensure that the programs, projects, and commitments are achieved:

- Quarterly Accomplishment Report (now eQAR)
- OPCR submitted semi-annually (January to June and July to December)

The OPCR Commitments and the Support of the University/College or Department

The OPCR is divided into three categories:

Strategic Priority

A. Academic Program Development and Internationalization

1. Outcomes-Based Syllabus Development
2. Instructional Materials Development
3. Internationalization Program/Activity
4. Curriculum Revision
5. Academic Program Development

B. Human Resource Development

1. Attendance in Seminars and Trainings
2. Attendance/Participation in GAD-related programs, projects, activities
3. Enhanced Research, Extension, and Production Capabilities
4. Faculty Profile

C. Institutional-Level Quality Assurance

1. Compliance with ISO Standard Quality Management System
2. Compliance with the Non-Conformities Issued by the IQA

The University supports the achievement of the Strategic Priorities through the following:

- A series of training are conducted through the Quality Assurance Center (QAC) and the University Teaching and Learning Development Office (UTLDO) for syllabi development ([Attachment C7-05 – Outcomes-based Syllabus Training](#)).

Figure 7.14 Trainings offered by the University Teaching and Learning Development Office

- Remuneration of Part-time faculty members in the Instructional Materials development ([Attachment C7-06 – EO No. 22, S. 2020](#)).
- Establishment of the University Curriculum Evaluation Committee (UCEC) that ensures the offering of the same programs/curriculum in all PUP campuses ([Attachment C7-07 – PUP UCEC Relevant Meetings](#)).
- Benchmarking to other SUCs and HEIs through the Lakbay-Aral Program (2018-2020) ([Attachment C7-08 – BSCE Benchmarking Activities](#)).

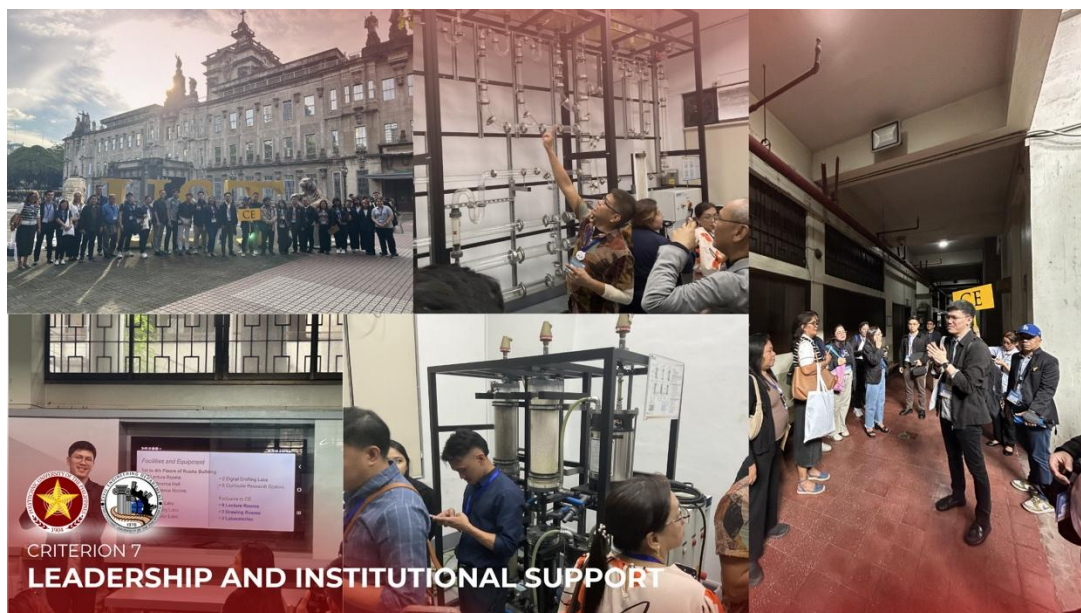

Figure 7.15 Benchmarking Activities of the PUP Department of Civil Engineering

- The Faculty and Staff Development (FSD) fund allocates Php 20,000.00 per full-time faculty and administrative employee to ensure participation in training/conferences ([Attachment C7-09 – Guidelines for FSD Budget Utilization Request](#)).
- Various incentives for the presentation, publication, and production of research.

Core Functions

A. Outputs/Outcomes in Higher Education Programs

1. Employability of Graduates
2. Accreditation
3. COPC Application
4. Faculty Evaluation

B. Outputs/Outcomes in Research Programs

1. Research Studies Completion
2. Research Publication
3. Research Presentation
4. Research and Development Output

C. Outputs/Outcomes in Extension and Technical Advisory Program

1. Active Linkages
2. Applied Extension Projects
3. Persons trained/provided with technical advice

D. Written Queries/Requests Acted Upon

E. Satisfied and Empowered Clients

The University supports the achievement of the Core Functions through the following:

- Graduate Tracer Study conducted by the Institute for Data and Statistical Analysis (IDSA) ([Attachment C7-10 – Civil Engineering Graduate Tracer Studies](#)).
- Training and assistance from application to preparation and monitoring the accreditation cycle by the Quality Assurance Center ([Attachment C7-11 - QAC Enrolled Processes in the ISO](#)).
- Funding assistance for the application and preparation during survey visits ([Attachment C7-12 – Funding Assistance for College of Engineering Accreditation](#)).
- Annual University recognition for the Outstanding Faculty ([Attachment C7-13 – PUP Professional Enhancement and Skills Development Incentive](#))
- Research Incentives ([Attachment C7-14 – University Research Incentives](#))

- Assistance of the International Relations Office (IRO) and Extension Management Office (EMO) on linkages, including the annual incentive through the Best Internationalization Award.

Figure 7.16 International Relations Office Search for Best Internationalization Program

- Creation of the PUP SINTA, Document Tracking System (DTS), and Central Records Office Digitization to facilitate fast and efficient responses to document requests and queries.

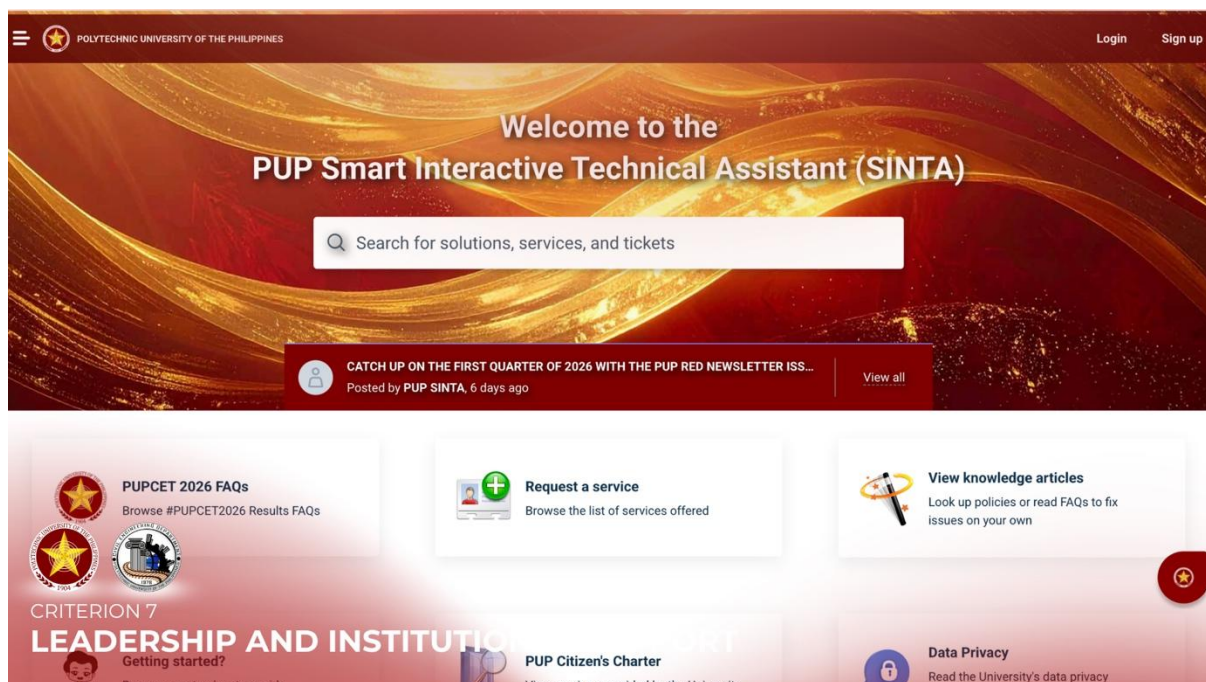

Figure 7.17 The PUP Smart Interactive Technical Assistant (SINTA) Dashboard

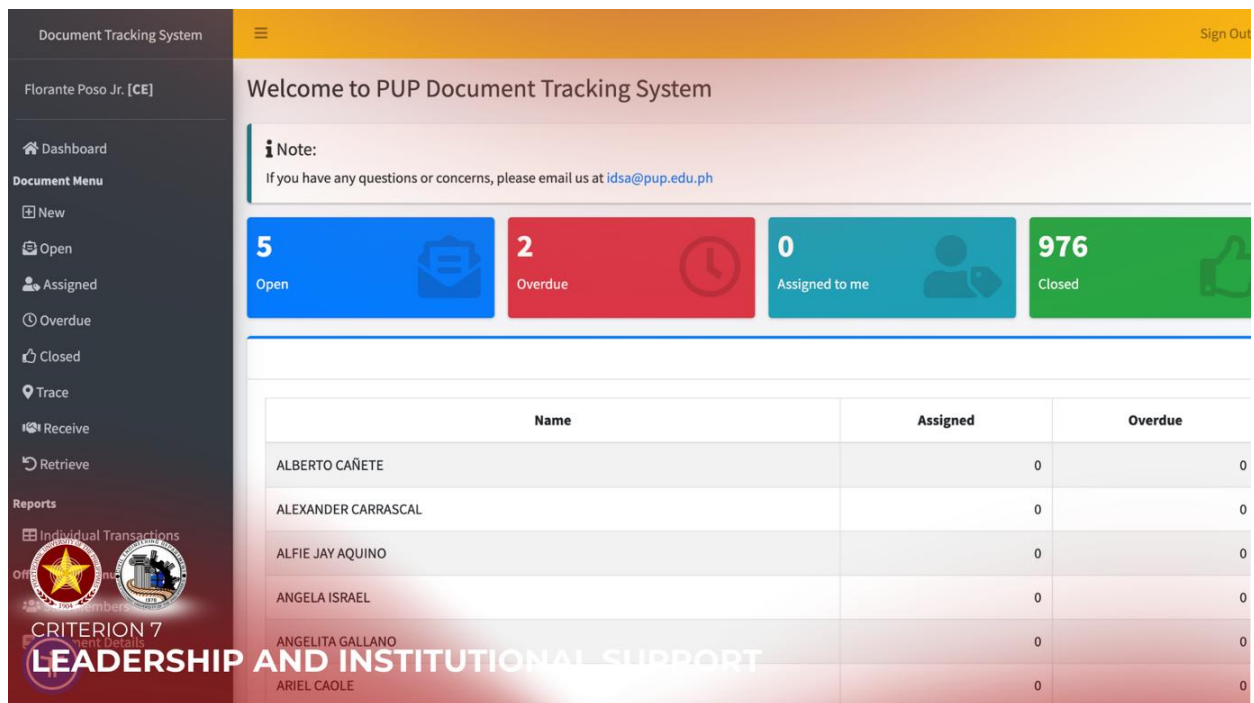

Figure 7.18 Document Tracking System (DTS) Dashboard

Support Function

- A. Medical Clearance
- B. Attendance to University and College Functions
- C. Submission of Mandatory Periodic Reports
 - 1. Course Offerings
 - 2. Teaching Assignments
- D. Disbursement Budget Utilization Rate

The University supports the achievement of the Support Functions through the following:

- Annual Medical Clearance for faculty and employees.
- Budget Services Office's programs on Budget Planning and Execution and creation of systems such as the BSO Dashboard to trace utilization real time.

Figure 7.20 Individual Performance Commitment and Review (IPCR)

A.1. Organizational Structure

The Polytechnic University of the Philippines Academic Division Organizational Chart depicts the lines of authority for positions across all academic departments of the University, as well as the program's organizational structure. Job descriptions, interrelationships, and responsibilities for each position in the organizational chart are clearly defined in terms of their

roles in the university's operations. The organizational chart clearly delineates duties and responsibilities. It promotes open communication within the academic community ([Attachment C7-15 - PUP Organizational Structure](#)).

Figure 7.21 Polytechnic University of the Philippines Academic Affairs Sector Organizational Chart

A.2. Involvement of Leaders

University President

As shown in Figure 7.21, the University President is the Chief Executive of the university. Dr. Manuel M. Muhi is the Thirteenth (13th) President of the Polytechnic University of the

Philippines. Dr. Muhi shares his expertise in the teaching profession and experience in running academic institutions by serving in various accrediting bodies. Currently, he is an IT Regional Quality Assessment Team (RQAT) member, a Degree Program Evaluator in PCS Information and Computing Accreditation Board (PICAB), and an Institutional Sustainability Assessment (ISA) Assessor in the Commission on Higher Education (CHED). He is also one of the accreditors in the Association of Local Colleges and Universities Commission on Accreditation (ALCUCA) and the Philippine Association of Colleges and Universities Commission on Accreditation (PACUCA) ([Attachment C7-16 – Curriculum Vitae of the University President](#)).

***Manuel M. Muhi, D. Tech., ASEAN Engr.
University President***

The University President initiated the creation of the Program Government Industry Advisory Board (GIAB) to review the Program Educational Objectives (PEOs), Student Outcomes (SOs), and the existing curriculum of each program offering ([Attachment C7-17 - Civil Engineering Government Industry Advisory Board](#)). He is responsible for the administration of all the operations of the University. He specifically performs the following functions:

1. serves as the Chief Executive Officer of the University. As such, progressive and dynamic and intellectual and administrative leadership in the University is expected of and vested in the position;
2. serves as the head of the faculties of the different academic units and any branch thereof who shall exercise the authority to suspend or postpone classes as deemed necessary and approved by the University calendar and class size;

3. general supervision over all academic units as well as student support services, business, and financial operations of the University;
4. promulgate and enforce general policies affecting any unit of the University and take such actions which, in the best of judgment, are necessary for the protection of property and general interest of the University, students, and personnel and the operation of the University as a whole and shall inform the Board of Regents on all matters relating to the operation and welfare of the University;
5. appoint qualified persons to fill all vacancies and new positions subject to the approval of the Board of Regents and make such other arrangements to meet emergencies occurring between meetings of the Board of Regents so that the work of the University shall not suffer;
6. institute disciplinary action against any member of the University personnel, faculty, or non-faculty as well as any student of the University, whose actions adversely affect the general interest of the University;
7. decide upon appeals in controversies between ranking officials of the University, the decisions being final and conclusive;
8. grant or deny sabbatical leaves and leaves of absence without pay and/or extension of such leaves, as well as the extension of fellowships or any form of scholarship for a period not exceeding one academic year if the budget permits and for reasons that may be deemed satisfactory;
9. make ad-interim appointments;
10. grant or withhold permission to reveal confidential matters affecting the University or any unit thereof, as well as any action taken by the Board of Regents;
11. grant permission for the use of buildings and premises of the University for academic, professional, and scientific conventions, for student-related activities, and to fix fees thereof;
12. ensure that all matters pertaining to the sale or disposal of University properties shall be done in accordance with the law;
13. authorized to execute all contracts, deeds, and instruments for the proper conduct of the business of the University and to assign the same on behalf of the University;
14. prepare an annual report on the work of the past year and the needs of the current year including a budget with estimates of income and expenditures; and
15. possess such other powers as may be specifically authorized by the Board of Regents. The delegation of any specific function of the President to any office shall be made in writing (Source: P.D. No. 1341).

Executive Vice President

The Office of the Executive Vice President (O EVP) assists the University President in the administration of all University operations by ensuring the delivery of quality services to its stakeholders. The O EVP leads the four divisions in the University, namely the Office of the Vice President for Planning and Finance (OVPPF), Office of the Vice President for Academic Affairs (OVPA A), Office of the Vice President for Campuses (OVPC), Office of the Vice President for Administration (OVPA), Office of the Vice President for Research, Extension and Development (OVPRED), and Office of the Vice President for Student Affairs and Services (OVPSAS) ([Attachment C7-18 – Curriculum Vitae of the Executive Vice President](#)).

***Alberto C. Guillo, MS (Stat) MA (Econ)
Executive Vice President***

Specifically, the Executive Vice President shall perform the following functions:

1. act as the Chief Executive in the absence of the University President;
2. coordinate with the other Vice Presidents' Offices in the formulation, review, and implementation of academic, student support, finance, and administrative policies, plans, programs, services, and activities;
3. manage, supervise, and maintain harmonious coordination of all the units and offices under the O EVP;
4. attend to internal and external invitations, and other local, national, and international concerns of the Office, as well as those which may be delegated by the President;

5. review and recommend to the President requests from internal and external stakeholders; and
6. perform other functions as may be assigned from time to time by the President.

Vice President for Academic Affairs

The Office of the Vice President for Academic Affairs (OVPA) has general supervision of all undergraduate and graduate programs offered by the different academic units of the University. It manages the development, implementation, and review of the academic programs and services of the University to operationalize its goal of bringing about quality education and excellence. The Vice President for Academic Affairs (VPAA) works in close coordination with the deans and department chairs in supervising the delivery of academic instruction for tertiary-level and graduate studies in the University. The VPAA also oversees the management of the Laboratory High School and Senior High School (SHS) Departments, the Institute of Technology (for Diploma/ TVET programs), and Continuing Professional Education Department (CPED). He/ She heads the University Academic Council (UAC) and exercises functional supervision over academic staff. The functional areas include faculty development, curriculum development, and academic assurance ([Attachment C7-19 – Curriculum Vitae of the Vice President for Academic Affairs](#)).

Emanuel C. De Guzman, Ph.D
Vice President for Academic Affairs

The VPAA has the following specific functions and duties:

1. manage and supervise all the academic units and programs under the following disciplinal areas offered by the colleges and institutes: accounting and finance; architecture, design, and the built environment; arts and letters; business administration; communication; computer and information sciences; education; engineering; human kinetics; laws; political science and public administration; social sciences and development; sciences; tourism, hospitality, and transportation management; and technology;
2. recommend academic policies pertaining to curricular offerings; faculty appointments and teaching assignments; academic calendar, class size, and entrance and graduation requirements for local and foreign students;
3. ensure coordination and harmonious functioning of all offices/units under the OVPAA as well as with other units of the University concerning academic-related matters such as the setting of the details of the school calendar, allotment of classrooms, and admission/registration procedures;
4. attend to internal and external invitations, and other local, national, and international concerns of the Office, as well as those which may be delegated by the President;
5. recommend qualified faculty members and evaluate their performance;
6. recommend disciplinary action against faculty members whose actions adversely affect the academic interest of the University;
7. review and recommend to the President requests from internal and external stakeholders; and
8. perform other functions as may be assigned by the President.

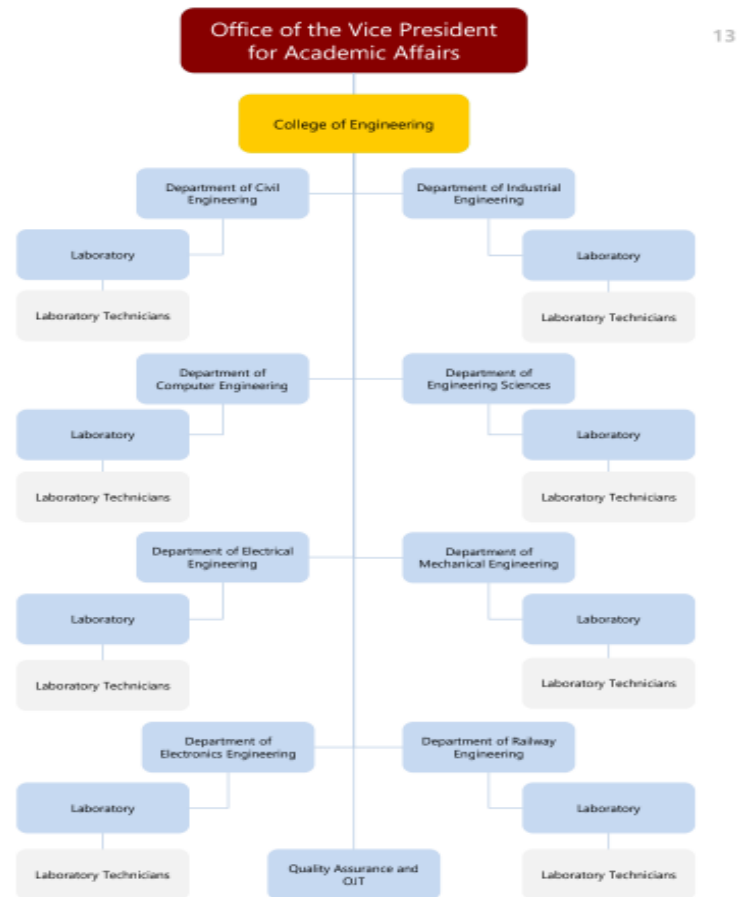

Figure 7.22 PUP Organizational Chart for the College of Engineering

College Dean

The Dean of the College of Engineering is appointed by the University President and is the chief academic officer in charge of all matters related to the programs, services, and personnel of the college. He/ She has the following specific functions and duties:

1. exercise educational leadership, supervision, control, and management over the entire faculty of the College;
2. assess, evaluate, and recommend academic policies, and shall likewise assume full responsibility for the effective implementation thereof among and within the faculty of the College;
3. recommend qualified persons for chairmanship in various curricular fields and other faculty positions in their area of responsibility;
4. recommend faculty members for promotion, transfer, or removal;

5. decide on academic loading assignment/s of the faculty members and/or special lecturers;
6. exercise general supervision and control over the curriculum in the College;
7. plan, conduct, and implement faculty development programs;
8. devise, promote, improve, invigorate, refine, and intensify professional activities of the faculty, especially in the fields of research and publication;
9. participate in professional advancement activities and represent their faculty in appropriate organizations;
10. conduct, evaluate, broaden, and stimulate curricular research to improve teaching/learning processes and ways of instruction of the faculty;
11. advise the students on the importance, goals, and status of their academic programs;
12. recommend disciplinary action against faculty members and/or students whose actions adversely affect the academic interest of the University's academic units/offices;
13. revalidate and measure the extent of students' knowledge in learning the basic academic requirements in their chosen program before recommending them for graduation, or as often as possible when the need to revalidate may warrant at their sole option and discretion;
14. create a committee to evaluate the responsiveness, relevance, and effectiveness of the academic programs, and recommend revisions to the Vice President for Academic Affairs and the President as the need may arise;
15. enforce student admission, disqualification, and graduation requirements;
16. ensure the conduct of regular consultations of the faculty with the students; and
17. perform other duties and responsibilities that the Vice President for Academic Affairs and/or the President may assign from time to time.

Remedios G. Ado, DEM, PCpE

College Dean

Dr. Remedios G. Ado was appointed as Dean of the College of Engineering in June 2018. Prior to her appointment as dean, she served the university as Director of the Institute of Non-Traditional Study Program and Expanded Tertiary Education Equivalency and Accreditation in the PUP Open University System. She also served as Assistant Director of the university's Information and Communications Technology Office (ICTO), program chairperson of the Master of Science in Engineering (MSE) and Master of Science in Information Technology (MSIT) in the PUP Graduate School, and as program chairperson of the Computer Engineering Department in the College of Engineering. She is a graduate of Bachelor in Computer Engineering, and holder of Master of Engineering – Computer (M.Eng.), and Doctor in Educational Management (DEM). Dr. Ado is a Professional Computer Engineer (PCpE), a prolific researcher with numerous publications and citations, and a seasoned accreditor, having participated in numerous program evaluation and accreditation under the Accrediting Agency of Chartered Colleges and Universities in the Philippines (AACCUP) ([Attachment C7-20 – Curriculum Vitae of the College Dean](#)).

Department Chairperson

The Department Chair (DC), as shown in Figure 7.22, serves as the designated frontline supervisor. He/She directly manages the operations of the program. He/ She reports directly to the College Dean for further instructions; exercises supervisory control and authority over faculty and staff in the department. The DC has the following specific functions and duties:

1. provide leadership and supervision in the department;
2. assist the Dean and/or the Associate Dean in academic or faculty matters;
3. assist and supervise the preparation, amendment, or revision of courses of study or course syllabi to make them responsive to the current needs of the time;
4. assist and advise the Dean/Associate Dean in the evaluation and finalization of teaching loads of the faculty of the college/department;
5. orient new students and faculty members;
6. assist and participate in promoting professional activities, programs, and development of faculty members in the department;
7. upon proper and prior notice, assist the Dean/Associate Dean during faculty meetings by providing the needed materials and things relevant to the agenda of the meeting;

8. suggest, advise, and appraise faculty members in the selection of textbooks, references, and other instructional materials;
9. make oneself available at all times when the Dean conducts and performs supervisory functions to faculty members and students;
10. actively participate in every activity about the proficiency advancement of their discipline;
11. stimulate, encourage, inspire, and implement various programs for faculty members' advancement and upgrading of their educational teaching skills;
12. assist, advise, and update the Dean on the preparation of plans and budget as well as the annual report of the department;
13. assist the Dean in the implementation of consultation programs between faculty and students; and
14. perform other duties and responsibilities as may be assigned to them by the Dean and other higher officials of the University.

***Kenneth Bryan M. Tana, MSCM, RCE
Department Chairperson***

Engr. Kenneth Bryan M. Tana has been leading the Department since 2018, having been appointed as Program Chair of the Civil Engineering Department. Prior to his appointment as Chairperson, he served as Laboratory Head and Chief in various offices under the Office of the Vice President for Administration. He is a seasoned lecturer and researcher, with several published and cited works. Engr. Tana is a registered civil engineer and an active member of the professional organization (PICE). He is also an expert accreditor of the Accrediting Agency of Chartered Colleges and Universities in the Philippines (AACUP).

Under his leadership, the Civil Engineering Department continuously improved its level of quality, having been granted Level IV accreditation status by AACUP. The Civil Engineering Department also achieved its program compliance and consistently produced topnotchers in the licensure examinations ([Attachment C7-21 – Curriculum Vitae of the Department Chairperson](#)).

The leadership of the administrators evidently shows its commitment to advancing the attainment of excellence in the program. Various committees are established to promote the democratic administration of the university. These committees may be responsible for developing strategies and directives, carrying out plans and initiatives, or reviewing and assessing activities and decisions. The University decentralizes its management of the institution by involving the faculty members in the numerous facets of doing the University's business, regardless of the objectives for which the committees were formed. A faculty member can be assigned to work on university standing committees. Officials from the university can also establish a number of task forces and committees for working and formulating policies.

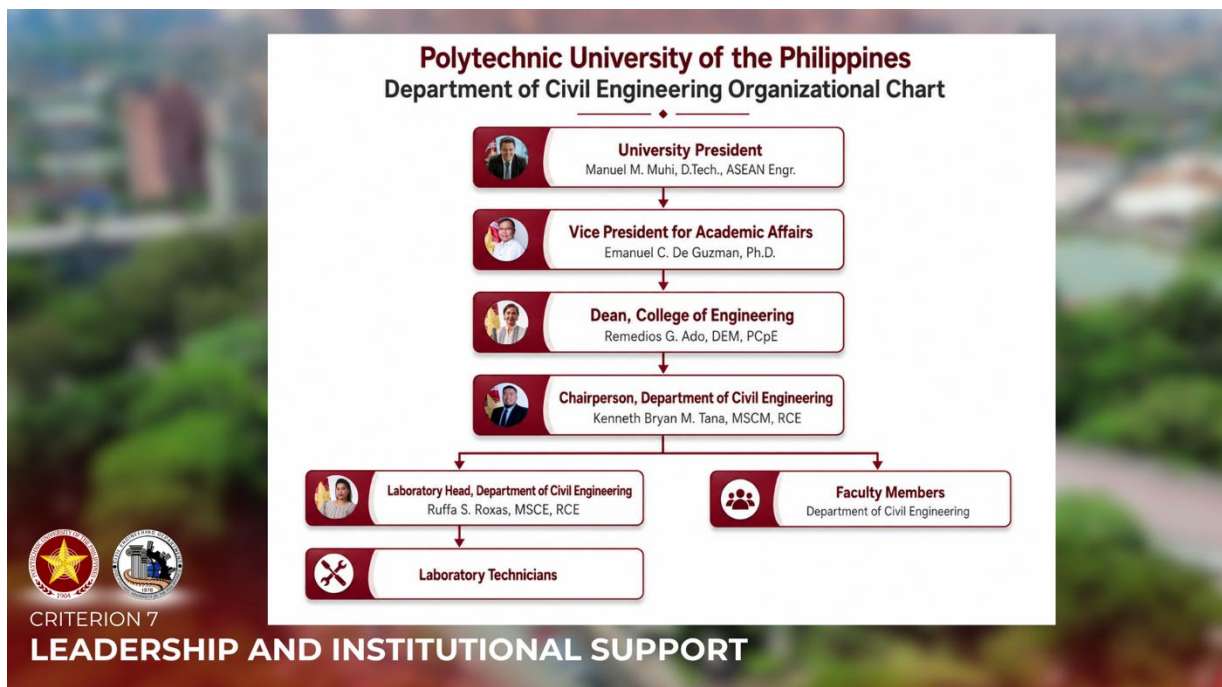

Figure 7.23 PUP Organizational Chart for the Department of Civil Engineering

With the presence of various committees supporting the attainment of excellence in the program, it is evident that there is an adequate number of personnel to run the program, achieve its goals, and to ensure the quality and continuity of the program.

2. *Describe the process of environmental scanning and internal assessment in the review and improvement of the current program and possible development / creation of new programs.*

A.3. Process of Environmental Scanning and Internal Assessment

Polytechnic University of the Philippines is conducting an environmental scanning to gather information about external factors that may have an impact on the program. Changes in technology, industry trends, economic conditions, demographic shifts, and emerging fields are among these factors. The university conducts environmental scanning using a variety of methods, including research, surveying students, and monitoring trends in the field.

The Department of Civil Engineering conducts regular environmental scanning to identify current trends, emerging technologies, regulatory developments, and industry needs in the civil engineering and construction sectors. This process is undertaken in consultation with the Government–Industry Advisory Board, whose members provide relevant perspectives from government agencies, professional organizations, and industry partners. The information gathered is used as an input to curriculum review, faculty development, research planning, industry engagement, and Continuous Quality Improvement initiatives to ensure that the BSCE program remains responsive to contemporary professional practice and stakeholder expectations.

Figure 7.24 PUP College of Engineering Government Industry Advisory Board Meeting

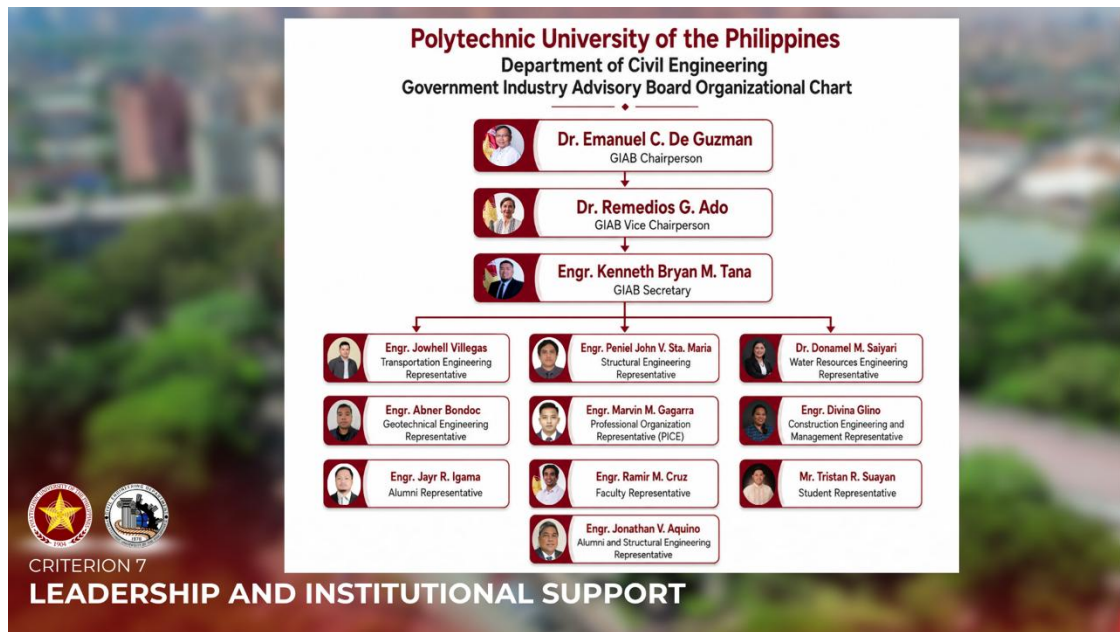

Figure 7.25 PUP Civil Engineering Government Industry Advisory Board

The university performs periodic assessment of its operations. Mid-year and year-end assessment and action planning are conducted to evaluate program's strengths, weaknesses, opportunities, and threats (SWOT) to identify areas for improvement. Units under the Academic Affairs sector review the curricula, program educational objectives, student outcomes, course intended learning outcomes, faculty performance, program resources, and student performance to assess the program's effectiveness. The Polytechnic University of the Philippines implements an auditing system by conducting an internal quality audit facilitated by the Institutional Quality Management System Office (IQMSO) with the assistance of the internal quality auditors of the university. The IQMSO is responsible for all the issuance of findings and observations raised by the internal auditors.

(See [Attachment C7-22 - IQMSO Mid-year and Year-end Assessments](#))

For existing programs, environmental scanning and internal assessment assist the administrators of the university in identifying program gaps, areas for improvement, and potential program modifications to meet changing student and industry needs. Environmental scanning and internal assessment aid the Academic Affairs division in identifying emerging fields, potential demand from students and employers, and areas where the institution has strengths to leverage in developing new programs. The information gathered during the environmental scan and internal assessment is then used to identify areas for potential new program development as well as potential changes or modifications to the current program.

By conducting these processes, the university can gather important data and insights for the future direction of the academic programs.

B. Program Budget and Financial Support

- 1. Describe the process used to establish the program's budget and provide evidence of continuity of institutional support for the program. Include the sources of financial support including both permanent (recurring) and temporary (one-time) funds.*

B.1 Process of Establishing Program Budget

The University adopts a systematic and participatory budgeting process ([Attachment C7-23 – Budget Process for Commonly and Non-commonly Requested Items](#)) to ensure that financial resources are aligned with institutional priorities, academic requirements, and the operational needs of its degree programs. For the Bachelor of Science in Civil Engineering program, budget preparation is undertaken within the University's established planning, budgeting, procurement, and approval mechanisms ([Attachment C7-24 - Executive Order on Strategic Procurement Planning and Budgeting](#)). The process involves the College of Engineering, concerned administrative offices, the Office of the Vice President for Planning and Finance, the Executive Committee, and the Board of Regents. Through this framework, proposed expenditures for instruction, laboratory operations, faculty development, research, student services, equipment, facilities, and other program requirements are identified, justified, evaluated, and approved based on available government appropriations and projected institutional income. The following steps are implemented to establish the program budget:

- a. Issuance of the Budget Call. Budget Call should contain the general objectives, policy decisions, strategies and prioritized programs/ activities/ projects (PAPs) by offices/colleges as reflected in the approved Annual Procurement Plan (APP).
- b. Conduct a Budget Forum ([Attachment C7-25 – Budget Deliberation Forum for 2027](#)). A forum on the budget call for all Offices/Colleges in which the following should be necessarily explained:
 - i. Objectives for the budget year, major thrusts and policy directions.
 - ii. Sources of income for the past years.
 - iii. Major assumptions used in estimating the income for the budget year; and
 - iv. Spending ceilings and budget strategies.
- c. The Office of the Vice President for Planning and Finance calls for submission of upcoming Fiscal Year Budget Proposal every **August** of the current academic year. The office director/ college dean shall be responsible for providing the proposed budget for

- his/her office/ college and for the timely submission of such proposal to the Budget Services Office.
- d. The office director/ college dean shall completely fill out the budget and form/template and will present, deliberate on, and justify the budget with the respective Vice President/s and the Budget Officer present
 - e. The Executive Committee (EXECOM) will deliberate the budget proposal per sector/office/college, such that the total budget must be equal to the total amount of budget allocation (GAA) and projected income.
 - f. The Budget Services Office consolidates the EXECOM pre-approved budget, and the Procurement Management Office prepares the Procurement Plan.
 - g. The Proposed Consolidated Budget shall be presented by the President – through the Vice President for Planning and Finance to the Board of Regents during a Board Finance Committee for endorsement and Board of Regents en banc for approval.
 - h. The Budget Services Office distributes the approved budget to each office/ college head to adjust their budgets if necessary.

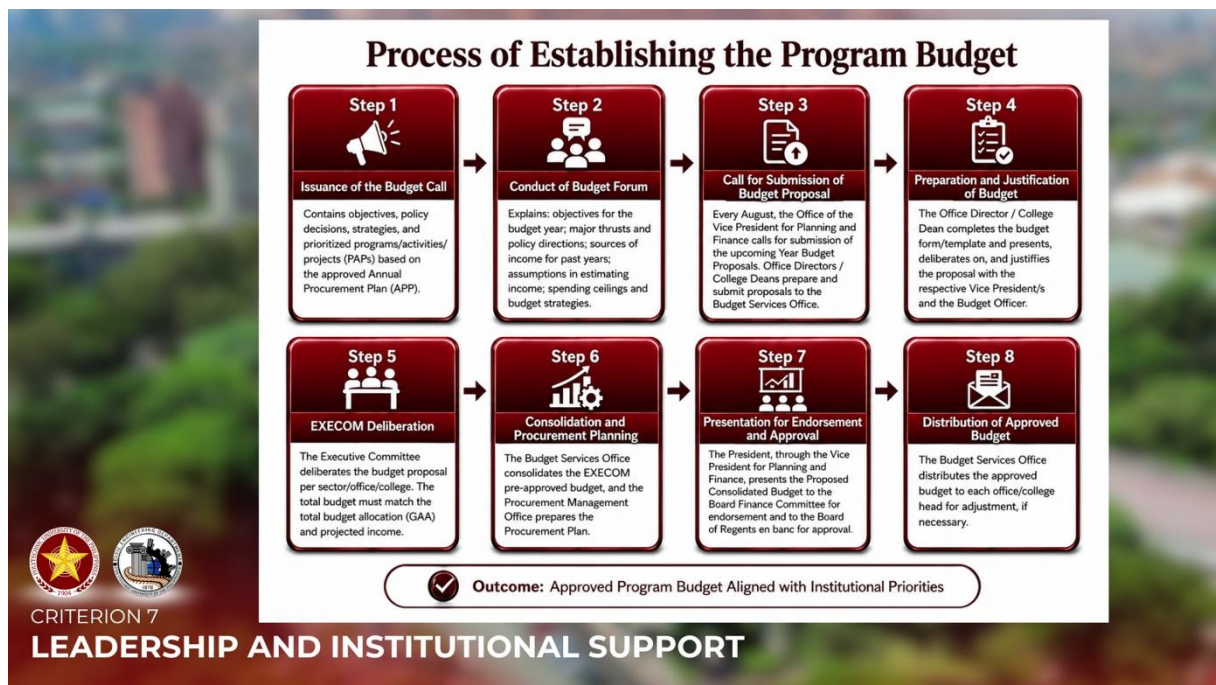

Figure 7.26 Process of Establishing Program Budget

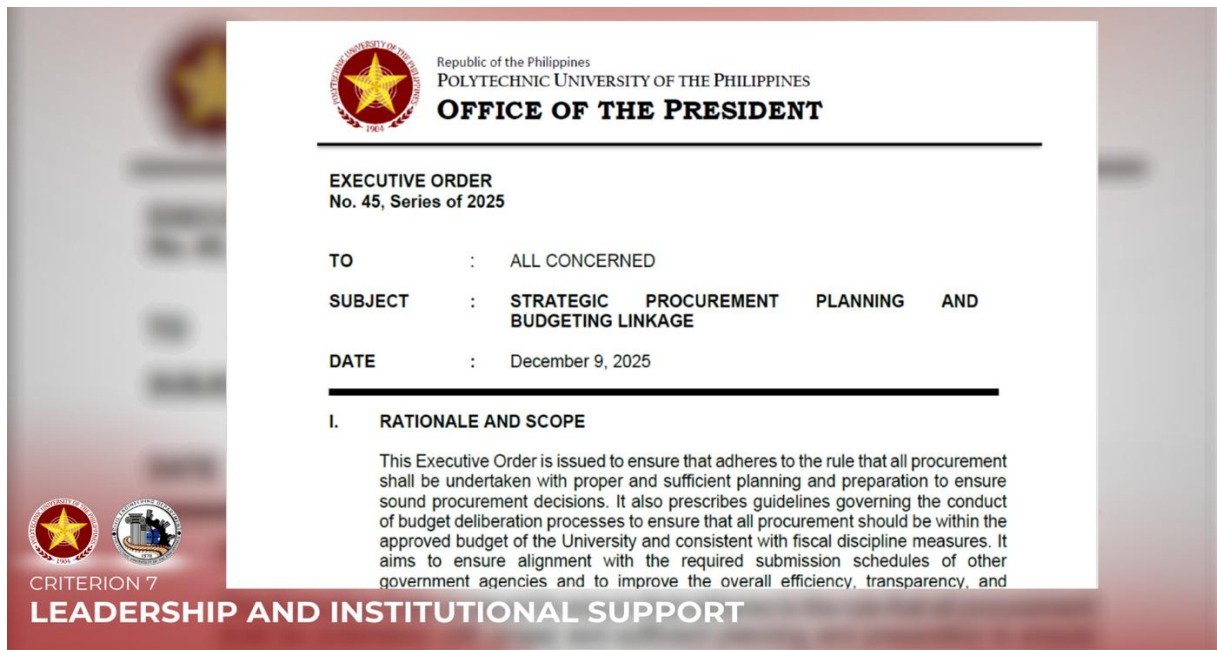

Figure 7.27 Executive Order on Strategic Procurement Planning and Budgeting

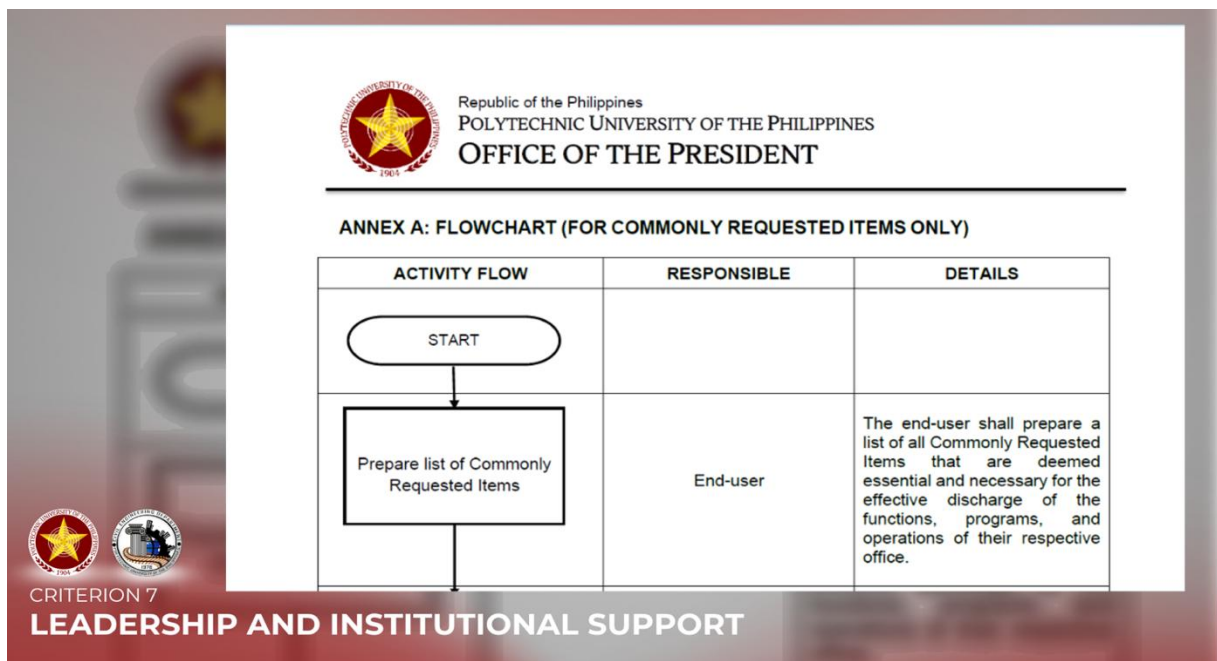

Figure 7.28 Flowchart for Commonly Requested Items

B.2 Institutional Teaching Support

The governance structure of the Polytechnic University of the Philippines provides institutional teaching support through coordinated policies, academic leadership, resource allocation, quality assurance, and student support services. The Board of Regents, Office of the President, Office of the Vice President for Academic Affairs, College of Engineering, and Department of Civil Engineering establish the policies, standards, and administrative mechanisms that guide the delivery and continuous improvement of the Bachelor of Science in Civil Engineering program.

Support for faculty members is provided through institutional systems for faculty recruitment, workload assignment, professional development, performance evaluation, research engagement, and access to instructional resources. The University conducts seminars, training programs, curriculum workshops, outcomes-based education activities, and capability-building initiatives to strengthen faculty competence in teaching, assessment, research, extension, and the use of educational technologies. All of these support could be found through the university's Faculty Manual ([Attachment C7-26 – PUP University Faculty Manual](#)).

Figure 7.31 The 2024 Revised Edition of the PUP Faculty Manual

Faculty members are also supported through access to library databases, laboratory facilities, information and communication technology services, institutional research mechanisms, and administrative assistance in the preparation and implementation of Outcomes-Based Teaching and Learning Plans.

Figure 7.32 PUP Department of Civil Engineering OBTLP Training Workshop

The University also provides mechanisms for the regular review of curricula, course syllabi, assessment practices, and instructional delivery. These processes are coordinated through academic councils, curriculum committees, quality assurance units, and departmental structures. Feedback from students, faculty members, alumni, employers, professional organizations, and the Government–Industry Advisory Board is considered in identifying areas for improvement. The results of course evaluations, Student Outcome assessments, accreditation activities, internal audits, and stakeholder consultations are used as inputs to Continuous Quality Improvement.

For students, institutional teaching support is provided through academic advising, mentoring, library and learning resources, laboratory access, student information systems, counseling, health services, scholarships, career development programs, internship coordination, and other academic support services. The University also maintains digital platforms that support enrollment, access to course materials, communication with faculty members, submission of academic requirements, and delivery of synchronous and asynchronous learning activities.

Figure 7.33 Polytechnic University of the Philippines Support to Students

Within the BSCE program, these institutional mechanisms support the effective delivery of lectures, laboratory courses, field activities, design projects, research, internship, and integration courses. The College of Engineering and the Department of Civil Engineering coordinate faculty assignments, laboratory schedules, equipment utilization, academic monitoring, consultation arrangements, and student interventions to ensure that instructional requirements are adequately addressed.

Figure 7.34 Previous Advisories of the Civil Engineering Department for Academic Advising

The governance system also promotes accountability through documented procedures, internal quality audits, performance monitoring, management reviews, and compliance with institutional and external quality assurance standards. Identified concerns related to teaching, facilities, student performance, and learning resources are communicated to the appropriate offices for corrective or improvement action.

Overall, the University's governance structure provides a systematic framework for supporting both faculty members and students. Through academic leadership, quality assurance, resource provision, faculty development, student services, and continuous improvement mechanisms, PUP ensures that the BSCE program is provided with the institutional support necessary to achieve its educational objectives and intended Student Outcomes.

3. *To the extent not described above, describe how resources are provided to acquire, maintain and upgrade the infrastructures, facilities and equipment used in the program.*

B.3 Resources for Infrastructure, Facilities, and Equipment

The acquisition, maintenance, and upgrade of infrastructures, facilities, and equipment are critical for the success of academic programs. The Polytechnic University of the Philippines provides resources to support these needs by allocating funds for capital expenditures that support the acquisition, maintenance, and upgrade of infrastructures, facilities, and equipment ([Attachment C7-27 – Budget Allocation for College of Engineering](#)). These budgets typically cover long-term investments, such as construction projects or major renovations, and may be funded through a variety of sources, such as institutional reserves, grants, or government subsidies. The university also maintains operating funds for ongoing maintenance and upgrade of facilities and equipment.

4. *Assess the adequacy of the resources described in this section with respect to the students in the program being able to attain the student outcomes. Describe how the results of the monitoring, assessment and evaluation of attainment of student outcomes affect program planning and management.*

B.4 Adequacy

The Polytechnic University of the Philippines' Civil Engineering program has adequate resources to attain the student outcomes. The Department continuously ensures that the instructional, physical, human, and technological resources are sufficient, relevant, and responsive to the dynamic demands of engineering education. These resources, ranging from qualified faculty members and modernized laboratories to updated instructional materials and accessible digital platforms, collectively support the holistic development of students and facilitate the effective delivery of the outcomes-based curriculum.

(See [Attachment C7-28 - Portfolio of Civil Engineering Faculty](#))

(See [Attachment C7-29 - Laboratory Resources Adequacy](#))

Well-equipped engineering laboratories, such as the Construction Materials Testing Laboratory, Hydraulics Laboratory, Soil Mechanics Laboratory, and the recently improved Computer Laboratories provide hands-on learning experiences that enhance students' technical proficiency. These facilities are complemented by simulation software and computing tools, which are essential for developing problem-solving and design skills aligned with the program's student outcomes.

Figure 7.35 Photo Documentation of Civil Engineering Facilities

Faculty qualifications and development are likewise prioritized. Faculty members are active participants in industry-relevant seminars, research conferences, and training programs. This continuous professional development ensures that instruction remains aligned with the latest trends and standards in civil engineering practice and pedagogy, thereby fostering student competence in both theoretical and applied domains.

The Civil Engineering Department employs systematic monitoring, assessment, and evaluation mechanism for student outcomes through the use of course outcome assessments, capstone/thesis project rubrics, OJT performance evaluations, exit surveys, and tracer studies. Data gathered from these instruments are analyzed during curriculum review sessions and program assessment meetings. Results are then used to inform decision-making in program planning and management. For instance, gaps identified in specific outcomes, such as communication or sustainability awareness, have led to the integration of targeted learning activities and the enhancement of general education and professional courses.

Moreover, the Civil Engineering Department aligns its strategic planning with the University's institutional goals and national development frameworks, such as CHED's OBE guidelines, the PTC accreditation framework, and the demands of the Philippine Qualifications Framework (PQF). This alignment ensures that the enhancement of program resources and academic policies is evidence-based and outcome-oriented. The Department's commitment to adequate resource provision, coupled with a data-driven approach to evaluating student outcomes, ensures a continuous improvement cycle that supports student success, industry readiness, and long-term program excellence.

C. Staffing

Describe the adequacy of the staff (administrative, instructional, and technical) and institutional services provided to the program. Discuss methods used to retain and train staff. Describe the Program Retention for support staff and provide data of implementation.

The Polytechnic University of the Philippines ensures the presence and adequacy of administrative, instructional, and technical staff in the delivery of institutional services that creates an environment that fosters learning, growth, and success for students and in guaranteeing the smooth operations of the Polytechnic University of the Philippines academic program. This includes personnel that helps manage enrollment, student support and services, information technology support, finances, and other administrative duties.

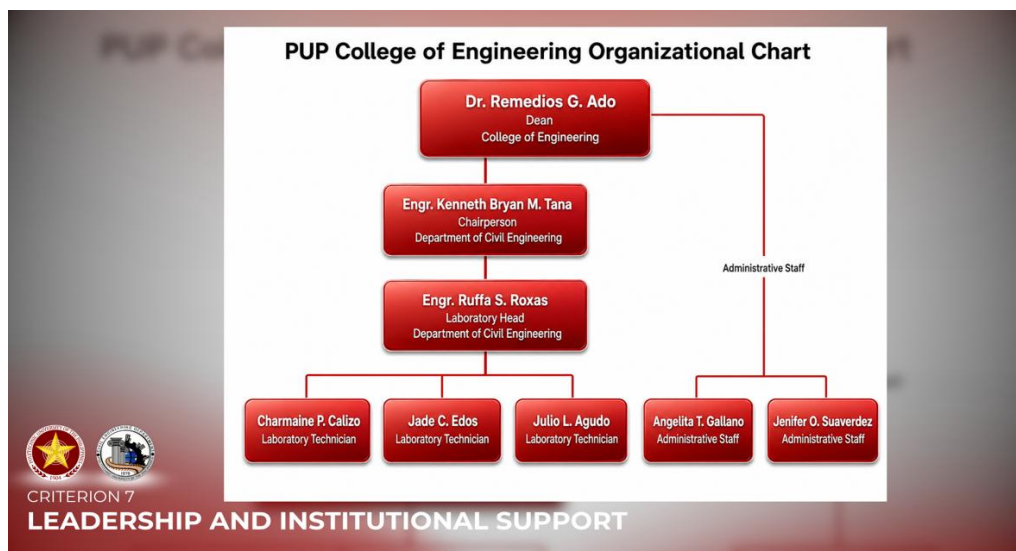

Figure 7.36 Organizational Chart of the College of Engineering showing its Staffing

Administrative Staff Support: The office of the dean is supported by a college secretary who covers the whole range of functions essential to an academic institution such as general office administration and academic programs coordination ([Attachment C7-30 – Curriculum Vitae of Administrative Staff](#)).

Instructional Staff Support: For courses requiring laboratory hands-on activities, an assigned staff assists the faculty member in preparing the facility to be used in the delivery of the hands-on activities.

(See [Attachment C7-31 - Contracts of Laboratory Technicians](#))

(See [Attachment C7-32 – Curriculum Vitae of Laboratory Technicians](#))

Figure 7.37 Laboratory Technician Edos assisting Laboratory Head Roxas on the Universal Testing Machine

Technical Support Staff: The Department Chairperson and Laboratory Head support academic operations in ensuring the efficient delivery of services and instruction. The university's Information and Communications Technology Office (ICTO) maintain ICT-enabled facilities such as engineering and computer laboratories. Dedicated and hardworking personnel maintain tools and equipment in the physical sciences and professional laboratories.

The Polytechnic University of the Philippines is guided by its Human Resource Merit Promotion and Selection (HRMPSB) system in the hiring and deployment of staff from the process of identifying a vacancy and determining the job requirements of each of the units in the university, up to sourcing potential candidates, screening and interviews, making a job offer, until finally hiring and onboarding of staff.

The Polytechnic University of the Philippines' Personnel Development Committee (PDC) provides the measures and strategies that the university puts in place to ensure that support staff members stay in their roles and continue to perform effectively. The career and personnel development program of the Polytechnic University of the Philippines safeguards the retention of staff through various means, such as providing opportunities for career growth and

development, offering competitive compensation packages, recognizing and rewarding excellent performance, and promoting a positive and supportive work environment. Additionally, regular training and professional development opportunities are offered to support staff members in developing new skills and enhancing their abilities, which can lead to job satisfaction and increased retention. Regular check-ins, office meetings, and performance reviews are also provided to support staff members to voice their concerns, ask questions, and receive feedback from supervisors ([Attachment C7-33 - Guidelines on the Participation in Staff Development, Seminar and Training Activities/ Human Resource Learning Development Plan](#)).

OFFICE		Allocation For	Income Target	Multipliers / Adjustments	Adjusted Income Target	Actual Income	Multipliers / Adjustments	Adjusted Actual Income	2025 Utilization	% of Total Budget	2025 Estimate	2025 Estimated Difference	% of Income Target	% of Income Target

CRITERION 7

LEADERSHIP AND INSTITUTIONAL SUPPORT

Figure 7.38 FSD Budget Allocation and Utilization for the College of Engineering

D. Faculty Hiring and Retention

1. Describe the process for the hiring of new faculty.

D.1 Faculty Hiring

The recruitment and promotion of the faculty members at PUP strictly adhere to the rules and procedures of Civil Service Commission ([Attachment C7-34 – CSC Guidelines for Faculty Hiring in State Universities](#)), the Manual on Position Classification and Compensation of the Department of Budget and Management, particularly the Position Classification and Compensation Scheme for Faculty Positions in State Universities and Colleges, and other related laws.

1. The selection of faculty members for appointment is open to all qualified applicants according to the principle of merit and fitness, determined, as far as practicable, by competitive evaluation and competency-based assessment.
2. There are equal employment opportunities for men and women at all levels and no discrimination in the selection of faculty members on account of age, sex, sexual orientation and gender identity, civil status, disability, religion, ethnicity, or political affiliation, provided that the candidates for appointment meet the minimum qualification standards of the position to be filled.
3. The qualification standards are the minimum and basic requirements for positions in the government in terms of education, training, experience, civil service eligibility, physical fitness, and other qualities required for the successful performance of the duties of the position. They shall serve as the basic guide in the selection of the faculty members and the evaluation of appointments to all faculty positions in the University.
4. In accordance with CSC-MC No. 1, Series of 2012 or the Repeal of Policies on the Publication of Vacant Faculty Positions, available positions are excluded from the publication requirement.

Figure 7.39 Guidelines for Faculty Hiring in accordance with CSC Memorandum Circular

Recruitment and Selection of New Faculty

1. Requirements

a. By Invitation - Highly qualified persons may be invited directly by the President of the University or upon the recommendation of a College Dean/Campus Director and endorsement of the Vice President for Academic Affairs/Vice President for Campuses for a teaching position.

Basic documentary requirements (subject to additional requirements required by the discipline/academic unit):

- i. Transcript of Records and Diploma
- j. Curriculum vitae or Personal Data Sheet (CSC Form 212, revised 2017)
- k. Professional license (whenever applicable)

b. By Application - Qualified individuals who intend to apply to any College/Campus in the University may file their application letter through any of the following:

- The President of the University
- The Executive Vice President
- The Vice President for Academic Affairs
- The Vice President for Campuses
- The Dean of the College/Campus Director

The College Dean and the Department Chair (DC) prepare the projection of the teaching load for the succeeding term or semester. The DC identifies the number of teaching personnel needed for the program. He/ She informs the HRMD through the Dean and VPAA and submits a letter requisition indicating the number of teaching personnel needed for the program and the specific skills and qualifications. The HRMD deploys various channels of communication such as the university website, Polytechnic University of the Philippines official page, referrals, and other forms of publication indicating teaching job vacancies.

The hiring process begins in the HRMD when applicants submit their records and credentials. The HRMD staff or hiring personnel conducts initial interviews and verification of records and credentials if the qualifications of the applicant meet the requirements prescribed by the regulatory bodies and the university. The HRMD hiring personnel administers the psychological and personality examinations to the applicants. After the examinations, the

VPAA, Dean, and Department Chairs conduct interviews and teaching demonstrations with the assistance of the HRMD. Teaching demonstration aims to assess the skills and abilities of the applicants in terms of mastery of the subject matter, methods and strategies, classroom management, command of the language of instruction, and attitude towards the teaching profession. The DC recommends the final teaching applicant for hiring based on the results of the screening process. The Dean of the College approves the DC's recommendation and informs the HRMD of the successful teaching applicants. The HRMD facilitates the processing of the requirements for the employment of newly hired teaching personnel and contract signing.

In particular, the following procedures for Hiring of Faculty by Invitation are observed:

1. The College Dean/Campus Director shall submit a recommendation letter to the University President through the Vice President for Academic Affairs/Vice President for Campuses.
2. The Vice President for Academic Affairs/Vice President for Campuses shall screen the recommendation and endorse qualified individuals to the Faculty Evaluation Office (FEO) for assessment and determination of academic rank. This evaluation process also applies to those who are invited by the University President.
3. FEO evaluates the credentials of the invited faculty in accordance with the established Common Criteria for Evaluation (CCE).
4. The recommendation is endorsed by the Vice President for Academic Affairs/Vice President for Campuses to the University President for final approval.
5. The President of the University shall have the final discretion to determine the most appropriate rank/sub-rank or position for a particular candidate based on the criteria established by the University. However, in the exercise of such discretion, the University President shall be guided by existing laws, rules, and regulations.
6. The approved recommendation letter is forwarded to the Human Resource Management Department for the preparation of the appointment certification. Items with SG-18 and below are submitted to the BOR for information only. Appointments to these items may be processed while awaiting the BOR Certification. Items with SG-19 and above, on the other hand, are required to have the BOR approval and Certification prior to the processing of the appointment.

Hiring of Faculty Members by Application generally follows the following procedures:

1. Only applicants who submitted a formal application with the required credentials shall be considered for initial screening.
2. The College Dean/Campus Director shall exercise due diligence in the screening of the faculty applicants.
3. Only applicants who meet the minimum requirements based on the credentials they submitted shall be invited for further screening.
4. Only applicants who qualify in the screening shall be recommended for a teaching position or inclusion in the roll of qualified faculty for future reference in case there is no teaching vacancy.
5. The College Dean/Campus Director recommends the applicant through a letter addressed to the University President through the Vice President for Academic Affairs/Vice President for Campuses.
6. The Vice President for Academic Affairs/Vice President for Campuses screens the recommendation and forwards the submitted credentials to FEO to determine the academic rank of the applicant.
7. FEO evaluates the credentials of the applicant following the established CCE.
8. Once the academic rank is determined, the recommendation is returned to the Vice President for Academic Affairs/Vice President for Campuses. The documents are endorsed by the Vice President for Academic Affairs/Vice President for Campuses to the University President for final approval.
9. The President of the University shall have the final discretion to determine the most appropriate rank/sub-rank or position for a particular faculty candidate based on the established criteria of the University. However, in the exercise of such discretion, the University President shall be guided by existing laws, rules, and regulations.
10. The approved recommendation letter is forwarded to the Human Resource Management Department for the preparation of the appointment certification. Items with SG-18 and below are submitted to the BOR for information only. Appointments to these items may be processed while awaiting the BOR Certification. Items with SG-19 and above, on the other hand, are required to have the BOR approval and Certification prior to the processing of the appointment.

2. Describe strategies used to retain current qualified faculty. Provide a report on retention.

D.2 Faculty Retention

To retain the best and most qualified teaching personnel of the university, Polytechnic University of the Philippines provides compensation and incentives based on performance and academic and professional achievements.

The Polytechnic University of the Philippines creates a career and personnel development program for faculty members as part of efforts to retain faculty. This program includes provisions for training, such as foreign and local training grants and scholarships, job rotation, counseling, mentoring, and other HRD interventions. The merit system includes the career and personnel development program.

To ensure fairness, justice, and quality in achieving its objective, the Polytechnic University of the Philippines established this merit system and abides by the merit and fitness principles in the recruitment, appointment, and promotion of faculty members in the university at the tertiary level. No one will be excluded from consideration for a faculty position because of their gender, citizenship status, handicap, religion, ethnicity, or political affiliation. In pursuing this goal, the Merit System seeks to:

1. Establish a promotion strategy that rigorously adheres to the merit and fitness concept in the choice, hiring, and appointment of tertiary faculty members;
2. Create a system for classifying faculty members;
3. Give all eligible men and women who want to work in government equal job chances; and
4. Develop faculty that is well educated.

To provide due rewards to faculty members who actively strive for professional development and to reinforce faculty productivity, faculty members are promoted through various schemes.

I. Merit Promotion

- a. In accordance with CSC MC 40, S. 1991, the University grants step increments based on employee performance. The total number of recipients of step increments based on merit shall not be more than 5% of the total number of permanent faculty members and administrative employees. A forced ranking system is implemented to determine the top 5%.
- b. A faculty member who has published a paper or is cited in national or international refereed or peer-reviewed journals shall be entitled to a maximum of

nine (9) step increments that may result in crossing faculty ranks provided that the faculty member has accumulated or earned the required credits. This merit promotion scheme shall be governed by Executive Order No. 15, Series of 2024, or the “Revised Policy on Merit Promotion Through Research Production, Publication, and Citation”.

II. Reclassification

- a. DBM-CHED Joint Circular No. 3, Series of 2022 ([Attachment C7-35 – DBM-CHED Joint Circular No. 3](#)) prescribes the revised and updated guidelines on the reclassification of faculty positions.
- b. According to the said Joint Circular, faculty members promoted through the institutional faculty merit and promotion system may still be eligible for reclassification, but the credentials used for institutional promotion shall no longer earn points.
- c. The number of sub-rank increments that may be awarded will be based on the total score received by the faculty. The faculty may be awarded a maximum of six (6) sub-ranks.

III. Presidential Prerogative

- a. The exercise of presidential discretion is extended to the University President, provided that it is compliant with the prescribed standards and guidelines of the Commission on Higher Education and other applicable rules.
- b. The Human Resource Management Department (HRMD) shall submit the list of vacant faculty positions to the Office of the President (OP) through the Office of the Vice President for Academic Affairs (VPAA)/Office of the Vice President for Campuses.
- c. The VPAA/VPC shall interview and evaluate the credentials of the faculty who has been recommended for promotion. If found qualified, the VPAA/VPC shall endorse their promotion for approval of the University President.
- d. The President may or may not approve the application for promotion.
- e. If approved, the President endorses the applications for promotion to the BOR for approval.

E. Support of Faculty Professional Development

Describe the adequacy of support for faculty professional development and how activities such as sabbaticals, travel, workshops, seminars, etc., are planned and supported. Describe the system or procedures on the generation of Professional Development Plan. (Note: Provide a

table for the budget allocations, in terms of percentages and policies for faculty development plan execution, etc.)

The systematic programs and initiatives designed to support the professional growth of faculty members in educational institutions encompasses a wide range of activities aimed at enhancing teaching skills, research and extension capabilities, leadership qualities, personal wellness, and overall academic performance. PUP believes that effective faculty development programs not only improve the individual competencies of faculty members but also contribute to the institutional mission by fostering a culture of continuous improvement and excellence in education.

PUP's vision to become a leading polytechnic university in Asia also relies on its thriving community of faculty members. The university believes that faculty members should enhance their skills and knowledge in their specializations on a three-fold function: instruction, research, and extension. To achieve this, PUP continues to encourage its faculty members to participate in various professional development activities. Faculty development is a responsibility and privilege of teaching personnel, and PUP provides opportunities for faculty development that also meets the higher education standards for career advancement.

Polytechnic University of the Philippines values its personnel and works hard to develop a systematic professional and career development plan. As a result, the University develops Career and Personnel Development Programs (CPDP) for teaching and non-teaching, including provisions for training such as foreign and local scholarships and training grants, job rotation, counseling, mentoring, and other HRMD interventions. The Human Resource Management Department implements the CPDP in coordination with the Office of the Vice President for Academic Affairs.

The CPDP aims to:

1. Develop and implement a continuing program of training and development for its personnel,
2. Encourage its personnel to pursue relevant local and foreign-assisted training/scholarship grants, attend seminars, conferences, workshops, or related human resource development courses,
3. Motivate the personnel to attend to various in-service training/seminars/workshops/conferences at personnel development, personal and professional enrichment, and training opportunities organized by the HRMD and in

coordination with other departments/divisions and held within the vicinity of Polytechnic University of the Philippines

4. Engage the personnel to external trainings/seminars/conferences/workshops for personnel development, personal and professional enrichment, and training opportunities organized by other institutions and professional organizations and are held outside Polytechnic University of the Philippines. These also include international conventions and overseas training or conferences;
5. Determine the training needs of the personnel of their respective department/school.

As an ongoing process of education and skill enhancement, faculty members engage in various professional development pursuits to improve their teaching practices, stay current in their fields, and enhance their professional growth. The goal of faculty professional development is to foster a culture of continuous improvement, ensure high-quality education, and ultimately enhance student learning outcomes. By staying abreast of the latest advancements in their disciplines and pedagogical strategies, faculty members can engage and inspire their students more effectively, adapt to the evolving educational landscape, and contribute to the academic community.

1. Advanced Education

Pursuing further academic qualifications beyond the required MS/MA degree and obtaining doctoral degrees that are vertically or within their allied field of specialization, graduate certificates, and specialized trainings. This type of professional development enables faculty members to deepen their knowledge, acquire new skills, and stay updated with the latest research and advancements in their field. By engaging in advanced education, they can enhance their expertise, improve their career prospects, and contribute more effectively to their organizations and industries. This continuous learning process not only fosters personal growth but also supports the broader goals of innovation and excellence within the university.

2. Faculty Immersion

Faculty immersion is a form of professional development that involves educators fully engaging in an intensive, hands-on learning experience within a specific context or environment. This approach allows faculty members to gain a deeper understanding and practical insights into new teaching methodologies, industry practices, or cultural settings. Immersion programs may include short-term residencies at other institutions, industry internships, cultural exchanges, or participation in interdisciplinary projects. The objective is

to expose faculty to real-world applications and diverse perspectives, thereby enhancing their teaching effectiveness, enriching their academic contributions, and fostering innovation in their educational practices.

3. Continuing Professional Development

Continuing professional development (CPD) refers to the ongoing process by which faculty members actively engage in learning activities to enhance their skills, knowledge, and competencies throughout their careers. CPD encompasses a variety of formal and informal educational opportunities, such as workshops, seminars, online courses, conferences, and self-directed study. The goal is to ensure that professionals remain current with advancements in their field, meet industry standards, and maintain a high level of competence and effectiveness in their roles. CPD fosters lifelong learning, supports career progression, and contributes to personal and professional growth.

4. Membership/Officership in Professional Organizations

Faculty members actively participate in professional organizations because these memberships provide access to valuable resources, networking opportunities, and professional development. Professional organizations offer conferences, workshops, and publications that keep faculty updated on the latest research and trends in their field. Networking with peers and experts can lead to collaborations, mentoring, and career advancement. Additionally, these organizations often provide platforms for faculty to present their research, gain recognition, and contribute to the academic community. Overall, membership in professional organizations supports faculty in staying informed, connected, and engaged in continuous improvement.

PERSONAL DEVELOPMENT, VALUES, AND WELLNESS

Personal development, values, and wellness among faculty members are crucial for fostering a balanced, productive, and fulfilling professional life. Personal development involves activities that enhance self-awareness, emotional intelligence, and interpersonal skills. This can include pursuing skills development, engaging in lifelong learning, and setting personal and professional goals. Values, on the other hand, focus on maintaining integrity, ethical behavior, and a commitment to excellence and inclusivity in their professional roles. Finally, wellness encompasses physical, mental, and emotional health, encouraging faculty to engage in regular exercise, mindfulness practices, and stress management techniques.

The university supports these endeavors by funding activities that promote the personal development, values, and wellness of faculty members. Through annual team-building activities, seminars and workshops, and small-group discussions that focus on work-life balance, and improve job satisfaction, work ethic, and emotional health among others, faculty members are equipped to contribute more effectively to the academic community. The university also offers various physical activities for faculty members and administrative employees to promote physical and mental well-being and social connections.

Figure 7.40 Annual planning and team building activity of the College of Engineering

SABBATICAL LEAVE

Sabbatical leave for a period not exceeding one year is granted to any faculty member from the rank of Associate Professor and above who has served the University for a minimum of six (6) years of continuous teaching immediately preceding the filing of the application, to encourage study, investigation, and research and to improve his/her competence for service to the University. Sabbatical leave may be enjoyed more than once in the entire service of the faculty; provided, that succeeding sabbatical leaves may be granted only after serving another six (6) years after termination of the previous sabbatical leave. The following are the privileges of a faculty member on a sabbatical leave: 1. full salary corresponding to his/her leave 2. free round-trip transportation from place of origin to destination and back. 3. Advanced

enhancement of salary equivalent to three (3) months of service 4. A maximum of two (2) faculty members shall be granted to every college in a given year.

AWARDS AND INCENTIVES

Faculty Grants are given to encourage research and publication among the members of the faculty. The recommendation shall originate from the Department and be endorsed by the College Academic Personnel Committee. This should be approved by the Board upon recommendation of the Academic Personnel Committee.

1. Research Programs and Grants

Implementing research guidelines is crucial for empowering faculty members to conduct impactful and ethically sound research, thereby advancing knowledge and enriching the broader academic community. Institutions, through the provision of support, guidance, and resources, can cultivate an environment of research excellence. It is imperative for academic institutions to prioritize and support faculty members in their research activities to drive academic excellence and contribute to positive societal change. These guidelines serve as a roadmap for faculty members, providing essential support, guidance, and resources to cultivate a culture of research excellence within academic institutions.

a. **Research Activities: Production, Presentation and Publication/Patent for Regular Full-time Faculty Members (ReAP3).** The Revised Guidelines on ReAP3 aim to provide a framework and support system for regular full-time faculty members to engage in research activities effectively, regardless of their rank. These guidelines are designed to encourage and facilitate faculty members to produce high-quality research outputs, present their findings in conferences, and publish their work in reputable journals or obtain patents. It stresses faculty involvement in research projects consistent with the Civil Service Commission (CSC) Memorandum Circular which allows State Universities and Colleges (SUCs) to develop their own performance management system/performance evaluation system for faculty positions/ranks. This system aims to continuously foster the improvement and efficiency of faculty members and enhance the effectiveness of the organization.

b. **Dissertation Financial Assistance.** The Revised Guidelines on Dissertation Financial Assistance aim to enhance the faculty profile by supporting the completion of doctorate degrees in Philosophy, Science, and Arts. By providing financial assistance for dissertation-related expenses, the guidelines aim to enhance the faculty profile, promote

knowledge generation and dissemination, and align with the SUC Levelling principles and various reform agendas for state universities and colleges. Additionally, these guidelines seek to ensure that the dissertation projects are conducted efficiently and in accordance with established standards and regulations, ultimately contributing to the academic and research excellence of the university.

c. **International and National Paper Presentation Financial Assistance.** The Revised Implementing Guidelines on International and National Paper Presentation Financial Assistance aim to provide support and financial assistance to faculty members and researchers for presenting their research work at international and national conferences. The guidelines aim to encourage and facilitate the dissemination of research findings, promote academic exchange, and enhance the visibility of the Polytechnic University of the Philippines (PUP) in the global and national academic community. By offering financial assistance for paper presentations, the policy seeks to support faculty members in sharing their research outcomes, networking with peers, and contributing to the advancement of knowledge in their respective fields.

Figure 7.41 International Paper Presentations of the Department of Civil Engineering

d. **University- and Externally Funded Research.** This aims to provide a framework for faculty members to propose, conduct, and manage research projects that are both feasible and expected to yield quality results. It emphasizes the importance of collaboration, impact assessment, alignment with specialization, and adherence to the University's research agenda and the SDGs. Faculty members are encouraged to submit University and Externally

Funded Research proposals that demonstrate alignment with these criteria and contribute to the advancement of knowledge, innovation, and societal impact.

e. University Publication Assistance, and Publication and Citation Incentives. These provide assistance and incentivize faculty members and administrative employees for their scholarly contributions through publications and citations. The University Publication Assistance (UPA) refers to the financial assistance provided exclusively for publication fees to any publication indexed in Web of Science (WoS) – Core Collections and/or Scopus. This assistance aims to support researchers in covering the costs associated with publishing their research works in reputable journals indexed in WoS and/or Scopus. Furthermore, Publication and Citation Incentives refer to the financial incentives provided to individuals for their scholarly contributions in the form of publications and citations, aiming to recognize and reward their research efforts, promote knowledge dissemination, and encourage academic productivity within the institution.

Types of Publication	Amount of Incentive
Scopus-Indexed Journal <i>Quartile 1 (Q1)</i>	₱75,000.00
Scopus-Indexed Journal <i>Quartile 2 (Q2)</i>	₱60,000.00
Scopus-Indexed Journal <i>Quartile 3 & 4 (Q3/Q4)</i>	₱50,000.00
Book Scopus/WoS-Core Collections Indexed Journal	₱30,000.00
Web of Science (WoS) Core Collection/s	₱40,000.00
Conference Proceedings Scopus/WoS-Core Collections Indexed Journal	₱30,000.00
PUP Institutionalized Journal	₱15,000.00
Book Chapter Scopus/WoS-Core Collections Indexed Journal	₱10,000.00
Systematic Literature Review Scopus/WoS-Core Collections Indexed Journal (regardless of quartile rank of the journal/s or conference proceedings)	₱20,000.00
Funded Research (University/External Agency Funded) Scopus/WoS-Core Collections Indexed Journal	₱60,000.00

Figure 7.42 Amount of Assistance and Incentives for Publications

f. Merit Promotion through Research Production, Publication and Citation. The merit promotion scheme was approved to provide an opportunity for faculty members to avail themselves of promotions based on research publication and citation. The scheme aims to

encourage research productivity, reward active involvement in research, and motivate faculty members to excel in their roles as academic researchers. The evaluation for promotion is based on a point system that considers the faculty member's current rank and the level of publication. Points are assigned for publications in peer-reviewed journals recognized and verifiable through Google Scholar, Scopus, and Web of Science (WoS) – Core Collections. The required points for promotion vary based on the faculty member's current rank, with different thresholds for Instructor, Assistant Professor, Associate Professor, and Professor levels.

g. Intellectual Property Management Rewards, Recognition, and Incentives (IPMO-GRRI). These provide support and/or incentives for research outputs in terms of copyright protection, technology transfer and commercialization. Included in this guideline are IPMO Initiative Project Grant for research projects with a potential for technology transfer, utility, and industrial model and/or patent application. Furthermore, Awards, Recognitions and Incentives/Grants are also provided for Innovative, Patented, Commercialized Technology and Exemplary Business Plan.

h. Research Awards. This annual event recognizes the faculty members' outstanding accomplishments and contribution to research and development in their respective fields.

2. Extension And Community Development

Incentives for faculty members engaged in extension and community service are among encouragements afforded by the University in promoting active participation and rewarding faculty members' contributions to society. Here are some common incentives provided to faculty members for their extension and community service activities.

a. Service Credit and/or Compensatory Time Off

A regular faculty member (without designation) who will serve as an extension program volunteer/worker shall be entitled to a Service Credit as part of his/her incentive. A day's service credit shall be equal to eight (8) hours of attendance and participation in an extension activity. Compensatory time off (CTO), shall be given to faculty members with designation who attended/participated in an extension activity on an on-call basis or on days that are not considered regular workdays.

b. De-loading

Full-time faculty members designated as extensionists shall be entitled to a reduction of six (6) units from the regular load of fifteen (15) units with corresponding night pay. They may, however, be assigned a maximum of twelve (12) units of part-time teaching load but will no longer be allowed temporary substitution.

c. Awards

The following awards are given to outstanding extension works.

i. Recognition of Published Extension Works

The university gives cash incentives to qualified faculty/personnel whose extension work has been published in national or international refereed journals or presented in national or international forum or conferences.

ii. Best Extension Program and Best Extensionist Award

The university, through the Extension Management Office (EMO), holds the Gawad Lingap Komunidad Best in Extension Program where faculty members with outstanding extension programs ([Attachment C7-36 - PUP List of Awards and Recognition](#)).

Figure 7.43 Awarding of Gawad Lingap Komunidad

STUDY PRIVILEGES

1. Faculty Tuition Discount

a. Regular faculty members shall have the privilege of enrolling in the University for not more than twelve units a semester at Board-approved reduced rates of fees, subject to the approval of the President or his designated representative.

b. Any part-time faculty enjoying study privileges shall be given a discount by the following:

FOR UNION MEMBERS	
Permanent	100%
Temporary	75%
Part-Time	50%
FOR NON-UNION MEMBERS	
Permanent	75%
Temporary	75%
Part-Time	50%

2. Faculty Fellowship

a. Faculty members may avail themselves of local faculty fellowship and enroll in the University for advanced degrees, subject to the guidelines and any other conditions that the University may prescribe. In cases where the chosen course is not offered in the PUP Graduate School, faculty members may seek admission to other recognized universities and colleges in the country that offer the needed expertise.

b. Faculty Fellowship may either be PUP-funded or externally funded. It may also be full or partial depending on the grantor. If the fellow is enrolled in HEIs in the Philippines, the fellowship is categorized as a local fellowship, otherwise, it is foreign.

c. A faculty member who has been granted a fellowship to finish a master's degree may still be eligible for a fellowship to finish a doctorate after the completion of his return of service to the University for the previous grant. Meanwhile, a faculty member who was previously granted a fellowship but was not able to complete his degree is disqualified.

d. A faculty member who has been granted a fellowship shall be entitled to the following benefits:

- i. Salary and other benefits of the fellow
- ii. Tuition and all other authorized school fees
- iii. Thesis and dissertation incentive
- iv. Promotion

- For Master's: Two (2) Academic Faculty Rank promotion upon graduation, subject to the availability of item position or two (2) steps horizontal increment while waiting for the available item position

- For Doctorate: Three (3) Academic Faculty Ranks promotion upon graduation, subject to the availability of item position or three (3) steps horizontal increment while waiting for the available item position.

e. In the case of an externally funded fellowship, the fellow shall only be entitled to benefits that have not been provided by an external funding agency. The Benefits shall be enumerated in the MOA between the University and the applicant.

f. Faculty members who have been granted a fellowship shall reimburse PUP the total amount released to them, in case of willful abandonment of the fellowship, gross misconduct, and noncompliance with the terms and conditions stipulated in the Fellowship Contract or if removed from service for any lawful cause.

g. The faculty shall render return service to PUP for two (2) years for every year of fellowship or a fraction thereof. This will also hold for the non-completion of the course including failure to complete the courses.

BONUSES AND OTHER INCENTIVES

Faculty members are entitled to fringe benefits such as Midyear and Year-end Bonuses, Clothing Allowance, Collective Negotiation Agreement (CNA), Cash Gift, and other bonuses.

1. Clothing Allowance

- a. Each regular faculty member is provided with a Clothing Allowance, which may vary depending on the authorized amount under the applicable General Appropriations Act (GAA).

b. Faculty members who are expected to render at least 6 consecutive months of service in a particular year including leaves of absence with pay shall be entitled to Clothing Allowance.

c. Newly hired regular faculty members shall be entitled to Clothing Allowance after they have rendered 6 consecutive months of service, or in the next grant thereof, whichever comes later.

d. Part-time faculty members are not entitled to Clothing Allowance.

e. The Clothing Allowance of faculty members who are on detail with other government agencies shall be borne by the University.

f. Regular faculty members who transferred to PUP from other agencies during the first (six) 6 months of a particular year and were not granted Clothing Allowance by their former agencies, shall be granted Clothing Allowance. If they transferred to PUP within the last six (6) months of a particular year, they shall no longer be granted Clothing Allowance as by then they are deemed to have been granted Clothing Allowance by their former agencies.

2. Midyear/Year-end Bonus and Cash Gift

a. Midyear Bonus may be paid to regular faculty members not earlier than May 1 and not later than May 31 of a particular year, based on the basic monthly salaries as of April 30, provided that they have rendered at least four (4) months of service including leaves of absence with pay from January 1 to April 30 of the same year.

b. All regular faculty members who have rendered at least a total of four (4) months of service including leaves of absence with pay from January 1 to October 31 of a particular year, and who are in the service as of October 31 of the same year, shall be entitled to the full Year-end Bonus based on the basic monthly salaries as of October 31.

c. Those who have rendered more than four (4) months of service in a given year and are to retire or are to be separated before October 31 of the year may receive the proportionate shares of the remaining balances of their Cash Gift in addition to their ½ Year-end Bonus.

d. All regular faculty members who have rendered less than four (4) months of service as of October 31 of the same year shall be entitled solely to the pro-rated cash gift.

e. Part-time faculty members and those who are under the following instances shall not be entitled to Midyear/Year-end Bonus and Cash Gift:

i. Absence without leave (AWOL)

ii. Formally charged with administrative cases as well as criminal cases that relate to acts or omissions in connection with their official duties and functions and found guilty and/or meted penalties.

3. CNA Incentive

- a. Faculty members shall be entitled to a CNA Incentive, subject to the implementing guidelines or criteria set by the Union-Management Consultative Committee.
- b. The amount of the CNA Incentive shall be dependent on savings generated from cost-cutting measures and systems improvement and the improvement of productivity and income of the University.
- c. The CNA Incentive for the year shall be paid as a one-time benefit after the end of the year.

4. Productivity Enhancement Incentive

The Productivity Enhancement Incentive shall be given not earlier than December 15 of every year to all qualified employees of the government ([Attachment C7-37 - Budget Circular No. 2017-4](#)).

5. Performance-Based Bonus

The PBB is a top-up bonus that will be given to employees based on their contribution to the achievement of their Agency's targets and commitments in the covered fiscal year. The grant of PBB is governed by the annual guidelines of the Inter-Agency Task Force on the grant of PBB.

6. Service Recognition Incentive (SRI)

The Polytechnic University of the Philippines provides qualified faculty members and administrative personnel with the government-authorized Service Recognition Incentive (SRI), subject to applicable national guidelines, eligibility requirements, and the availability of authorized funds ([Attachment C7-38 – Budget Circular No. 2025-3](#)). The SRI serves as a one-time financial incentive that recognizes employees' collective contributions, satisfactory performance, and commitment to public service. At PUP, this benefit forms part of the University's personnel welfare and recognition mechanisms, helping support employee morale, motivation, and retention. By acknowledging the contributions of teaching and non-teaching personnel, the SRI also strengthens the continuity and quality of the academic and administrative services that support the effective implementation of the Bachelor of Science in Civil Engineering program.
