CRITERION 8. EXTENSION SERVICE, COMMUNITY-ORIENTED PROGRAMS, AND INDUSTRY ACADEME LINKAGE

A. Industry-Academe Linkage

1. Describe regular active participation from the industry in planning and defining program educational objectives, student outcomes, and curricula to ensure that these are relevant and up to date with societal and professional requirements.

The College of Engineering (COE) ensures that the BS Civil Engineering (BSCE) program remains relevant and responsive to societal and professional needs through regular, active, and documented industry participation in the planning and review of the Program Educational Objectives (PEOs), Student Outcomes (SOs), and curriculum. This is primarily institutionalized through the Government–Industry Advisory Board (GIAB), composed of representatives from government agencies, construction and engineering firms, consulting companies, and other key industry partners.

The GIAB meets at least annually to review evidence from the previous academic year and to validate the continuing relevance of the PEOs, SOs, and curricular content. During these meetings, GIAB members provide recommendations on (1) the competencies and professional behaviors expected of entry-level civil engineers; (2) emerging technical areas, codes/standards, tools, and practices in the field; and (3) gaps observed in graduate preparation based on workplace demands. These inputs directly inform the revision of the curriculum and the Outcomes-Based Teaching and Learning Plan (OBTLP), including updating course topics, strengthening laboratory and design components, and refining course learning outcomes to align with industry needs and current practice.

When recommendations indicate significant changes in professional requirements, the BSCE program committee and relevant faculty prepare proposed updates which are then deliberated upon. The department integrates GIAB recommendations with academic considerations and stakeholder interests before finalizing revisions to program components. Through this structured process, the program ensures that what is taught, how it is taught, and what students are expected to achieve remain aligned with contemporary civil engineering practice and societal expectations.

In addition to advisory board consultations, the program conducts tracer studies and employer/alumni feedback activities to further evaluate whether graduates demonstrate the competencies required in the workplace. (Attachment C8-01 – [Graduate Tracer Study](#))

ONLINE GRADUATE TRACER STUDY 2022
COLLEGE of ENGINEERING
POLYTECHNIC UNIVERSITY OF THE PHILIPPINES

The alumni are considered as the best evidence of a program's effectiveness in terms of employment and professional development, years 2012-2022. These information can be obtained by conducting a graduate tracer study. The PUP Online Graduate Tracer Study was conducted to assess the employability of PUP graduates. Furthermore, it was aimed to track these graduates job placement and professional development.

DATA GATHERING

The survey was participated by graduates of batch 2022 from various undergraduate and graduate degree programs across the different colleges in the Main Campus (Main Campus) and other Campuses of the University. No sampling method is used since all the alumni are the target respondents. The study used a developed version of previous study survey/questionnaire released from 2017 to 2018. Respondents completed an online survey. The Institute for Data and Statistical Analysis (IDSA) summarized and analyzed the respondent's data.

RESULTS OF THE STUDY

Table 1. Total Number of Graduates of PUP for 2022 and the Actual Number of Respondents from each Degree Program - College of Engineering (CSE)

Degree Program	Total No. of Graduates	Actual No. of Respondents	Percentage of the Population of Graduates (%)	Percentage of the Total Respondents (%)
Bachelor of Science in Civil Engineering	202	52	25.74	14.38
Bachelor of Science in Computer Engineering	202	98	48.51	13.91
Bachelor of Science in Electrical Engineering	100	100	100.00	22.42
Bachelor of Science in Electronics and Communications Engineering	1	1	100.00	0.18
Bachelor of Science in Electronics Engineering	201	100	49.75	30.27
Bachelor of Science in Industrial Engineering	202	18	8.91	5.15
Bachelor of Science in Mechanical Engineering	100	14	14.00	3.45
Bachelor of Science in Robotics Engineering	100	10	10.00	12.28
Total	1,407	373	26.51	100.00

Table 2: Distribution of the Respondents according to Current Employment Status in the Different Degree Programs in the College of Engineering (CSE)

Degree Program	Current Employment	Frequency	Percentage (%)
Bachelor of Science in Civil Engineering	Employed	28	53.85
	Self-employed	2	3.85
	Unemployed	1	1.92
	Never Been Employed	2	3.85
	Employment Rate	33	63.46
Bachelor of Science in Computer Engineering	Employed	62	63.27
	Self-employed	2	2.04
	Unemployed	1	1.02
	Never Been Employed	1	1.02
	Employment Rate	65	67.35
Bachelor of Science in Electronics Engineering	Employed	110	55.00
	Self-employed	2	1.00
	Unemployed	2	1.00
	Never Been Employed	1	0.50
	Employment Rate	114	57.50
Bachelor of Science in Electronics and Communications Engineering	Employed	1	100.00
	Self-employed	0	0.00
	Unemployed	0	0.00
	Never Been Employed	0	0.00
	Employment Rate	1	100.00
Bachelor of Science in Industrial Engineering	Employed	107	59.44
	Self-employed	4	2.22
	Unemployed	0	0.00
	Never Been Employed	10	5.34
	Employment Rate	111	61.67
Bachelor of Science in Mechanical Engineering	Employed	18	100.00
	Self-employed	0	0.00
	Unemployed	0	0.00
	Never Been Employed	0	0.00
	Employment Rate	18	100.00
Bachelor of Science in Robotics Engineering	Employed	13	65.00
	Self-employed	0	0.00
	Unemployed	0	0.00
	Never Been Employed	1	5.00
	Employment Rate	13	65.00
Total	Employed	311	83.38
	Self-employed	10	2.68
	Unemployed	10	2.68
	Never Been Employed	33	8.26
	Employment Rate	321	86.34

NOTES: 1) These results were derived from the Graduate Tracer Study. 2) Main Campus (Main Campus) and other Campuses (Other Campuses) of the University. 3) No sampling method is used since all the alumni are the target respondents. 4) The study used a developed version of previous study survey/questionnaire released from 2017 to 2018. 5) Respondents completed an online survey. 6) The Institute for Data and Statistical Analysis (IDSA) summarized and analyzed the respondent's data.

Sta. Tomas Campus	693	287	41.41%
Tagaytay Campus	275	202	73.46%
Union, Quezon Campus	174	175	100.58%
Total	6,790	4,790	70.54%

Table 2 outlines the response rates for campuses outside the Main Campus, where the overall response rate was significantly higher at 70.54%. Notably, campuses like Alfonso, Cebu, Cebu, Pullan, and Sta. Rosa achieved perfect response rates of 100%. In contrast, the Sta. Tomas, Commonwealth, and Parangal Campus recorded the lowest response rate at less than 50%.

Table 3. Frequency and Percentage Distribution of Graduates Employed by the Host Training Establishment (HTEs) in the Main Campus

Delivery Unit	Students Employed by the Host Training Establishment	Total No. of Graduates Answered the Survey
	f	%
College of Architecture, Design And The Built Environment	5	5.38%

CRITERION 8 PROGRAM LINKAGES

Figure 8.2 Online Graduate Tracer Study 2024

Findings from these studies are synthesized and presented as supporting evidence during GIAB deliberations and internal planning meetings. As a result, the PEOs are formulated and periodically reviewed in consultation with employers, alumni, members of professional organizations, faculty, and students, ensuring that the PEOs and SOs remain up to date with evolving industry trends, community needs, and professional standards.

Overall, the GIAB mechanism demonstrates regular and active industry engagement not only in providing feedback but also in shaping key academic decisions related to the PEOs, SOs, and curriculum, thereby ensuring that the BSCE program remains responsive, current, and outcomes-driven.

CRITERION B PROGRAM LINKAGES

CRITERION B PROGRAM LINKAGES

Polytechnic University of the Philippines
OFFICE OF THE CHAIRPERSON

The presentation also showed the breakdown of the **alumni survey indicators** per PED:

PED 1 - Demonstrating Engineering Profession

- 1.1 Assessment of present skills with the knowledge and skills acquired from the Civil Engineering program - **5,844 / 65.00%**
- 1.2 Application of undergraduate knowledge and skills in present job - **2,867 / 73.37%**
- 1.3 Extent to which the undergraduate program prepared graduates for employment in their chosen field of specialization - **2,631 / 73.22%**
- 1.4 Perception of support/aid for career growth and advancement in the current field of employment - **2,411 / 72.14%**

PED 2 - Social and Ethical Responsibility

- 2.1 Active participation and contribution to professional and social organizations dedicated to community development and nation building - **3,056 / 61.11%**
- 2.2 Extent to which involvement in professional and social organizations contributes to community development and nation building - **3,367 / 63.21%**
- 2.3 Extent to which significant professional and social organizations foster community development and nation building - **3,556 / 71.11%**
- 2.4 Perceived impact of one's contribution to nation building through professional practice or organizational involvement - **3,407 / 63.33%**

PED 3 - Lifelong Learning

- 3.1 Importance of continuous training and development in staying updated with current or emerging trends in the field - **4,444 / 90.00%**
- 3.2 Satisfaction with the availability and accessibility of relevant training and development opportunities - **3,255 / 65.10%**
- 3.3 Extent to which graduates pursue advanced studies or professional certification to enhance knowledge and expertise - **3,255 / 71.14%**
- 3.4 Extent to which the undergraduate program prepared graduates for lifelong learning and continuing professional development - **3,500 / 70.00%**

From the results, it was observed that **PED 1 registered the highest ratings** from both alumni and employers, suggesting relatively stronger attainment in terms of employment and professional practice. However, **PED 2 obtained the lowest ratings**, indicating an area that may require further investigation, particularly in relation to professional involvement, community engagement, and nation building. **PED 3 reflected moderate attainment** and pointed to the continuing need to support graduates in lifelong learning, certification, and professional development.

Assessment Process and Reference to Accreditation

Dr. Tina clarified that these PEDs and Standards form part of the Department's assessment and CQ documentation for accreditation. In summary:

- Student Outcomes were assessed through performance indicators, with attainment reported in percentages.
- Program Educational Objectives were assessed through alumni and employer surveys.
- The PED assessment cycle covered a period from 2018 to 2022.
- The PED survey was administered during the last quarter of 2022.
- The results were presented to the CME to obtain stakeholder consensus, validation, and recommendations for further improvement.

A LEADING COMPREHENSIVE
POLYTECHNIC UNIVERSITY IN ASIA

Polytechnic University of the Philippines
OFFICE OF THE CHAIRPERSON

He emphasized that under PTCAGET, the Department must demonstrate that assessment results are not merely reported for compliance, but are actually used in reviewing curriculum delivery, strengthening student preparation, and refining mechanisms for continuous quality improvement. In this regard, the presentation of both **Student Outcomes** and **PED survey results** in the CME forum part of the Department's effort to ensure that its academic program remains aligned with institutional standards, accreditation requirements, and the expectations of external stakeholders.

4.3 Review of Curriculum PEOs and SOs

Agenda Item 4.3 was discussed by Engr. Kenneth Uyres H. Tano, who led the presentation on the **Review of Curriculum Program Educational Objectives (PEOs) and Student Outcomes (SOs)**. This agenda item centered on the outcome-based direction of the BS Civil Engineering curriculum and the alignment of the program with institutional, professional, and stakeholder expectations. The discussion covered the following major points:

- Purpose of the BS Civil Engineering Program**
Engr. Tano explained that the BS Civil Engineering curriculum is intended to produce graduates who:
 - are qualified for professional practice in civil engineering and allied fields;
 - demonstrate professional competence and social responsibility;
 - contribute meaningfully to national development and community welfare; and
 - pursue lifelong learning and continuing professional development.
- Review of Program Educational Objectives (PEOs)**
The Program Educational Objectives were revisited in terms of how they reflect the expected accomplishments of graduates several years after completing the program. These objectives were discussed in relation to graduates' professional practice, leadership skills, engagement, and continuing advancement within their chosen careers.

Program Educational Objective
Three to five years after graduation, the Bachelor of Science in Civil Engineering graduates shall be:

PED 1: Demonstrating Engineering Profession
Employed and/or practiced in the field of Civil Engineering such as, but not limited to, Construction Engineering and Management, Consulting Engineering,

A LEADING COMPREHENSIVE
POLYTECHNIC UNIVERSITY IN ASIA

CRITERION B PROGRAM LINKAGES

Polytechnic University of the Philippines
OFFICE OF THE CHAIRPERSON

Structural Engineering, Transportation Engineering and Water Resources Engineering, or other related fields.

PED 2: Social and Ethical Responsibility
Committed members of professional and other organizations engaging in community development or nation-building.

PED 3: Lifelong Learning
Involved in continuous training and development in current trends and advancements in their fields of specialization.

- Review of Student Outcomes (SOs)**
The Student Outcomes were also discussed in measurable competencies that students are expected to possess by the time at graduation. These outcomes form the basis for curriculum mapping, course assessment, and performance evaluation under the Outcome-Based Education framework.
- Alignment with Institutional Framework**
Engr. Tano emphasized that the PEDs and SOs are not stand-alone statements; rather, they must be aligned with:
 - the University Vision and Mission;
 - the Institutional Learning Outcomes;
 - CME policies and standards; and
 - accreditation expectations under the Washington Accord Framework.
- Curriculum Review for 2025**
The body was informed that curriculum review activities are underway in preparation for the 2025 curriculum review. The rationale for review included:
 - the need to respond to post-pandemic educational realities;
 - the representative interest of PTCET and evolving institutional modalities;
 - the need to update competencies in response to industry development;
 - alignment with accreditation requirements; and
 - incorporation of stakeholder feedback.
- Stakeholder Participation in Curriculum Enhancement**
Engr. Tano highlighted that curriculum revision must be collaborative. Industry and government stakeholders play an important role in identifying emerging competencies, relevant technical skills, professional attributes, and practical expectations that should be reflected in the curriculum.
- Timeline and Documentary Requirements**
The proposed timeline for curriculum review, spanning approximately from February to August 2025, was discussed. This process includes consultations, review of learning outcomes, refinement of curricular content, and preparation of supporting documents necessary for institutional approval and implementation.

The discussion under this agenda highlighted the Department's commitment to ensuring that its curriculum remains relevant, outcome-driven, and responsive to both academic standards and the evolving needs of the profession.

Polytechnic University of the Philippines
OFFICE OF THE CHAIRPERSON

4.4 Stakeholder Recommendations

A dedicated portion of the meeting was allotted for stakeholder consultation and recommendations. This segment served as an open forum where Board members and representatives from industry, government, and the student sector provided substantive comments to support curriculum enhancement, program assessment, and continuous quality improvement.

Graduate Tracker Study and Employment Metrics

The initial discussion focused on the graduate tracer study and the interpretation of employment-related indicators.

- Engr. Abner Bantala inquired whether the **duration of employment** forms part of the program's employment metrics and outcome assessment.
- Dr. Rowena B. Pano Jr. clarified that employment duration is indeed included, although tracer studies use **EIG subgroups**, and that it forms part of the graduate tracer survey presentation.
- Dr. Pano further acknowledged that the **number of months employed** was not reflected in the report presented during the meeting, although such data must and may be included in future reporting.
- Engr. Bantala also asked whether self-employed graduates and those employed in **non- and engineering subfields** were included in the reported employment data.
- Dr. Pano confirmed that these categories were included in the overall reported **92.80% employment rate**.
- Engr. Joy Ignacio asked whether the said employment rate data gauged between local and overseas employment.
- Dr. Pano responded that the questionnaire only captured whether respondents were **employed or not employed**, and did not differentiate whether employment was local or overseas.
- Engr. John Pardo inquired about the point that employment status should also consider whether a graduate's job is **aligned with the BS Civil Engineering profession** and, eventually, whether it is aligned with the graduate's specialization.

This exchange highlighted the need to improve the tracer study tool so that it captures not only employment status, but also job relevance, specialization alignment, and the nature of employment outcomes more comprehensively.

Recommendations from Engr. Abner A. Bantala (Geotechnical Engineering)

Engr. Bantala shared observations from the perspective of geotechnical practice and stressed that graduates, while generally capable in calculations, still need stronger practical knowledge. He observed that:

- calculations are often strong in calculations but may still be underdeveloped in engineering judgment;
- there is a noticeable need to strengthen **creative and analytical thinking**;
- more students have limited readiness for **field-based decision-making**;
- there remains a gap in **geotechnical exposure**, particularly in relation to assessing actual parameters, understanding site conditions, and interpreting field and laboratory data.

He emphasized that:

- graduates should not wait until they are already in practice to learn the practical nuances of the field.

A LEADING COMPREHENSIVE
POLYTECHNIC UNIVERSITY IN ASIA

CRITERION B PROGRAM LINKAGES

CRITERION 8 PROGRAM LINKAGES

POLYTECHNIC UNIVERSITY OF THE PHILIPPINES
OFFICE OF THE CHAIRPERSON

students should be given better pre-graduation preparation and training;
stronger exposure to actual industry work is necessary to improve the quality of graduates entering technical and trades.

He also mentioned that in actual industry settings, judgments such as *goodness* can be valuable in technical work, especially in the identification and interpretation, suggesting the importance of interdisciplinary awareness in training future engineers.

Recommendations from Engr. Jagan Jorjell B. Villegas (Transportation Engineering)
Engr. Villegas recommended stronger integration of real-world and community-based problems into both classroom and field experiences. He suggested that:

- under PED 1, students should be exposed as much as possible to actual engineering problems rather than only abstract classroom exercises;
- classroom activities should be directed toward academic outcomes and practical solutions that may benefit communities;
- under PED 2, students should be immersed in communities to allow them to appreciate the actual context of civil engineering issues emphasizing that first-hand experience gives students a better perspective than purely theoretical discussion;
- under PED 3, the Department should consider introducing more credentialing systems or basic industry certification to support lifelong learning and improve the employability and competitiveness of graduates.

He also shared an example from their office, where OT students assigned in the City Government were given these topics linked to the *Formulation of the Sustainable Urban Mobility Plan*, allowing their research output to contribute directly to LGU initiatives. In relation to internships and industry engagement, he further proposed:

- establishing **multi-year memoranda of agreement (MOA)** with companies or government offices;
- particularly to organizations handling **multi-year projects**;
- so that student exposure to real-world work can be sustained and institutionalized.

Recommendations from Dr. Bernard M. Serrano (Water Resources Engineering)
Dr. Serrano emphasized the value of **academic-industry collaboration in research** and shared examples about research and collaboration from his own research group and external partners. He noted that:

- industry often has practical concerns that may be addressed through research, but academic institutions are not always fully tapped as research partners;
- there is a need to clearly define the **respective contributions of industry and academia** in collaborative projects;
- trust in the research capability of the academia should be developed progressively, possibly by starting with **manageable or smaller-scale research projects** and gradually building toward more complex collaborations.

She recommended that:

- civil engineering research be more **industry-driven and community-responsive**;
- active problems being encountered by industry, LGUs, and communities be identified and used as bases for student research and thesis topics;
- support academics, in terms of **budgetary support**, to ensure that the quality of academic research will not be compromised.

Source: Office of the Chairperson, Department of Civil Engineering, Polytechnic University of the Philippines. A LEADING CAMPUS IN ASIA. POLYTECHNIC UNIVERSITY IN ASIA.

POLYTECHNIC UNIVERSITY OF THE PHILIPPINES
OFFICE OF THE CHAIRPERSON

research partnerships should extend beyond internship and include faculty-led and student-assisted research undertakings.

He also pointed out a concern regarding **graduate school admissions**, particularly in bachelor or advanced programs, where some entries may have undergraduate degrees that are not aligned with their intended field of specialization. He noted that this trend appears to be increasing and may require closer institutional monitoring.

Student Representative's Remarks
Dr. Tishan S. Sayon, representing the students, commented that the Department may first need to assess the outcomes of the **2022 curriculum**, particularly because internships under that curriculum is already mandated to be aligned with specializations. He noted that:

- the first graduates under the 2022 curriculum may provide a more valid basis for evaluating whether specialization-aligned internships and curricular design are producing the intended outcomes;
- the Department should be careful not to move too quickly toward making the curriculum again without first sufficiently assessing the effects of the 2022 curriculum implementation.

He also observed that:

- once students enter the program without full certainty regarding their career direction;
- the qualifying examinations, entrance examinations, and entry course support systems may help students assess sooner whether the program is appropriate for them.

Discussion on Specialization-Based Assessment
An additional portion of the consultation focused on how the Department should assess students and graduates, especially with the emergence of specialization tracks.

Engr. Rosales raised the concern that:

- while civil engineering fields have common competencies, each specialization also requires **distinct skill sets**;
- assessment methods should not result in a generic if the program intends to produce graduates with specialization-based competencies;
- industry, as the eventual employer and end user of graduates, should have a stronger voice in identifying performance indicators used to evaluate what the students have achieved the intended outcomes.

In response, Engr. Kenneth Bryan M. Tavares explained that:

- the current thesis study format and some of the assessment requirements are guided by **CHED** and institutional benchmarks;
- the Department cannot depart entirely from academic standards and the **Washington Accord-based outcome framework**;
- however, the Department recognizes the need to develop mechanisms that will allow it to assess specialization-based outcomes, and better prepare students before deployment to actual field practice.

Engr. Rosales then suggested that a more balanced model be considered, such as:

- a **blended assessment approach** using both academic and industry criteria, possibly with a weighting system, such as 50/50 or 60/40, depending on what is appropriate and feasible.

Source: Office of the Chairperson, Department of Civil Engineering, Polytechnic University of the Philippines. A LEADING CAMPUS IN ASIA. POLYTECHNIC UNIVERSITY IN ASIA.

CRITERION 8 PROGRAM LINKAGES

POLYTECHNIC UNIVERSITY OF THE PHILIPPINES
OFFICE OF THE CHAIRPERSON

The discussion recognized that the **AIAC** itself is still in a relatively early stage of development and that stronger collaboration between academia and industry will be needed to refine an assessment model that is both academically complex and professionally relevant.

Remarks from Engr. Tishan S. Sayon (Construction Engineering and Management)
Engr. Sayon sought clarification on whether the immediate focus of the Board's consultation should be on the 2022 curriculum or on the proposed 2024 curriculum, noting that external stakeholders would need enough lead time to coordinate their schedules and participation.

She also shared the following observations:

- many employed graduates today exhibit different workplace culture, attitude, and approaches to work compared with previous cohorts;
- these differences may be influenced not only by curriculum, but also by prevailing socio-economic conditions and generational changes;
- programs cannot solely focus on technical skills but also soft skills, work attitude, communication, adaptability, and professional behavior.

She further raised concerns regarding increasing **dependency on artificial intelligence (AI)** and noted that courses dependent on AI tools may affect students' **critical thinking** and **independent problem-solving skills**.

General Recommendations Consolidated from the Stakeholders
As the conclusion of the consultation, the following general recommendations were derived from the discussion:

- improve the graduate's **core skills** by including:
 - classification of employment;
 - local or overseas employment;
 - self-employment data;
 - industry alignment; and
 - specialization alignment;
- strengthen student exposure to:
 - fieldwork;
 - laboratory practice;
 - community immersion and real-world engineering problems;
- align research thesis and internship activities with actual concerns of:
 - industry;
 - local government units; and
 - communities;
- explore stronger partnerships for:
 - credentialing;
 - micro-credentials;
 - long-term mentorships;
 - research collaboration; and
 - mutual career brand exposure;
- develop a more **specialization-sensitive** and **industry-informed** assessment framework.

Source: Office of the Chairperson, Department of Civil Engineering, Polytechnic University of the Philippines. A LEADING CAMPUS IN ASIA. POLYTECHNIC UNIVERSITY IN ASIA.

POLYTECHNIC UNIVERSITY OF THE PHILIPPINES
OFFICE OF THE CHAIRPERSON

continue evaluating the outcomes of the **2022 curriculum** while preparing carefully and systematically for the **2024 curriculum** review;

- give greater attention to the formation of:
 - critical thinking;
 - engineering judgment;
 - creativity;
 - professional maturity; and
 - responsible use of AI and other emerging tools.

4.3 Other Matters
Other Office Members, Engr. Kenneth Bryan M. Tavares presented additional concerns and upcoming activities relevant to the Department's quality assurance and support systems. The following were noted:

- AMCCP Level IV Re-Accreditation, 2nd Cycle**
The Department informed the Board of its upcoming **AMCCP Level IV Re-Accreditation, 2nd Cycle**, scheduled on November 13, 2024.
- Search for Accreditation**
The areas identified for evaluation include:
 - Performance of Graduates
 - Research
 - Extension
 - Internationalization
 - Quality Assurance
- Support and Development Initiatives**
The presentation also referenced related support and development mechanisms, including the role of the **PEP Civil Engineering Alumni Association**.

These matters were presented as part of the Department's broader effort to strengthen institutional support, improve coordination, and modernize selected administrative and academic processes.

5. Summary
The meeting served as a significant consultative forum between the Department of Civil Engineering and its Government Industry Advisory Board. Through the discussion, the Board was updated on the Department's current institutional condition, accreditation readiness, curriculum review process, and ongoing quality assurance initiatives.

The consultation also produced important stakeholder insights regarding:

- improvement of graduate assessment tools;
- alignment of curriculum with industry and government needs;
- strengthening of field exposure and community-based learning;
- research collaboration;
- specialization-sensitive assessment; and
- the development of both technical and non-technical competencies among students.

Overall, the discussion reinforced the Department's continuing commitment to **continuous, based education, continuous quality improvement, stakeholder participation, and the sustained enhancement of the PEP Civil Engineering program**.

Figure 8.3 Minutes of the Second Government Industry Advisory Board Meeting

2. Describe faculty/student-industry exposure through internships, industry visits, collaborative projects under professionals in industry, and industry-based final year projects.

Internship/OJT

For the internship program, a Memorandum of Agreement (MOA) between the Polytechnic University of the Philippines and the industry partner is forged before the deployment of the BSCE students. The MOA covers the responsibilities between the parties and the duration of the activity.

The On-the-Job Training (OJT) and Internship Program of the Bachelor of Science in Civil Engineering Management (BSCE) program of the Polytechnic University of the Philippines (PUP) is a cornerstone of the department's commitment to providing industry-aligned, experiential learning to its students. This initiative is developed in close adherence to the University's vision, by forging strong and sustainable partnerships with government agencies, private companies, construction-related authorities within the sector.

As part of the University's thrust to continuously produce highly competent civil engineering professionals, the Department of Civil Engineering strategically identifies, evaluates, and partners with companies and institutions that are directly aligned with the civil engineering industry. The department ensures that internship opportunities are relevant and contribute meaningfully to students' development to the academic and professional growth of the students.

To this end, a wide range of Memoranda of Agreement (MOAs) have been signed between PUP and various institutions. These partnerships are not merely transactional but are strategic and transformative, with the intention of mutual benefit and long-term collaboration. The MOAs typically include provisions for student supervision, industry orientation, mentoring by field experts, and project involvement that immerses students in real-world civil engineering processes. (Attachment C8-02 – [OJT MOAs](#))

CRITERION 8
PROGRAM LINKAGES

CRITERION 8
PROGRAM LINKAGES

CRITERION B PROGRAM LINKAGES

CRITERION B PROGRAM LINKAGES

Figure 8.4 OJT MOA between PUP and Alstom Transport Philippines, Inc.

The Internship Program is carefully integrated into the BSCE curriculum, designed to immerse students in actual work environments where they can apply their theoretical knowledge, develop technical and managerial skills, and gain exposure to the complexities of the civil engineering sector. Students are deployed to partner institutions based on their career interests and areas of specialization, ensuring a match between academic learning and professional practice. Each internship engagement is meticulously documented and assessed, and student performance is monitored through activity logs, progress reports, evaluation forms from the host company, and a culminating OJT report through their OJT Portfolio. The department assigns faculty coordinators to monitor student placements and ensure that the internship experiences align with the program's learning outcomes and industry standards.

The department's proactive linkage-building efforts are further enhanced by its active participation in industry forums, national conferences, and technical working groups, thereby keeping the BSCE curriculum relevant and responsive to industry needs. These linkages also provide rich opportunities for knowledge exchange, collaborative research, technical training, faculty immersion, and possible employment pipelines for graduates.

The OJT and Internship Program of the BS Civil Engineering program of PUP is a vibrant expression of the University's linkage and consorti strategy. It is instrumental in bridging the gap between academia and the industry, providing real-world learning experiences that are essential to the holistic development of civil engineers. This strong collaboration with the government and private sector ultimately enhances the quality of instruction, strengthens the institutional reputation of the University, and contributes to the national goal of developing a reliable and efficient railway system for the Philippines.

The OJT and Internship Program is structured into two phases to ensure the progressive development of students' knowledge, technical competencies, and professional skills throughout the Civil Engineering curriculum.

On-the-Job Training 1 (OJT 1) is offered during the Summer Term of the third year and consists of 300 hours of supervised industry exposure. Students may complete this training in any organization or company where they can gain relevant workplace experience and develop fundamental professional skills, work ethics, and practical understanding of engineering operations. This phase serves as the students' initial immersion into the professional environment, allowing them to apply classroom concepts while adapting to industry standards and organizational practices.

Following this, On-the-Job Training 2 (OJT 2) is conducted during the second semester of the fourth year and requires 200 hours of internship in a company or institution aligned with the student's chosen area of specialization within Civil Engineering. This specialized training enables students to gain deeper technical exposure, perform discipline-specific tasks, and develop competencies directly related to their intended career path.

The current placement of these internship courses was established following discussions during a General Instructional Affairs Board (GIAB) meeting, wherein it was recognized that second-year students were not yet adequately prepared for industry immersion due to their limited technical foundation and professional readiness. Consequently, OJT 1 was positioned after the completion of the third year to ensure that students possess sufficient academic preparation before entering the workplace, while OJT 2 was scheduled during the latter part of the fourth year to provide a more specialized and career-oriented internship experience after students have completed most of their major Civil Engineering courses. Figure 8.5 shows the interns participated in immersive learning activities, actual training and site visits. These experiences aim to enhance practical skills and bridge academic knowledge with real-world industry practices.

Figure 8.5 Students during their OJT

The Bachelor of Science in Civil Engineering (BSCE) program of the Polytechnic University of the Philippines (PUP) has established a robust and enduring linkage with key players in the Philippine construction industry. These strategic partnerships are formalized through Memoranda of Agreement (MOAs), which reflect a shared commitment to advancing railway education and developing future-ready civil engineering professionals who are responsive to the evolving demands of the construction sector.

The department's industry partners include major public and private sector organizations that play pivotal roles in the planning, construction, operation, and management of the construction industry in the country. These include:

Table 8.1 List of Industry Partners

NO.	COMPANY NAME	SPECIALIZATION	VALIDITY
1	A-Link Communication Group Inc.	Structural Engineering	2026
2	A.C.Ong Consulting Inc.	Structural Engineering	2026
3	Aboitiz Construction, Inc.	Structural Engineering/ Construction Engineering and Management	2027
4	AC Development Corporation	Structural Engineering	2026
5	Attollo Construction Development Corporation	Structural Engineering	2026

6	AZVERCONS Philippines Inc.	Structural Engineering	2026
7	Baseline Construction Corporation	Structural Engineering/ Construction Engineering and Management	2026
8	Cañete Structural Investigation	Structural Engineering	2026
9	Chua + Bulao Design Partners Co.	Structural Engineering/ Construction Engineering and Management	2026
10	Colouredge Construction Corporation	Construction Engineering and Management	2026
11	Core Land Specialist and Development Corporation	Construction Engineering and Management	2026
12	CWC International Corporation	Structural Engineering	2026
13	D.M Consunji Inc.	Structural Engineering/ Construction Engineering and Management	2026
14	DATEM Inc.	Structural Engineering/ Construction Engineering and Management	2026
15	Devex Inc.	Structural Engineering	2026
16	DMCI Homes	Structural Engineering/ Construction Engineering and Management	2026
17	Dominic Construction Inc.	Construction Engineering and Management	2026
18	Dsvicencio Engineering Consultancy	Construction Engineering and Management	2029
19	E.B. Balisacan Consulting Engineers	Construction Engineering and Management	2026
20	ELS Consultancy and Management Inc.	Construction Engineering and Management	2026
21	Engineering and Development Corporation of the Philippines (EDCOP)	Structural Engineering/ Construction Engineering and Management	2028
22	ESCA Engineering	Structural Engineering/ Construction Engineering and Management	2026
23	EV Sinogba Consulting Engineers	Structural Engineering	2026
24	FCELH BUILDERS AND CONSTRUCTION INC	Construction Engineering and Management	2026
25	Firmbuilders, Inc.	Construction Engineering and Management	2027
26	G.E.Ohana	Construction Engineering	2026

	Construction Inc.	and Management	
27	Idea Y Lote Project Developers Inc.	Structural Engineering	2026
28	JJM Construction Co. Inc.	Construction Engineering and Management	2026
29	Luares archeng	Structural Engineering	2026
30	Macgraf Engineering and Construction	Construction Engineering and Management	2026
31	Madriaga Systems Supplies and General Services Inc.	Structural Engineering	2026
33	Makati Development Corporation	Construction Engineering and Management	2026
34	Martija Construction Management Services	Construction Engineering and Management	2026
35	Metriccon Co., Inc	Construction Engineering and Management	2026
36	MUNDO DESIGN + BUILD	Construction Engineering and Management	2026
37	New San Jose Builders Inc.	Construction Engineering and Management	2026
39	Parpad Builders Inc.	Construction Engineering and Management	2026
40	Philkoei International Inc.	Construction Engineering and Management	2026
41	Prima Solution Development and Construction Corp.	Construction Engineering and Management	2029
42	RCH Sanlo Construction and Trading Corp.	Construction Engineering and Management	2026
43	RMM Brickstone Corporation	Construction Engineering and Management	2028
44	RX Construction Management	Structural Engineering	2026
45	Scheirman Construction Consolidated Inc	Structural Engineering	2026
46	Seven Peaks Design and Build Inc.	Structural Engineering	2028
47	SIEM Construction Management and Services	Construction Engineering and Management	2026
48	SMDI Consultants, Inc.	Structural Engineering	2026
49	Sumitomo Mitsui Construction Co., Ltd.	Construction Engineering and Management	2026
50	Tokyu, Tobishima, Megawide Joint Venture	Structural Engineering	2026
51	Westchester Realty Corporation	Structural Engineering	2026

52	Will Decena & Associates, Inc.	Structural Engineering	2026
53	Woodfields Consultants Inc.	Structural Engineering	2026
54	Zabat Builders Constrak Inc.	Construction Engineering and Management	2026
55	ALMEC Sustainable Urban Development and Mobility (ASUDMM) Corp.	Transportation Engineering	2029
56	Department of Transportation	Transportation Engineering	2026
57	DPWH- NCR South Manila District Engineering Office	Transportation Engineering	2028
58	DPWH Bulacan 1st District Engineer Office	Transportation Engineering	2027
59	DPWH Central Office	Transportation Engineering	2026
60	Metropolitan Manila Development Authority (MMDA)	Transportation Engineering	2028
62	National Center for Transportation Studies - University of the Philippines Diliman	Transportation Engineering	2026
63	Oriental Consultants Philippines, Inc. (OCP)	Transportation Engineering	2026
64	Palafox Associates	Construction Engineering and Management	2026
65	QC Department of Engineering	Transportation Engineering/ Construction Engineering and Management	2026
66	RPMH IT and Engineering Services	Transportation Engineering	2026
67	UP National Center for Transportation Studies — UP Diliman, Quezon City	Transportation Engineering	2026
68	University of the Philippines - National Center for Transportation Studies (UP - NCTS)	Transportation Engineering	2026
69	ACCUGEO Construction Material Testing Center	Geotechnical Engineering	2026
70	Active Geoengineering Consultancy	Geotechnical Engineering	2026
71	ASTEC Materials Testing Corporation	Geotechnical Engineering	2026

72	AVM Engineering Geotechnical & Materials Testing Services	Geotechnical Engineering	2026
73	Arizona Geosynthetics	Geotechnical Engineering	2026
74	JDB Geotechnical and Materials Testing Co.	Geotechnical Engineering	2027
75	MJ Cañete Structural Engineering Consultancy	Geotechnical Engineering	2026
76	PAR Geotechnical Testing Cente	Geotechnical Engineering	2026
77	Local Water Utilities Administration	Water Resources Engineering	2026
78	Maynilad Water Services, Inc.	Water Resources Engineering	2026
79	Total Water Solution Inc.	Water Resources Engineering	2026
80	DCCD Engineering Corporation	Construction Engineering and Management	2026
81	DDT Konstruct Inc.	Construction Engineering and Management	2026
82	DEPW Materials Testing and Control Division	Construction Engineering and Management	2026
83	PUP CEA - Research and Extention Office	Construction Engineering and Management	2026
84	City Government of Antipolo Office of Public Safety and Security (OPSS)	Government/Mixed	2026
85	City of Mandaluyong Engineering Department	Government/Mixed	2026
86	Municipality of Binangonan Engineering Department	Government/Mixed	2028
87	OFFICE OF PUBLIC SAFETY & SECURITY (OPSS)	Government/Mixed	2026

These organizations are not only at the forefront of the country's construction modernization and infrastructure development initiatives but also serve as active partners in the implementation of the BSCE program's On-the-Job Training (OJT), internship, and curricular development components.

Strong linkages with the construction industry are a cornerstone of the BSCE Department's strategy to ensure the academic relevance and industry alignment of the program. These partnerships provide several tangible benefits to the department, including:

- Curriculum enhancement through real-time feedback from industry practitioners and alignment with current technologies, systems, and regulatory frameworks.
- Access to professional networks, allowing the department to invite resource speakers, conduct plant visits, and hold seminars or technical workshops with experts in the field.
- Opportunities for collaborative research, faculty immersion, and participation in national infrastructure planning efforts, further establishing the University's role in national development.
- Quality assurance and accreditation support, as the existence of strong linkages demonstrates institutional commitment to relevance, employability, and sustainability.

For students, the linkage provides unparalleled opportunities for experiential learning. Through internships and OJT in industry partner companies, students are able to apply theoretical knowledge to real-world projects and operations and gain technical and managerial experience across various facets of railway engineering, including operations management, systems integration, signaling, track design, rolling stock, and project implementation. These experiences build professional competence and industry readiness, increase students' chances of employment and career advancement upon graduation, develop soft skills such as teamwork, communication, and problem-solving, and help students understand industry practices, standards, and safety regulations.

These immersive experiences not only strengthen the competencies of BSCE students but also contribute to nation-building by producing graduates who are equipped to take part in the ongoing development and modernization of the country's mass transportation systems.

The strong linkage between the BSCE Department of PUP and the different organizations within the construction industry exemplifies the University's commitment to bridging academic instruction with industry practice. These collaborations ensure that the BSCE program remains responsive, competitive, and instrumental in producing professionals capable of contributing to a safe, efficient, and sustainable railway system for the Philippines. Through these partnerships, the Department fulfills its mission of cultivating skilled civil engineers and managers who can lead the country's transport future.

OJT MOA Processing Procedure

The Memorandum of Agreement (MOA) Processing Procedure serves as a standardized guide for Civil Engineering students undertaking their On-the-Job Training (OJT), ensuring that all required documents are properly prepared, reviewed, approved, and finalized before the internship begins. The process starts with the preparation of the MOA using the University-prescribed template, together with the submission of the necessary company requirements, including the SEC Registration or Business Permit and the names of the authorized company signatories. Students are also required to email the completed MOA to the designated OJT email address following the prescribed subject format and submit the required tracking information for proper documentation.

Upon submission, the MOA undergoes a legal review facilitated by the OJT Coordinator, who endorses the document to the University Legal Office for evaluation. This review process, which typically takes three to five weeks, ensures that the agreement complies with University policies and legal standards. If approved, students are instructed to print eight copies of the MOA for endorsement and signature by the Office of the Chairperson, the Dean, and the Office of the Vice President for Academic Affairs (OVPA). Should revisions be required, the MOA is returned to the partner company for the necessary corrections before being resubmitted through the original email thread for efficient tracking.

The final stage involves the notarization of the fully signed MOA and the submission of six notarized copies to the OJT Coordinator, while one copy is retained by the student and another by the partner company. This systematic procedure promotes accountability, efficient document management, and compliance with institutional requirements, ensuring that the partnership between the University and the Host Training Establishment (HTE) is formally established before the commencement of the internship program.

Table 8.2 List of Companies for OJT, AY 2022-2023

COMPANY NAME	COMPANY ADDRESS
6X6 Builders X Arkisens Workshop	91 E. Manalo Avenue, Santo Niño, Marikina City, 1800 Metro Manila
Angel Lazaro and Associates International	LL Building, 160 Panay Avenue corner EDSA, Quezon City, 1103 Metro Manila
ANTA Construction Corporation	Unit 1404, Cityland Shaw Tower, Shaw Blvd. cor. St. Francis St., Mandaluyong City
Archstar Builders and Construction Corporation	2nd Floor, Archstar Bldg., 154-A Congressional Ave., Quezon City
ARS Testing & Inspection, Inc.	2770 Lupin II Bldg., Faraday cor. P. Binay St., Makati City, Metro Manila

Asia Structural Developer Corp.	Alco Building, 391 Sen. Gil J. Puyat Ave., Makati City, 1209 Metro Manila
AXXIS Construction and Development Corp.	Penthouse, West Tower, PSE Centre, Exchange Road, Ortigas Center, Pasig City
Bright Homes & Realty Corporation	100-A Speaker Perez St. cor. Alcaraz St., Brgy. Maharlika, Quezon City
Caspar Steel (Roofing) Inc.	Blk 4 Lot 11 Citizen St., Interville, Quezon City, Metro Manila
CHMI Land Inc	UGF A101, SM City Bicutan, Doña Soledad Ave., Brgy. Don Bosco, Parañaque City
City Government of Paranaque	Parañaque City Hall, Dr. A. Santos Avenue corner F.B. Harrison St., Parañaque City
Cuervo Appraisers, Inc.	2nd Floor, Padilla Building, F. Ortigas Jr. Road, Ortigas Center, Pasig City
Dawel Enterprises	Dawel, Dagupan City, Pangasinan (Main Operations)
Department of Public Works and Highways Quezon	DPWH Quezon Field Office (District Engineering Offices in Lucena, Lucban, or Catanauan)
Department of Public Works and Highways Roads Management Cluster 1 (Bilateral) - Unified Project Management Office	DPWH Central Office, Bonifacio Drive, Port Area, Manila
Department of Public Works and Highways, Unified Project Management Office-Flood Control Management Cluster (UPMO-FCMC)	DPWH Central Office, Bonifacio Drive, Port Area, Manila
Department of the Interior Local Government - Occidental Mindoro	Provincial Office, Brgy. Pag-AO, Mamburao, Occidental Mindoro
Design R' Us	Unit 201, Greenrich Mansion, Pearl Drive cor. Lourdes St., Ortigas Center, Pasig City
Destonetworks Company	Brgy. Bagong Ilog, Pasig City, Metro Manila
DGR Rebar Estimating & Detailing Services	Unit 1005, Antel Global Corporate Center, Julia Vargas Ave., Ortigas Center, Pasig City
DGRA Construction	P. Canlapan St., Brgy. 10, Batangas City, Batangas
DMCasteel Construction Corporation	Lot 5 & 7, Blk 2, Golden Mile Business Park, Brgy. Maduya, Carmona, Cavite
DPWH - 2nd District La Union	DPWH 2nd District Engineering Office, Lucap, San Fernando City, La Union

DPWH - Camarines Norte District Engineering Office	DPWH Camarines Norte DEO, Daet, Camarines Norte
DPWH - NCR	DPWH Bldg., 2nd St., Port Area, Manila
DPWH - Occidental Mindoro	DPWH Occidental Mindoro District Office, Mamburao, Occidental Mindoro
DPWH - Pangasinan 2 nd District Engineering Office	DPWH 2nd DEO Pangasinan, Dagupan City, Pangasinan
DPWH - RMC - II (Multilateral) - UPMO	DPWH Central Office, Bonifacio Drive, Port Area, Manila
DPWH Malabon-Navotas District Engineering Office	C-4 Road, Brgy. Bagumbayan North, Navotas City
Dragon's Deck Engineering Construction Corp.	Unit 302, SOL Office Condominium, 112 Amorsolo St., Legaspi Village, Makati City
Drilon & Doctor Construction Co.	108 G.P. Drilon Bldg., Rizal St., Iloilo City, Iloilo
E.C. Paz & Associates	4th Floor, IBP Building, 15 Doña Julia Vargas Avenue, Ortigas Center, Pasig City
E.M. Callueng Construction	Brgy. Caritan Centro, Tuguegarao City, Cagayan
ECONTRACT CO.	Unit 4-C2, 4F 100 C. Palanca cor. Dela Rosa St., Legaspi Village, Makati City
EDLAND NELL Corporation	102 J.P. Rizal St., Brgy. Milagrosa, Project 4, Quezon City
EEI Corporate MMSP-Subway Project	MMSP Project Office, Valenzuela Depot, Brgy. Ugong, Valenzuela City
EEI Corporation	#3 Economia Street, Bagumbayan, Quezon City, 1110 Metro Manila
Eirish Builders & Supply Inc.	242 Gulod Maguinao, San Rafael, Bulacan
Esicor Incorporated	141 20th Avenue corner Don Jose, Cubao, Quezon City
EV Sinogba Consulting Engineers	3rd Floor, The Skylight Center, 314 Santolan Road, San Juan City
Federal Builders Incorporated	20th Floor, GT Tower International, 6813 Ayala Ave. cor. H.V. Dela Costa St., Makati City
G.M. Maningas Construction Inc.	33 Kayumanggi Street, Mandaluyong City, Metro Manila
Geoinnovative Specialist Inc.	Geoinnovative Compound, Lot 6111-G, Maguey Road, Sitio Radar, Antipolo, Rizal
Holcim Philippines, Inc.	7th Floor, Two World Square, McKinley Hill, Fort Bonifacio, Taguig City

House of Representatives, Quezon City District Office	Quezon City Hall Compound, Elliptical Road, Diliman, Quezon City
J.C. Rodriguez Construction Corporation	JCR Compound, 167 J.P. Rizal St., Rodriguez (Montalban), Rizal
J.V. Rondilla Construction	293 Tres de Abril St., Cebu City, Cebu
JCBL Construction Finishing Services	123-B Congressional Avenue, Brgy. Bahay Toro, Quezon City
JCDC KONSTRUKT	292 D. Tuazon Street, 1115 Quezon City
JS Konstrukt Specialist Inc.	#423 JS Contractor Building, Magallanes St., Intramuros, Manila
JT Chua Construction Inc.	L20 B1 Employees Housing 1, 1607 Jenny's Ave., Pasig City
Konstruktura Centro Inc	#700 Road 1, near Tandang Sora cor. Commonwealth Ave., Quezon City
LGU - Looc, Romblon	Municipal Hall, Poblacion, Looc, Romblon
LGU - Mangatarem	Municipal Hall, Poblacion, Mangatarem, Pangasinan
LGU San Ildefonso Bulacan	Municipal Hall, Maharlika Highway, San Ildefonso, Bulacan
Light Rail Transit Authority	LRTA Compound, Marcos Highway, Santolan, Pasig City
M.E Sicat Construction Inc	2nd Floor, Megastate Bldg., 737 Agno St. cor. G. Araneta Ave., Quezon City
Martija Construction Management Services	Unit 501, Cityland Herrera Tower, V.A. Rufino cor. Valero St., Makati City
MCD Mayumi Construction and Development Corp.	21 Mayumi St., Brgy. San Vicente, Diliman, Quezon City
Megawide Construction Corporation	20 N. Domingo St., Brgy. Valencia, Quezon City
Melham Construction Corporation	104-B G. Roxas St., Brgy. Manresa, Quezon City
Mevbuilt Inc.	Unit 402, Page 1 Bldg., 1215 Acacia Ave., Madrigal Business Park, Alabang, Muntinlupa
Millenium Erectors Corporation	2nd Floor, MEC Building, 107 Maginhawa St., Teachers Village, Quezon City
Molina's General Builders	Brgy. Malhacan, Meycauayan City, Bulacan
MPTC Construction and Engineering Services	10th Floor, MGO Building, Legaspi cor. Dela Rosa St., Legaspi Village, Makati City
Municipal Government of Nasugbu	Municipal Hall, Escalera St., Brgy. Poblacion, Nasugbu, Batangas

Municipal Government-Casiguran (Municipal Engineering Office)	Municipal Engineering Office, Brgy. 4, Casiguran, Aurora
Municipal Government-San Miguel (Municipal Engineering Office)	Municipal Engineering Office, Municipal Hall, San Miguel, Bulacan
Municipality of Calatagan	Municipal Hall, Ayala St., Brgy. Poblacion 2, Calatagan, Batangas
MXChua Consultancy Corporation	Unit 1506, Cityland Herrera Tower, V.A. Rufino cor. Valero St., Makati City
National Irrigation Administration	NIA Building, EDSA, Diliman, Quezon City
National Irrigation Administration- Bulacan IMO	NIA-Bulacan Irrigation Management Office, Brgy. Tambubong, San Rafael, Bulacan
Office of the Army Chief Engineer	OTACE, Philippine Army, Fort Bonifacio, Taguig City, Metro Manila
OHM Winning 7 Corporation	Unit 302, 3rd Floor, SRK Bldg., 79-A Congressional Ave., Quezon City
Olongapo City Engineering Department	Olongapo City Hall, Rizal Ave., West Bajac- Bajac, Olongapo City
Onegray Builders and Construction Supply Inc.	#10 P. Bernardo St., Brgy. San Roque, Cubao, Quezon City
Ovaldesk Inc.	11th Floor, KMC Solutions, SM Aura Office Tower, BGC, Taguig City
P.B Tolop Construction Inc.	#43 J.P. Laurel St., Tanauan City, Batangas
PhilGlobal Asia Industrial Corporation	Unit 1002, Medical Plaza Ortigas, San Miguel Ave., Pasig City
Precision Materials and Testing Corporation	#51 Mo. Ignacia St., Brgy. Paligsahan, Quezon City
Provincial Government of Quirino	Provincial Capitol, Cabarroguis, Quirino
Provincial Government of Zambales	Provincial Capitol Building, Iba, Zambales
Quantity Solutions Inc.	Unit 1205, 139 Corporate Center, Valero St., Salcedo Village, Makati City
Quezon City Engineering Department	5th-8th Flrs, Civic Center Bldg. B, QC Hall Compound, Diliman, Quezon City
R.G. Simbulan and Partners Corp.	2nd Floor, RGS Building, 107 Maginhawa St., Teachers Village, Quezon City
RAE Estate Builders Corp.	Unit 401, Alpap II Bldg., Trade St. cor. Investment Dr., Madrigal Business Park, Alabang
RDN Enterprises	#123 Macabulos Drive, Brgy. San Vicente, Tarlac City, Tarlac

Rematech Engineering	#45 Scout Madriñan St., South Triangle, Quezon City
Ricaro's Builders	Lot 1, Blk 4, Phase 2, Golden City Subd., Brgy. Dila, Sta. Rosa, Laguna
SBA & Associates Plumbing Co.	#72 West Point St., Cubao, Quezon City, Metro Manila
Scale CM & Builders Inc.	Unit 905, Corporate 145 Bldg., 145 Mother Ignacia Ave., Quezon City
Showcase Display Concepts Inc.	#12 Calle Obrero St., Brgy. Bagumbayan, Quezon City
TOTAL	92 Companies

Mundo Builders	125 Pioneer St., Mandaluyong City
NADZCORP	116 Matahimik St., UP Village, Quezon City
Polintan-Abay	15 Emerald St., Millionaires Village, San Agustin, San Fernando, Pampanga
RMM Bricks	Maharlika Highway, Diversion Road, Cabanatuan City
RN Ferrer & Assoc.	5/F Padilla Bldg., F. Ortigas Jr. Rd., Ortigas Center, Pasig
Seven Peaks	Unit 1002, Medical Plaza Ortigas, San Miguel Ave., Pasig
SMDI Consultants	5/F Westar Bldg., 611 Shaw Blvd., Pasig City
Starke Phil	11F SM Aura Tower, McKinley Pkwy, BGC, Taguig
TMCC, Inc.	2/F T.M. Kalaw Center, 667 T.M. Kalaw St., Ermita, Manila
Topway Builders	77 11th Ave, Brgy. Socorro, Cubao, Quezon City
Tritech Management	12F Strata 100 Bldg., F. Ortigas Jr. Rd., Ortigas Center, Pasig
Will Decena	31-A 4th Avenue, Bagong Lipunan ng Crame, Quezon City
TOTAL	39 Companies

The process of planning a Program Advisory Board involves several steps that can lead to tangible results for both the industry and the BSCE Program. The first step is to identify stakeholders from the industry and school who can provide valuable insights and feedback on the BSCE curriculum, philosophy and objectives, student outcomes, OBTLF, and industry needs, among others. Once identified, invitation letters are sent to the identified representatives. Upon their acceptance, a meeting is scheduled to formally orient the PAB on its purpose, duties and responsibilities, and operating procedures of the board. This provides clarity and structure for the board members and helps to ensure that everyone is working towards the same goals. Regular meetings are conducted to discuss relevant issues and

gather feedback. The recommendations made by the PAB resulted in tangible outputs beneficial for both the industry and the program. For example, their inputs were integrated with the new curriculum. This ensures that students are prepared for current industry needs.

Lastly, industry partners are invited as guest lecturers in the BSCE program. Through this, they provide students with valuable insights into current trends, challenges, and best practices in their respective fields. This helps to narrow the gap between academia and industry and provides students with a more practical understanding of how their skills and knowledge can be applied in real-world settings. Guest lecturers provide students with valuable networking opportunities. Students ask questions, seek advice, and make connections that could potentially lead to internships, job opportunities, or other collaborations. Guest lecturers provide students with hands-on training in specific skills or tools that are used in the industry. This helps to ensure that students are better prepared for the workforce and have a competitive edge when it comes to job applications.

PYLON Convention

The PYLON Convention is an academic and professional development event organized by the Department of Civil Engineering for fourth-year Civil Engineering students. Anchored on the University's Outcomes-Based Education (OBE) framework, the convention serves as a venue for students to strengthen their technical competencies, broaden their understanding of the civil engineering profession, and prepare for their transition into professional practice.

Core Objectives

- **Industry Exposure:** Provides students with insights into current trends, challenges, innovations, and emerging technologies in civil engineering through symposia, technical lectures, and interactions with industry experts.
- **Professional and Career Development:** Offers career talks, industry engagement activities, and networking opportunities with professionals, alumni, government agencies, and private companies to help students navigate their future careers.
- **Specialization Awareness:** Deepens students' understanding of the major fields of civil engineering, enabling them to appreciate the diverse opportunities and applications within the profession.
- **Licensure and Professional Preparation:** Equips graduating students with practical insights, professional guidance, and motivation as they prepare for the Civil Engineering Licensure Examination and future employment.

- **Industry-Academe Collaboration:** Strengthens partnerships between the university and industry stakeholders through knowledge-sharing, collaboration, and professional engagement activities.

The event typically brings together graduating Civil Engineering students, faculty members, alumni, industry practitioners, and partner organizations through a series of Symposia, Career Talks, and Industry Expos designed to promote lifelong learning, professional excellence, and career readiness.

Figure 8.6 Pylon Convention 2024 and 2025

Table 8.5 List of Activity with Industry Guest Lecturers (2022-2025)

NO.	NAME OF EVENT	INVITED GUEST LECTURER/INDUSTRY	DATE AND VENUE
1	Professional Chairholder Lecture Series 2026	Prof. Marla C. Maniquiz - Redillas, Ph.D. Mr. Jayson P. Rogelio, Ph.D. Mr. Albert Causo, Ph.D Prof. Argel A. Bandala, Ph.D	April 17, 2026 at PUP Bulwagang Bonifacio and via Facebook Live
2	XSTRUCTURES'Free Demonstration and Training for PUP Faculty and Students	XSTRUCTURES Engineering Consultants	March 14, 2026 at CEA Room 211
3	DPWH Campus Job Fair	DPWH Secretary, Vivencio B. Dizon OIC-Undersecretary for DPWH Technical Services, Lara Marisse I. Esquibil	March 12, 2026 at PUP Bulwagang Balagtas
4	RelaxCEssion: Dear Primo Season 3	Engr. Kevin Lester Mabalay	February 28, 2026 via MS Teams
5	The Data Blueprint: Statistics in Engineering Research	Dr. Florante Poso Jr.	February 26, 2026 via MS Teams
6	AggreThink 2026: PILLARS—Stronger Foundations, Greater Heights	Engr. Kent Bryan D. Lontok Engr. Patrick Capillan Engr. Paul Allen Patriarca	February 14, 2026, PUP Bulwagang Bonifacio
7	Special Aggreview Session with GERTC	Gillesania Engineering Review and Training Center	February 5, 2026 via Zoom Meeting
8	PICE sa Kalye Year 3	PICEPUP-SC MEMBERS	December 18, 2025 at Streets in Sta. Mesa, Manila
9	KATSTROPICE ASSEMBLY 2025: Forging EYEKONIC Foundation	Engr. Joshua Ferdinand Villafuerte, SO2 Engr. Michael Marvin "Machan" Buenafe	December 10, 2025 at PUP Main Claro M. Recto Hall
10	Crash Course on Site Management	Winchester Skills Bridge	November 13, 2025 via Zoom Meeting
11	MIDAS Software Training	MIDAS PHILIPPINES	October 20, 2025 at CEA Room 211
12	TagumPICE 2025: The PICE-PUPSC's 39th Proclamation & Turnover Ceremony	Hon. Ronald V. Laurel Engr. Russel Angelo Toribio Engr. Frederick Francis M. Sison Engr. Russel Mae Hernandez	September 6, 2025 at Claro M. Recto Hall, PUP Main

13	Professional Chairholder Lecture Series 2025	Prof. Marla C. Maniquiz-Redillas, Ph.D.	September 3, 2025 at PUP Bulwagang Balagtas and via Facebook Live
14	Professional Chairholder Lecture Series 2025	Dr. Joel V. Mangahas	August 8, 2025 via Zoom Meeting and Facebook Live
15	PYLON Convention 2025	Engr. Lorenzo Galicia Engr. Kenneth Bryan M. Tana Engr. Ariel Santos Ms. Babykay Abdon Engr. Alyssa Joy Finca Engr. Rucel Britanico Virata Engr. Abner Bondoc Engr. Paul Allen Patriarca Dr. Israel Radiaganding Dr. Michael Baylon Dr. Ma. Shielah Napalang Engr. Mark Tristan Felix	August 2, 5 and 6, 2025 at PUP Bulwagang Balagtas
16	AGGREVIEW: Hydraulics 1	Engr. Steven Selfa	June 8, 2025 via MS Teams
17	Groundwork 2025: OJT Orientation and 1st Hardhatting Ceremony	Engr. Kenneth Bryan M. Tana Engr. Lorenzo Galicia Dr. Remedios G. Ado	May 24, 2025 at PUP Bulwagang Balagtas
18	Asphalt to High-Rise: Civil Engineering at Full Speed	Engr. Kenneth Carl Milleza Engr. Maria Erica P. Gomez Engr. Dania H. Buklasan Engr. Donamel Saiyari Engr. Anthea Marie Alcantara Engr. John Mark Vida	April 2-4, 2025 via MS Teams
19	The Goblet of PICE: Igniting the Flames of Leadership	Engr. Frederick Francis M. Sison Ms. Zairel Marie M. Santiago	December 7, 2024 at Bulwagang Balagtas
20	Professional Chairholder Lecture Series 2024	Dr. Hilario Sean O. Palmiano, Dr. Eng.	December 5, 2024 at PUP Bulwagang Balagtas and via Zoom Meeting
21	PICEstudy REVIEW SESSION on Supplementary Problems for Geometry	Engr. Kenneth Bryan Tana	October 22, 2024 at PUP ITECH AVR

22	REVIEW SESSION on Steel Design	Engr. Dlego Gillesania	October 21, 2024 at PUP ITECH AVR
23	TagumPICE 2024: The PICE-PUPSC's 38th Proclamation & Turnover Ceremony	Mr. Russel Angelo Toribio	September 7, 2024 at Bulwagan Bonifacio, PUP Main
24	To The Top: Civil Engineering Qualifying and Specialization Exam Review	Engr. Joshua Pasion Mr. James Bryan Ragon Mr. Russel Angelo Toribio Mr. Tristan Suayan Mr. Aldrin Cafirma Mr. Sam Robertson D. Pelegrino Mr. Aldean De Guzman	August 14-16, 2024 at PUP CEA Room 105 and via Zoom Meeting
25	PYLON Convention 2024 Day 1	Engr. Wilfredo Andales Engr. Jose Al Surtida Engr. Allen Dela Cruz	August 10, 2024 at Bulwagang Balagtas
26	PYLON Convention 2024 Day 2	Engr. Yves Pumarada Engr. John Philip Feria Engr. Neil Gabriel Bonto	August 12, 2024 at Bulwagang Balagtas
27	PYLON Convention 2024 Day 2	Engr. Jose Sy Engr. John Eugene Fernandez	August 12, 2024 at Bulwagang Balagtas
28	PYLON Convention 2024 Day 3	Engr. Jameson Lim Engr. Ariel Santos	August 13, 2024 at Bulwagang Balagtas
29	PYLON Convention 2024 Day 3	Engr. Archigine Agleham Labrador Engr. Michiko Marie Quiachan	August 13, 2024 at Bulwagang Balagtas
30	PYLON Convention 2025 Day 1	Ms. Babykay G. Abdon/ CANON Calculator Philippines	July 21, 2025 at Bulwagang Balagtas
31	PYLON Convention 2025 Day 1	Engr. Ariel Pascual Santos/ President, Review Innovations	July 21, 2025 at Bulwagang Balagtas
32	PYLON Convention 2025 Day 2	Engr. Rucel Britanico/ Author of Outsmart the Board Exam Engr. Alyssa Joy B. Finca/ CEO, FINCA Engineering Services	August 5, 2025 at Bulwagang Balagtas
33	PYLON Convention 2025 Day 2	Engr. Christian B. Acosta/ CEM Mr. Jeffrey E. Daza/ Sales and Marketing Supervisor of Microcadd	August 5, 2025 at Bulwagang Balagtas
34	PYLON Convention 2025 Day 3	Engr. Lorenzo Galicia/ Professor, PUP, Sta. Mesa	August 6,

		Engr. Abner Bondoc/ Technical Manager Geoinnovative Specialists Inc. Dr. Michael B. Bylon/ Principal Engineer, EMBYLON Engineering Design Services	2025 at Bulwagang Balagtas
35	PYLON Convention 2025 Day 3	Dr. Ma. Sheilah G. Napalang/ Professor, UP School of Urban and Regional Planning Engr. Paul Allen Patriarca/ Instructor, PUP, Sta. Mesa Dr. Israel Radiaganding/ Chief Transportation Development Officer, Phillippine Railway Institute DOTr	August 6, 2025 at Bulwagang Balagtas
36	PYLON Convention 2025 Day 3	Engr. Mark Tristan Felix/ Instructor, PUP, Sta. Mesa	August 6, 2025 at Bulwagang Balagtas
37	PICE-a-Kalye Christmas Outreach Special	PICEPUP-SC Members	December 19, 2023 at Pureza Street, Manila
38	PICEchanted: A Labyrinth of Fortunes	Engr. Kent Bryan D. Lontok Engr. Rodelle C. Lavarias Engr. Johann Simon B. Geronimo Dr. Manuel M. Muhi Engr. Edna Arrojado	November 11, 2023 at COC PUP Theater
39	Salubong 2023: Pagdiriwang ng Bagong Yugto sa Larangan ng Agsikapan	Engr. Kenneth Bryan M. Tana	November 8, 2023 at PUP C.M. Recto Hall
40	PIONEERING: Exploring the Core of Civil Engineering Excellence	Engr. Jayr Igama Engr. Gilbert Sauro Engr. Allan Moreno Engr. Edwin Quejano	September 16, 2023 at PUP CEA Room 109 and via Zoom Meeting
41	TagumPICE 2023	Mr. Russel Angelo Toribio	September 7, 2023 at Bulwagang Balagtas, PUP Main
42	SPEC AggReview	Engr. Colene Gammad Engr. Shekira Obsequio Engr. John Harvey Casilisilihan	August 26 and 28, 2023 at CEA - Room 105 and via Zoom Meeting
43	Primoneutron: KatroPICE Quest Beyond Erudition	Engr. Victor Joseph Villafuerte Engr. Jun Ray Navarres	August 12, 19, and 26, 2023 at CEA AVR

		Engr. Daniel James Molina Mr. Aldean Gem De Guzman Mr. Sam Robertson Pelegrino	
44	TRAILBLAZER NEXUS: Paving the Way for your Engineering Journey	Engr. Emmanuel Balanon Engr. Lorenzo Galicia Engr. Alberto Cañete Engr. Michael Baylon Engr. Edison Carlos Dr. Donamel Saiyari Engr. Ireneo Garcia Mateo Engr. John Eugene Fernandez Engr. Joshua Ferdinand Villafuerte Engr. Joshua Joseph Rodriguez	August 7-9, and 11, 2023 at PUP Theater COC Compound
45	Catch-Up 2023: An AutoCAD Workshop	Mr. Arthur DR. Acibar, LPT.	July 29, 2023 at CEA AVR
46	PICE-PUPSC's Blood Letting Project	Ms. Gieselle Margarette S. Francisco Ms. Micahella May Cruz, Philippine Red Cross	July 22, 2023 at CEA AVR
47	NEXUS: Nurturing and Engineering Xenial Understanding of Specialization	Engr. Ian Gail Cabrera Ms. Cha Castaño Dr. Michael B. Baylonn Engr. Enrick Elloso Arch. Jack Nicole Tabirao	March 18-19, 2023 via Zoom Meeting and Facebook Live
48	FINLITWEB 2023: Engineering the Road Towards Financial Literacy	Engr. Kimuel V. Suit, M.ASEP Mr. Mark 'Mendy' Mendoza Dr. Remedios G. Ado Engr. Melvin G. Singayan Mr. Zach Renzo Fabian Mr. Andro Leo Beltran Ms. Salve Duplito Ms. Audrey Claire C. Fabian Ms. Ruth Camille P. Esteban	Feb 19, 26 and March 05, 2023 via MS Teams
49	REsourCE: Building the Core of Research Knowledge and Development	Dr. Teodoro Amatoso Jr. Engr. Ian Gail Cabrera Engr. Mark Manlapaz	January 26, 27, and 30, 2023 via Zoom Meeting
50	PICE in Action - Civil and Railway Engineering Department 4th Quarter General Assembly	Mr. Russel Angelo Toribio	December 11, 2022 via Zoom Meeting
51	PICE in Action - Civil and Railway Engineering 2nd Monthly Assessment	Engr. Kenneth Bryan Tana Mr. Russel Angelo Toribio	November 30, 2022 via Zoom Meeting
52	PICElandia: Quest to the Land of Wonders	Engr. Kenneth Bryan Tana Mr. Russel Angelo Toribio Engr. Jameson Glen Lim	November 6, 2022 via Zoom Meeting
53	REbuilding AllianCE 2022: Establishing Natural Ties	Engr. Mikko Barroquillo Engr. Marc Beni Sansait	August 21, 2022 via Zoom

	Towards Stability and Disaster Resiliency		Meeting and Facebook Live
54	RECEptive 2022: Steel Sustainability in Construction	Engr. Randy Solidum	August 13, 2022 via Zoom Meeting and Facebook Live
55	CE-MENT: A Journey to the MULTIVERSE of CIVIL ENGINEERING	Engr. Leo Chris Mateo Engr. Kelvin L. Lapidario Engr. Carmela Marie Lingad-Oliquino Engr. Abner Bondoc Mr. Emmanuel Balanon Engr. Manuel Melchor Bongulto Engr. Mark Alexander Bundang Prof. Mariano Roque Senga Jr. Mr. Cesar Carlito Baclagon Engr. Mark Joseph Domingo Engr. Sonny Andalis Dr. Ernesto Guades Engr. Michael Rivera Dr. Donamel Saiyari	July 10, 17, 24, and 31, 2022 via Zoom Meeting and Facebook Live

Further, the industry has access to a pool of talented graduates and potential partners for collaborations.

Faculty and students are continuously exposed to the industry through Seminars and Field Trips, a course offered which highlights the conduct of field trips and site visits by the students as supervised by the faculty-in-charge. Most of the companies where the faculty and students are exposed are in the areas of construction management, structural, water resources, transportation and other related fields. The faculty in charge coordinates with the companies and guides the students in arranging field trips and seminars. Students are required to attend and/or organize seminars, colloquiums, and field trips given that they will feature one technical and one non-technical topic, done on-campus and off-campus, and conducted either face-to-face or virtually. After each seminar, colloquium, or field trip, the students submit individual portfolios which reflect their gained experiences and knowledge from the said activity.

3. Provide data to demonstrate sustainable mechanisms among the industry, academe, and professional engineering societies. Define student outcome(s) supported by the activities and include performance monitoring data.

Seminars and Workshops Attended by Faculty Members

To strengthen collaboration among the academe, industry, and professional engineering societies, faculty members actively participated in various seminars, workshops, and technical events organized by both private and government institutions. These engagements were conducted either through formal invitations as attendees or as resource speakers and panelists, fostering knowledge exchange with practicing professionals. These sustained interactions provide continuous professional development for faculty and serve as platforms to align academic instruction with emerging trends in engineering practice.

Such activities directly support Student Outcome (SO) 9 – Recognize the need for and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change, as faculty members serve as role models for students in embracing professional growth and staying updated with advancements in the field. Performance monitoring data include participation records, certificates, and documentation of learning sessions, which are regularly reviewed during faculty development evaluations. The impact of these initiatives is also measured through curriculum improvements, integration of industry practices into classroom instruction, and increased student awareness of current professional standards. (Attachment C8-04 – [Seminar Certificates](#))

Figure 8.7 Engr. Kenneth Bryan Tana during the 2022 and 2025 PICE Midyear National Convention and Technical Conference

As part of its commitment to internationalization, the Polytechnic University of the Philippines (PUP) participated in the ZZRVTCT–PUP Cooperation Meeting held at Zhengzhou Railway Vocational and Technical College (ZZRVTCT), China, from October 13 to 15, 2024.

Representing PUP, Engr. Kenneth Bryan M. Tana and Engr. Ramir Cruz engaged in discussions aimed at strengthening academic collaboration and enhancing the Bachelor of Science in Railway Engineering and Management (BSREM) program.

The meeting highlighted curriculum development, faculty and student exchange opportunities, and other collaborative initiatives that further strengthen PUP's international academic partnerships and advance globally competitive railway engineering education.

Figure 8.8 Delegates from the Polytechnic University of the Philippines and Zhengzhou Railway Vocational and Technical College gather for a Cooperation Dialogue and Partnership Meeting, Strengthening academic and technical collaboration in the field of railway education and training.

Figure 8.9 Engr. Kenneth Bryan M. Tana from the Polytechnic University of the

Philippines experiences hands-on simulation training at Zhengzhou Railway Vocational and Technical College, showcasing advanced driver interface technology used in modern railway systems

Saiyari, Donamel M.	1-3pm. Resource Speaker and Poster Presentation Judge, TransConverge 2025: PITCHPOINT, Innovations in Motions in Civil Engineering and Railway Engineering Management	May 31, 2025	Polytechnic University of the Philippines
	8am – 5pm Participant, Work Attitude Values Enhancement (WAVE) Seminar, DOST-ITDI KM Stica Bicutan, Taguig City	May 2, 2025	
	am – 12nn. Participant, Department of Science & Technology-Industrial Technology Development Institute (DOST-ITDI) Biorisk Management Workshop, Manila Marriott Hotel	March 18-21, 2025	
	DOST Compound Participant, Department of Science & Technology, RA 12009 New Government Procurement Act, Titatium Hall, MIRDC	October 6-8, 2025	DOST Compound
	Expert Panelist, UBIAN Legacy: Search for the Best Paper with the theme: Strengthening Our Commitment to Sustainable Development Goals”	May 2, 2025	University of Batangas
	Forum Speaker, Translating Research Findings Into Policy, Practice, and Community Action, 3rd NU Congress Co-Creating the Future: Research-Government-Community Partnerships for Sustainable Nation-Building, National University, Henry Sy Sr. Auditorium 7th Floor SM Prime Headquarters, MOA Square, Pasay City	November 29, 2025	
	Keynote Speaker and Session Chair, Engineering approaches to toxigenic cyanobacteria control for enhanced water resource management, International Conference of Sustainable Science and Technology 2025: Green Solutions for Climate Change Adaptation, Nguyen Tat Thanh University, Ho Chi Minh City, Vietnam, October 31	November 1, 2025	

FACULTY MEMBER	TITLE OF TRAINING / SEMINAR / CONFERENCE	DATE	SPONSORING AGENCY
	Keynote Speaker, 2nd International Conference on Civil, Architecture, Environmental Engineering and Technology, "Sustainable Infrastructures: Integrating Innovation in Civil, Environmental, and Technological Landscapes, Lyceum of the Philippines University, General Trias, Cavite	December 5, 2025	
	Learning Session Speaker, Translating Research Findings into Policy, Practice, and Community Action, National University, Henry Sy Sr. Auditorium 7th Floor SM Prime Headquarters, MOA Square, Pasay City	November 29, 2025	
	Participant, 2025 International Workshop on Emerging Contaminants Characterization and Remedial Practice, National Cheng Kung University, Tainan City, Taiwan	December 2-3, 2025	
	Participant, Basic Laboratory Biosafety and Biosecurity Course, BRAP, Kimberly Hotel, Manila	April 8-12, 2024	
	Participant, Biosafety Laboratories: An Engineering Perspective, EBD Conference Room, DOST-ITDI, Bicutan, Taguig City	March 18, 2024	
	Participant, Biosafety Laboratory & General Laboratory Design, Construction, Testing & Commissioning – A Case Study for the Virology Institute of the Philippines, EBD Conference Room, DOST-ITDI, DOST Compound, Taguig City	September 24, 2025	
	Participant, Chemical, Biological, Radiological and Nuclear Summit 2024, Interpol (International Criminal Police Organization), Makati Diamond Residences	December 17, 2024	
	Participant, Conference on the Collaborative Verification for the Environmental Technology Verification Program, Taiwan Ministry of Environment, Taipei, Taiwan	August 29, 2024	
	Participant, Defense Threat Reduction Agency-Sandia BRAP-DOST Workshop Series (May 30, June 6 & 20, July 11 & 18, August 8, 16 & 27	September 5, 2025	

FACULTY MEMBER	TITLE OF TRAINING / SEMINAR / CONFERENCE	DATE	SPONSORING AGENCY
	Participant, Department of Science & Technology-Industrial Technology Development Institute (DOST-ITDI) Biorisk Management Workshop #2, Manila Marriott Hotel	July 14-17 2025	
	Participant, Department of Science & Technology-Industrial Technology Development Institute (DOST-ITDI) Management and Leadership Workshop, Manila Marriott Hotel	March 17, 2025	
	Participant, Detection and Quantification of Microplastics in Manila Bay and Pasig River Using Visual Identification and FTIR Imaging, International Conference of Sustainable Science and Technology 2025: Green Solutions for Climate Change Adaptation, Nguyen Tat Thanh University, Ho Chi Minh City, Vietnam, October 31	November 1, 2025	
	Participant, Divisional Training Workshop on Harmonized Gender and Development Guidelines (HGDG)	April 14-15, 2025	Department of Science & Technology-Industrial Technology Development Institute Gender and Development Focal Point System (GFPS)
	Participant, DOST Advanced Workshop, Sandia National Laboratory, Marriott Hotel Manila	July 22-26, 2024	
	Participant, Eutrophic Lake Dynamics: Hydrology and Hydrodynamics of Laguna De Bay and their Role in Cyanobacterial Bloom Formation, International Conference of Sustainable Science and Technology 2025: Green Solutions for Climate Change Adaptation, Nguyen Tat Thanh University, Ho Chi Minh City, Vietnam, October 31	November 1, 2025	
	Participant, In-depth Training Workshop on Gender and Analysis and Tools, DOST-ITDI	June 5, 2024	DOST Complex

FACULTY MEMBER	TITLE OF TRAINING / SEMINAR / CONFERENCE	DATE	SPONSORING AGENCY
	Participant, In-person Training Course on Handling of Arsenic, Cadmium, Total Chromium, Lead and Total Mercury Chemicals and Chemical Compounds, STD Conference Room, DOST-ITDI	April 18, 2024	DOST Complex
	Participant, Mapping of Per- and Polyfluoroalkyl Substances in Microplastics in Soil Along Marikina River Using Quantum Geographic Information System, International Conference of Sustainable Science and Technology 2025: Green Solutions for Climate Change Adaptation, Nguyen Tat Thanh University, Ho Chi Minh City, Vietnam	October 31 November 1, 2025	
	Participant, New Government Procurement Act (Republic Act 12009), Titanium Hall, MIRDC Building	October 6-8, 2025	DOST Compound
	Participant, Offshore Wind Ports 102 Workshop with British Embassy Manila, Global Wind Energy Council and Wind Energy Council and Wind Energy Developers Association of the Philippines, New World Hotel Makati	July 24, 2024	
	Participant, Physical Characterization of Microplastics in the Coastal Surface Waters of White Beach, Puerto Galera, Oriental Mindoro, Philippines, Philippines, International Conference of Sustainable Science and Technology 2025: Green Solutions for Climate Change Adaptation, Nguyen Tat Thanh University, Ho Chi Minh City, Vietnam	October 31 November 1, 2025	
	Participant, The Economic Impact LNG Importation in the Philippines, Gas Policy Development Project 3 (GPDP-3), DENR, Online Webinar	May 17, 2024	
	Participant, Philippines Department of Science and Technology (DOST) Facility Risk Assessment Workshop, Marriott Hotel	November 18-22, 2024	
	Participant, The Storifying R & D Workshop, Brandev for DOST, Development Academy of the Philippines, Tagaytay City	January 9-10, 2025	

FACULTY MEMBER	TITLE OF TRAINING / SEMINAR / CONFERENCE	DATE	SPONSORING AGENCY
	Participant, Virology and Vaccine Institute of the Philippines (VIP) Act (RA 12290) Implementing Rules and Regulation (IRR) Consultative Meeting, Plazuela, Capas, Tarlac	November 5, 2025	
	Participant, "2024 BSL-3 Core Facility Training/Workshop for the Architects and Engineers under the MECO-TECO HAT Initiative" for the containment facility requirements of DOST ITDI ASF Vaccine Development, The Heritage Hotel Manila	September 3, 2024	
	pm. Participant, Taiwan International Water Week, TWTC Exhibition Hall, Taipei. Taiwan	September 11-13, 2024	
	Presenter, Water Quality Index as a Tool for Assessing the Water Quality of Groundwater Quality from Wells in Cavite, Batangas, and Pampanga, Philippines, International Conference of Sustainable Science and Technology 2025: Green Solutions for Climate Change Adaptation, Nguyen Tat Thanh University, Ho Chi Minh City, Vietnam	October 31 November 1, 2025	
	Research Evaluator for Professional and Student Category, 14th Joint Regional Symposium on RDE Highlights & 7th Regional Student Research Congress, "RDE Dap-ay: Forging Strategic Pathways through Innovative and Sustainable RDE", Benguet State University, La Trinidad, Benguet, Mountain Province	October 14-17, 2024	
	Resource Speaker, Asphalt to High-Rise: Civil Engineering at Full Speed	April 3, 2025	Polytechnic University of the Philippines
	Resource Speaker, A Primer to Waste Management in Design and Construction Management Towards Zero Waste Buildings, Prince Building, 117 Rada, Legazpi Village, Makati City	May 4, 2024	
	Resource Speaker, Civil Engineering Seminar	June 7, 2025	FEU Institute of Technology

FACULTY MEMBER	TITLE OF TRAINING / SEMINAR / CONFERENCE	DATE	SPONSORING AGENCY
	Resource Speaker, Civil Engineering Seminar 2025: ASCEND: Reinforcing the Future Seminar Series#1 (The Transport and Fate of Chlorinated Compounds on Houjing River, Taiwan: An Information Potential for Philippines Inland Water Treatment)	October 18, 2025	FEU Institute of Technology
	Resource Speaker, Civil Engineering Seminar, FEU Tech Manila	February 15, 2025	
	Resource Speaker, Engineering Controls in Biosafety, PICE-NMMC 2025 Webinar Series 9.0, Online Webinar	April 20, 2025	
	Resource Speaker, Engineering Expo and Forum, 2025 PICE Midyear National Convention and Technical Conference, Iloilo Convention Center, Iloilo City	June 25-27, 2025	
	Resource Speaker, Engineering Expo and Forum, 51st PICE National Convention and Technical Conference, Emerging Trends and Applications of Value Engineering and Value Analysis in the Philippines: Towards Sustainable and Cost Effective Practices, PICE, SMX Convention Center, Bacolod City	November 13-15, 2025	
	Resource Speaker, GLOWE (Global League of Women Engineers) Hybrid Event for Women's Day Celebration: Diverse Voices, Collective Impact Celebrating Women in Engineering and Environmental Leadership, Winford Hotel & Casino, Manila	March 22, 2024	
	Resource Speaker, Kaizen Principle Application for a Zero-Waste Goal in Building Construction, Far Eastern University, FEU Tech Main Building, Padre Paredes St, Sampaloc, Manila	February 24, 2024	
	Resource Speaker, Kaizen Principle Application for a Zero-Waste Goal in Building Construction, Far Eastern University, FEU Tech Main Building, Padre Paredes St., Sampaloc, Manila	June 1, 2024	
	Resource Speaker, Seminar Series on Environmental Engineering and Management, College of Engineering	May 8, 2025	Bicol University
	Resource Speaker, The Power of Environmental Engineering Towards Climate Resilience	April 4, 2025	Adamson University

FACULTY MEMBER	TITLE OF TRAINING / SEMINAR / CONFERENCE	DATE	SPONSORING AGENCY
	Resource Speaker, World's Water Day Symposium, De La Salle University, Manila	March 20, 2024	
	Resource Speaker, PICE (Philippine Institute of Civil Engineers) Quezon City Chapter Webinar in Celebration of International Women's Month, Online Webinar	March 19, 2024	
Tana, Kenneth Bryan M.	2024 ACADEME-INDUSTRY CONFERENCE AND CAREER DEVELOPMENT SEMINAR	August 7–9, 2024	Alumni Relations and Career Development

BS Civil Engineering (BSCE) students have been actively participating in various seminars and workshops organized by other academic institutions, industry partners, and professional engineering organizations. These events cover a wide spectrum of topics, including cutting-edge civil engineering technologies, sustainable construction practices, disaster risk reduction, project management, and industry trends. Participation in these external learning opportunities enables students to gain valuable insights beyond the classroom setting and to interact with practicing professionals and experts in the field.

This active engagement strongly supports Student Outcome (SO) 9 – Recognize the need for, and engage in lifelong learning, by cultivating among students the mindset that learning extends far beyond the classroom and continues throughout their professional careers. Through participation in seminars, technical talks, webinars, conferences, and other professional development activities, students are exposed to emerging technologies, current industry practices, evolving engineering standards, and contemporary issues affecting the civil engineering profession. These learning opportunities encourage students to remain

CIEEN 30311 - CE FIELD TRIP
RUBRICS FOR EVALUATION OF SEMINAR REPORT

Part I: To be filled up by Student

Name: _____ Course, Year & Set: _____

	TITLE OF SEMINAR	DATE	ONLINE/F2F	VENUE/PLATFORM
1				
2				
3				
4				
5				

Part II: To be filled up by CE Field Trip Adviser

Based on the rubric report by the adviser, rate the level of attainment of the item 1 to 5:

STUDENT OUTCOME (SO) PROGRAM LINKAGE OUTCOMES (PLO)	PERFORMANCE INDICATOR (PI)	COURSE LEARNING OUTCOMES (CLO)	CRITERIA	WEIGHT	Exemplary (5)	Very Good (4)	Good (3)	Fair (2)	Poor (1)	SCORE	WEIGHTED SCORE
9	recognizes the need for, and engages in lifelong learning through the ability to acquire and apply new knowledge	1.1	The student can demonstrate self-directed learning through acquired new knowledge from various modes and strategies (research, attendance in conferences and exhibits, site visits)	Lifelong Learning	20.00%	Lifelong learning opportunities were identified and thoroughly explained	Lifelong learning opportunities were identified with clear explanation	Lifelong learning opportunities were identified with no clear explanation	Lifelong learning opportunities were not identified nor explained		
7	effectively communicate civil engineering activities with the engineering community and with society at large	7.1	use effective written communication by writing grammatically correct and logical reports using appropriate graphics and technical style	Organization	20.00%	Information is very organized with well constructed paragraphs, use of subheadings, and information is factual and correct	Information is organized with well constructed paragraphs and information is factual and correct	Information is organized but paragraphs are not well constructed and information is factual	The information appears to be disorganized and information is suspect to being correct and factual		
			Language Use	20.00%	Use language that is fluent and original, with varied sentence structure and no grammatical, spelling, or punctuation errors	Use language that is fluent and original, with varied sentence structure and no grammatical, spelling, or punctuation errors	Use language that is appropriate, with a basic sense of purpose, with some attempt to vary sentence structure	Use language that is not precise for the purpose and has limited awareness of varying sentence structure	Use language that is not suitable for the purpose and has no awareness of sentence structure		

**CRITERION 8
PROGRAM LINKAGES**

10	Identify and determine the effect of contemporary issues in the civil engineering discipline	10.1	Identify contemporary issues in a chosen civil engineering field of specialization	Quality of Information	20.00%	Information clearly relates to the main topic. It includes several supporting details and/or examples of technology evolution and career plans	Information clearly relates to the main topic. It provides 1-2 supporting details and/or examples of socioeconomic needs that affects technology evolution	Information clearly relates to the main topic but no assessment on socioeconomic needs with technology trends	Information has little to do with the main topic and the current technology trends	Information has nothing to do with the main topic and does not relate to current technology trends		
	Determine effect of contemporary issues in the civil engineering discipline	10.2		Contemporary Issues	20.00%	Deep understanding of or interest in contemporary issues of the seminar/field trip attended	Good understanding of or interest in contemporary issues of the seminar/field trip attended	Moderate understanding of or interest in contemporary issues of the seminar/field trip attended	Little understanding of or interest in contemporary issues of the seminar/field trip attended	No understanding of or interest in contemporary issues of the seminar/field trip attended

Figure 8.10 Rubrics for Evaluation of Seminar Report

Performance monitoring is carried out through documentation such as event certificates, registration logs, and student reflections or post-activity reports. These are collected and evaluated as part of the department's student development and co-curricular performance tracking. The department also encourages students to apply acquired knowledge in course projects, capstone design, and student organization initiatives, demonstrating how external learning experiences are effectively integrated into academic and practical applications.

By fostering these connections with the industry and academic communities, the CE program ensures that students remain responsive to the evolving demands of the profession while cultivating a proactive mindset toward professional growth.

Table 8.7 List of Seminars and Workshops Attended by Students

NAME	ROLE	EVENT TITLE	DATE	SPONSORING AGENCY
Ronald E. Escultura Jr.	Participant	Most Outstanding Civil Engineering Student (MOCES) Award 2024	November 16, 2024	Philippine Institute of Civil Engineers, Inc.
	Working Committee	International Conference and World Café: Advancing Transportation and Construction Management in the Philippines	November 22, 2024	British Council
	Participant	21st Tanglaw ng Iskolar Awards: Leadership Symposium	May 26, 2024	PUP College of Engineering Honor's Society
	Lead Organizing Team Member	Catch-Up: An AutoCAD Workshop	July 29, 2023	Philippine Institute of Civil Engineers - PUP Student Chapter
Aaron Justin M. Honorato	Participant	Universiti Malaya Civil Engineering Competition (UMCvEC) 2025	April 19, 2025	Universiti Malaya

The BS Civil Engineering (BSCE) program fosters student engagement through several active student organizations that are formally linked to recognized professional engineering societies. These student organizations, among others, serve as vital platforms for academic enrichment, professional development, leadership training, and community involvement.

These organizations facilitate a variety of academic and non-academic activities including technical seminars, site visits, quiz competitions, skills training, leadership summits, social responsibility initiatives, and collaboration with practicing engineers and industry experts. Through their affiliation with professional bodies, students gain early exposure to the standards, ethics, and practices of the engineering profession, while also building professional networks and learning opportunities aligned with real-world demands.

The operation and participation in these organizations directly support Student Outcome (SO) 6 – Apply ethical principles and commit to professional ethics and responsibilities, by cultivating a sense of accountability, integrity, and service among student members. In addition, these engagements foster LIFE – Recognize the need for, and engage in lifelong learning, as students are encouraged to pursue learning opportunities outside the formal curriculum.

The department monitors these organizations through activity proposals, accomplishment reports, and evaluation forms to ensure alignment with academic objectives and professional standards. Faculty advisers also provide mentorship and guidance, reinforcing the integration of professional values and leadership development in all organizational activities.

By supporting and institutionalizing student involvement in professional-linked organizations, the CE program ensures that students are well-prepared not only academically, but also socially and professionally as future civil engineers.

3. ACIP – PUP Student Chapter	ACI Philippines

Faculty Members Membership in Organizations

The Civil Engineering Department sustains strong and continuing linkages among industry, academe, and professional engineering societies through the active national and international professional engagement of its faculty members. Faculty are members in good standing of recognized professional organizations and regularly participate as officers, committee members, reviewers, CPD participants, technical speakers, and conference

presenters in activities organized with industry and society partners. These sustained memberships and roles serve as a stable mechanism for collaboration by providing recurring venues for technical exchange, standards and code updates, professional practice discussions, and joint activities such as seminars, workshops, forums, and student chapter events, which are integrated into the Department's faculty development and stakeholder engagement plans and documented through membership records, certificates, activity reports, and minutes of meetings. As a result, students directly benefit from industry- and society-informed learning experiences that support key student outcomes, particularly effective communication, teamwork and leadership, professional and ethical responsibility, lifelong learning, and the application of current engineering standards and modern tools. Performance monitoring data are gathered and reviewed regularly using direct and indirect measures, including rubric-based assessments of student technical presentations and reports following society/industry-led activities, evaluations of teamwork performance in competitions and project-based workshops, reflection outputs after ethics and professional practice sessions, and design/capstone rubric indicators on standards compliance and appropriate tool use; these data are consolidated each term and discussed in OBE and departmental review meetings to identify gaps, set targets, and implement improvements such as embedding updated standards in course requirements, expanding industry mentoring and society-led training, and strengthening student deliverables to ensure sustained attainment of the supported student outcomes.

Faculty Members as Accreditors

The Civil Engineering Department further strengthens its culture of quality assurance and continuous improvement through the participation of selected faculty members as trained accreditors and program evaluators in various accrediting bodies. By serving as external accreditors, these faculty gain direct exposure to current accreditation criteria, outcomes-based education (OBE) expectations, best practices in assessment and documentation, and benchmark processes implemented by other higher education institutions and engineering programs. The insights and lessons gathered from accreditation assignments are systematically shared in departmental meetings and internal quality assurance activities and are translated into concrete actions such as refining program educational objectives and student outcomes mapping, strengthening assessment instruments and rubrics, improving course portfolios and evidence management, and aligning curricular implementation with professional and societal requirements. This engagement provides a sustainable mechanism for keeping the Department's internal QA system responsive and up to date, while also demonstrating the faculty's professional service and leadership in advancing engineering education standards beyond the institution.

B. Community-Oriented Programs

To contribute to the achievement of sustainable development in the country, the university continuously pursues the noble task of implementing extension programs and projects that will capacitate the people to improve their lives and help improve others in the process. The improvement of the lives of the members of institutions, industries, and communities it serves becomes the priority of the university in its extension efforts.

The PUP extension agenda draws meanings and perspectives from the literature on development studies and corporate social responsibility. These include some of the official government documents, e.g., the National Economic Development Authority's (NEDA) 'Ambisyon Natin 2040, NEDA's Philippine Development Plan 2017-2022, Commission on Higher Education (CHED) Memorandum Order 52 S. 2016 and United Nations Sustainable Development Goals 2030.

The CHED Memorandum Order No. 52 (S.2016) provides PUP's framework for the conduct of its extension services i.e., to promote the generation, adoption, and transfer or application of new knowledge and technologies for community involvement. On the other hand, the NEDA's provisions on Inclusive Development as indicated in the Philippine Development Plan 2017-2022, underscores three major elements and these are: Enhancing the Social Fabric ("Malasakit"), Inequality-Reducing Transformation ("Pagbabago"), and Increasing Growth Potential ("Patuloy na Pag-unlad"), set the priority areas for the University's development interventions.

Lastly, the United Nations Agenda for Sustainable Development 2030 serves as one of the foundations of the university's extension agenda by incorporating programs and projects that are aligned with the agenda's 17 development goals i.e., poverty alleviation, environmental sustainability, gender equality, peace and justice, quality education, health and nutrition, technology and innovation, among others. Therefore, the key elements in the PUP Extension Agenda that serve as the anchor in every extension endeavor in the university are hereby presented:

Agenda 1: Social Enterprise, Business, Economics, Finance

Improving people's lives is one of the main thrusts of the university extension agenda. This can be translated into various programs in cooperative development, livelihood, financial literacy, accounting system development, entrepreneurship, human resource management, personality development, marketing and office administration, educational tourism, and hotel and transportation management.

Agenda 2: Health, Wellness, and Safety

The health and well-being of every individual is another priority that should be afforded to people especially those who are in the marginalized sectors. The university provides programs that are geared towards solving these concerns through fitness, water safety, first-aid, reproductive health, medical and dental health, community health, disaster and risk management, individual, team and combative sports, and nutrition and dietary management.

Agenda 3: Environment, Conservation, and Sustainable Development

The country is one of the most threatened places in terms of environmental degradation and loss of biodiversity. In response to the need to nurture ecological sustainability in the country, the university explores programs that will contribute to this cause. The programs on climate change, solid waste management, water safety, urban gardening, organic agriculture, permaculture, agri-fisheries, vermiculture, and horticulture are some of these efforts.

Agenda 4: Education, Communication, Culture and the Arts, Gender and Development

Education is a lifelong journey. Individuals, especially the youth are entitled to the learning experience that can give assurance for a more sustained and productive life. The culture and the arts are essential in instilling one's national identity while communication functions as a tool to abate ignorance and misinformation and serves as a bridge to mutual understanding. PUP aligns its extension programs with this agenda through projects on media and information literacy, print and broadcast journalism, children's educational television,

integrated marketing communication, social communications, health communication, basic literacy and numeracy, business communication, research literacy, performing arts, visual arts, language education, resource material translation and development, Filipino and English journalism, gender sensitivity, and women's rights.

Agenda 5: Science, Engineering and Technology

The advent of technological breakthroughs and scientific advancement permeate and inevitably affect the country in a very significant way, and societies and communities must respond to these challenges. The University, through its extension programs, is finding ways by which such breakthroughs shall be shared with and adapted by the beneficiaries. Such programs include, thus far, emergency alert signal transmission, welding, house wiring, electronic product assembly, basic consumer electronic, disaster and risk management, plumbing, carpentry, automation, robotics, computer servicing system, design and systems analysis, information technology literacy, web design, software development and implementation, urban gardening, solid waste management, food and sanitation, food processing, chemical products development, research literacy, basic math, applied statistics, body mass index assessment, and nutrition education.

Agenda 6: Governance and the Law

Good governance and just relations are the foundations of a stable social order. As a champion of human rights and equality, the university helps lay such a foundation through its significant extension programs on local governance and administration, public management, women and gender issues, human rights and free legal aid services, fiscal management, good governance, fiscal accountability, taxation, labor relations, urban and rural development, youth leadership, persons with special needs acknowledgment, and inclusivity.

Figure 8.14 PUP Extension Agenda

B.1. Extension Service

The Extension Management Office (EMO) serves as the University's primary unit responsible for planning and implementing extension initiatives. Its vision and mission emphasize its role in promoting social and community development by empowering its beneficiaries, partner barangays, and both government and private organizations. This is achieved through collaboration with partner colleges, branches, and campuses, and by delivering relevant and responsive extension programs tailored to address the needs of its stakeholders.

Figure 8.15 Extension Management Office Organizational Chart

The organizational structure of the Extension Management Office of the Polytechnic University of the Philippines presents a clear and systematic chain of leadership that supports the university's extension initiatives. At the top is the University President, Dr. Manuel M. Muhi, followed by Dr. Anna Ruby P. Gapasin, Vice President for Research, Extension, and Development (RED), and Dr. Angelina E. Borican, Assistant Vice President for RED. Overseeing the office directly is Dr. Rolan J. Malvar, Director of the Extension Management Office, who ensures the effective planning and implementation of extension programs.

Under his leadership are key section heads who manage specific functions: Dr. Edcon B. Baccay for Extension Support, Monitoring, and Evaluation; Dr. Angelita S. Villaruel for Extension Linkages and Technology Transfer; Assoc. Prof. Raquel A. Arevalo for Extension Training and Technical Advisory; and Assoc. Prof. Airavie Joy Dr. Austria for Community Relations and Outreach Services. They are supported by extension managers, Asst. Prof. Argie B. Hifarva and Asst. Prof. Camilo P. Abogado, along with administrative staff Maricris B. Celerio and Joyce Ann B. Geslaya, and Mariah Sharmaine S. Liquigan from the PUP Day Care Center.

Overall, the structure highlights a coordinated and collaborative system that enables the office to efficiently deliver extension services, strengthen community engagement, and uphold the university's commitment to social responsibility.

The Extension Agenda for the Bachelor of Science in Civil Engineering (BSCE) program of the Polytechnic University of the Philippines (PUP), branded as PUP RAILS

(Reaching Advancement in Infrastructure, Livelihood, and Sustainability), is strategically developed to bridge academic expertise with societal needs. It encompasses a series of targeted objectives that reflect PUP's commitment to transformative and inclusive community engagement, particularly in the field of transportation systems and infrastructure sustainability.

This agenda is firmly grounded in the guiding principles of the PUP Extension Manual, which emphasizes relevance, responsiveness, and sustainability of extension services. It also upholds the spirit of CHED Memorandum Order No. 52, series of 2016, by promoting the generation, adoption, and application of new knowledge and technologies for meaningful community engagement and capacity-building.

Furthermore, the objectives align with national and global development blueprints such as the National Economic Development Authority (NEDA)'s Ambisyon Natin 2040, the Philippine Development Plan (PDP) 2017–2022, and the United Nations 2030 Agenda for Sustainable Development.

Specific Objectives of the BSCE Extension Agenda:

1. To develop and implement sustainable, community-responsive engineering solutions through technical training, grassroots infrastructure projects, and knowledge dissemination that enhance transportation systems, promote green construction, and reduce disaster risks in local communities.
2. To capacitate local stakeholders, including LGUs, transport authorities, and community members, through targeted programs on disaster resilience, railway safety, traffic systems management, and urban planning technologies such as GIS, with the goal of improving planning efficiency, safety, and resilience.
3. To promote the application and transfer of new and emerging technologies in smart infrastructure, sustainable mobility, and railway innovation by offering toolkits, workshops, and pilot testing of solutions like AI- and IoT-based systems and energy-efficient rail transport.
4. To strengthen partnerships and multi-sectoral collaboration with local governments, NGOs, industries, and academia, thereby fostering shared ownership of projects, scaling of best practices, and sustaining community development outcomes.
5. To contribute to inclusive development by addressing the infrastructure needs of marginalized and underserved communities, including the provision of low-cost green housing, micro-transport solutions (e.g., e-tricycles), and sustainable water management systems.
6. To mainstream knowledge dissemination and public education through community forums, brochures, public lectures, and local seminars, ensuring that technical concepts in sustainable engineering and railway safety are accessible to non-technical audiences.

7. To integrate extension activities with academic instruction and applied research, reinforcing a triadic approach where teaching, research, and extension inform and enhance each other, in accordance with PUP's institutional objectives and CHED's policies.

Alignment with National and Global Development Frameworks:

The BSCE Extension Agenda adheres to the core principles of the PUP Extension Manual, particularly its focus on:

- Community immersion and participatory development, where projects are co-created with local stakeholders.
- Interdisciplinary and inter-sectoral collaboration, promoting synergy between academia and public/private partners.
- Sustainability and impact assessment, through monitoring, evaluation, and long-term adoption of solutions.

The agenda operationalizes CHED CMO No. 52 by:

- Translating research outputs into community-relevant technologies and innovations.
- Promoting knowledge transfer mechanisms such as toolkits, policy briefs, and localized systems.
- Encouraging faculty and student involvement in technology-driven, inclusive extension activities.

With the NEDA's Ambisyon Natin 2040 and Philippine Development Plan (PDP) 2017–2022, the BSCE extension agenda contributes to:

- Matatag, Maginhawa, at Panatag na Buhay by advancing safe and efficient transportation systems and sustainable housing.
- Infrastructure development goals under the PDP, especially in transport connectivity and disaster-resilient infrastructure.
- The empowerment of communities toward inclusive growth and shared prosperity.

The BSCE extension initiatives contribute to several UN Sustainable Development Goals (SDGs), including:

- SDG 9 (Industry, Innovation, and Infrastructure) – through the design and dissemination of sustainable railway and urban systems.
- SDG 11 (Sustainable Cities and Communities) – by supporting safe, resilient, and inclusive urban planning practices.
- SDG 13 (Climate Action) – through capacity-building in climate-resilient infrastructure and green construction.
- SDG 4 (Quality Education) – by providing lifelong learning opportunities through public education and community trainings.

Through its well-defined objectives, the BSCE Extension Agenda under PUP RAILS ensures that the Polytechnic University of the Philippines remains a vanguard of inclusive, sustainable, and transformative development. It promotes a paradigm where engineering education extends beyond classrooms to uplift communities, innovate systems, and sustain progress. By anchoring its strategies in institutional guidelines, national priorities, and global development goals, PUP RAILS sets a model for impactful and meaningful extension service in the field of railway and civil engineering.

The PUP RAILS (Reaching Advancement in Infrastructure, Livelihood, and Sustainability) Extension Agenda is a comprehensive roadmap designed to translate the expertise and resources of the PUP Civil Engineering Department into meaningful actions that address pressing societal needs. This agenda reflects the department's unwavering commitment to advancing sustainable development, empowering communities, and fostering innovation through collaborative and impactful initiatives.

Anchored in five key pillars—Capacity Building Programs, Community-Based Projects, Collaborative Initiatives, Knowledge Dissemination, and Technology Transfer—the agenda aims to bridge the gap between academic research and practical implementation. These strategies are carefully crafted to tackle challenges in green construction, disaster resilience, transportation systems, and sustainable infrastructure. By fostering partnerships with local government units (LGUs), non-governmental organizations (NGOs), and private sectors, the agenda ensures an inclusive and participatory approach to community empowerment and technological advancement.

Through technical training, grassroots projects, and innovative solutions, the PUP RAILS Extension Agenda aspires to drive positive change in infrastructure development, enhance disaster preparedness, improve mobility, and promote sustainable living. This initiative not only reinforces PUP's institutional commitment to inclusivity and sustainability but also serves as a catalyst for building resilient and thriving communities across the nation.

1. Capacity Building Programs

- Conduct technical training on green construction technologies for local builders and contractors.
- Offer workshops on disaster risk reduction and resilience planning for local government units (LGUs) and Barangay government sectors.
- Train transportation agencies on AI and IoT applications for efficient railway and traffic management.

2. Community-Based Projects

- Develop low-cost green housing solutions for underprivileged communities through research.
- Design and pilot sustainable drainage systems in flood-prone rural areas.
- Establish micro-scale transportation systems (e.g., e-tricycles) for improved mobility in remote areas.

3. Collaborative Initiatives

- Partner with LGUs to improve infrastructure planning and zoning using GIS.
- Work with NGOs to implement water-efficient irrigation systems in agricultural communities.
- Collaborate with private sectors to create energy-efficient transportation and railway systems.

4. Knowledge Dissemination

- Organize community forums to educate citizens about sustainable engineering practices.
- Publish simplified guides and brochures on sustainable urban development and infrastructure.
- Facilitate public lectures and seminars featuring PUP faculty expertise.

5. Technology Transfer

- Develop accessible toolkits for implementing smart infrastructure solutions in small towns.
- Promote the use of innovative solutions for infrastructure maintenance in LGUs

Figure 8.16 BSCE Extension Agenda

SHORT COURSES, NON-DEGREE COURSES

During a Board of Regents (BOR) Special Meeting held on April 8, 2025, at the Mateo Conference Room in PUP Sta. Mesa, Manila, the Polytechnic University of the Philippines officially approved Board Resolution No. 4034, Series of 2025, as certified in the document. Attested by University/Board Secretary Assoc. Prof. Rolando M. Covero, Jr., this landmark resolution authorizes the official offering of an expansive suite of Professional Associate Programs, Certificate Courses, and Micro-Credentials Courses under the Institute of Continuing Professional Development Open University System (ICPD-OUS). The introduction of these programs directly reinforces PUP's decorated standing as "The Country's 1st Polytechnic University," which currently ranks 7th in the Philippines, 92nd in Southeast Asia, and maintains a prominent placement in the WURI and global Impact Rankings.

The newly approved academic architecture is systematically structured into three distinct educational tiers to serve diverse professional upskilling needs. The Professional Associate Programs feature comprehensive, multi-phase curriculum pathways ending in specialized capstone projects across modern fields such as Digital Banking and Finance, Applications Development, Social Media Marketing, Small Business Entrepreneurship, and advanced engineering trades like Mechatronics and HVAC/R. Complementing these are specialized Certificate Courses focusing on niches like Tour Guiding, Railway Operations, Strategic Communication, and a robust five-part Taxation series. Lastly, an extensive matrix of Micro-Credentials offers targeted, modular skill building in highly technical domains, covering Electrical Safety Engineering, Project Risk Management, Building Information Modeling (BIM) for construction, Adobe Creative applications, and specialized Research and Development optimization.

CRITERION 8
PROGRAM LINKAGES

CERTIFICATION

This is to certify that during the Board of Regents (BOR) Special Meeting held on 8th day of April 2023 at Main Conference Room, 2nd Floor South Wing, PUP Sta. Mesa, Manila, the Board approved the offering of the Professional Associate Programs, Certificate Courses, and Micro-Credentials Courses in the Institute of Continuing Professional Development - Open University System (ICPD-OUS), as per Board Resolution No. 4034, Series of 2023. To wit:

PROFESSIONAL ASSOCIATE PROGRAMS
Professional Associate in Digital Banking and Finance
Professional Associate in Applications Development
Professional Associate in Social Media Marketing
Professional Associate in Small Business Entrepreneurship
Professional Associate in Mechatronics
Professional Associate in HVAC/R
Professional Associate in Strategic Communication
Professional Associate in Project Risk Management
Professional Associate in Building Information Modeling (BIM)
Professional Associate in Adobe Creative Applications
Professional Associate in Research and Development Optimization

CERTIFICATE COURSES

Certificate in Tour Guiding
Certificate in Railway Operations
Certificate in Strategic Communication
Certificate in Project Risk Management
Certificate in Building Information Modeling (BIM)
Certificate in Adobe Creative Applications
Certificate in Research and Development Optimization

MICRO-CREDENTIAL COURSES

Micro-credential in Electrical Safety Engineering
Micro-credential in Project Risk Management
Micro-credential in Building Information Modeling (BIM)
Micro-credential in Adobe Creative Applications
Micro-credential in Research and Development Optimization

CERTIFICATION

This is to certify that during the Board of Regents (BOR) Special Meeting held on 8th day of April 2023 at Main Conference Room, 2nd Floor South Wing, PUP Sta. Mesa, Manila, the Board approved the offering of the Professional Associate Programs, Certificate Courses, and Micro-Credentials Courses in the Institute of Continuing Professional Development - Open University System (ICPD-OUS), as per Board Resolution No. 4034, Series of 2023. To wit:

Conducting Electrical Safety Audits and Implementing Safety Measures
Conducting Project Risk Assessments and Implementing Risk Mitigation Strategies
Conducting Building Information Modeling (BIM) Audits and Implementing BIM Standards
Conducting Adobe Creative Applications Audits and Implementing Creative Standards
Conducting Research and Development Optimization Audits and Implementing Optimization Standards

Table 8.11 List of Extension Projects of the Civil Engineering Department

NUMBER	NAME OF EXTENSION PROJECT	DURATION	BENEFICIARIES
1	Building Resilient Communities: Assessment of Seismic Vulnerabilities	January 2026 to May 2028	Residents and Local Authorities of Barangay Malanday, Marikina City
2	The Salin Kaalaman Tungo sa Kaunlaran Project for Jesus Is Lord Movement - PLUMBING (DALUBHASANG TUBERO)	October – December 2023	Jesus Is Lord Church Iba Bayan Chapter – Iba Zambales
3	The Salin Kaalaman Tungo sa Kaunlaran Project for Jesus Is Lord Movement	July to December 2022	JIL Iba Bayan, JIL Maligaya, JIL Sampaloc, JIL Simon, and
4	Phase 1: BASIC HOUSE WIRING Phase 2: PLUMBING (DALUBHASANG TUBERO)	July 2026 – December 2026	JIL U-Belt

1. Title: Building Resilient Communities: Assessment of Seismic Vulnerabilities

The BSCE department spearheads the proposed extension activity in collaboration with the College of Engineering. The title of the extension activity is “Building Resilient Communities: Assessment of Seismic Vulnerabilities”. The target group/ partner beneficiaries are the Residents and Local Authorities of Barangay, Malanday, Marikina City. The timeframe is from January 2026 to May 2028.

The Philippines is situated in a band of volcanoes and fault lines that arc around the edge of the Pacific Ocean, known as the seismically active Pacific “Ring of Fire” (Minami Funakoshi, 2022), because of its geological location, the country is prone to natural disasters including earthquakes. One of the fault lines monitored in the Philippines that may pose huge damage, and casualty is the West Valley Fault or the Marikina Fault. Marikina City is one of the most vulnerable Cities in Metro Manila once the West Valley Fault (WVF) moved. Barangka, Industrial Valley, Malanday, and Tumana are barangays in Marikina City that are situated in the WVF (Government Ph, n.d.).

This extension project titled "Building Resilient Communities: Assessment of Seismic Vulnerabilities" could have several significant impacts, both immediate and long-term. Here are the potential impacts categorized into key areas:

- Enhanced Public Awareness: Educating local government units (LGUs) and residents on seismic risks fosters a culture of preparedness.

- Improved Emergency Response: Identifying high-risk areas allows for better planning and efficient evacuation routes.
- Infrastructure Prioritization: LGUs can allocate resources to strengthen critical facilities (like schools, hospitals, and government buildings).
- Data-Driven Decision Making: The project provides evidence-based data to support policy formulation and budget allocation for disaster risk reduction.
- Strengthened Disaster Risk Management (DRM) Programs: Integrating seismic assessments into LGU disaster plans promotes proactive rather than reactive measures.
- Empowered LGUs: Training and technical support build the capacity of local officials to conduct future assessments.
- Community Engagement: Involving residents in safety planning fosters ownership and responsibility.

The extension project organized by the project team of the extension project. Topic that will be discussed is the result of our community needs assessment which selected trainings offered for Earthquake Preparedness, Response and Recovery. The extension project is divided into five (5) Phases.

Phase 1

Training: Shake Alert: Preparedness

Objective: To provide knowledge on earthquakes, earthquake hazards and differentiating hazards and risk.

Goals:

- Enhanced Public Awareness
- Educating local government units (LGUs) and residents on seismic risks fosters a culture of preparedness.

Phase 2

Training: UTILIZATION OF RAPID VISUAL SCREENING

Objective: To train the LGU of Barangay Malanday, Marikina City using FEMA P-154 through Rapid Visual Screening (RVS).

Goals:

- Empowered LGUs: Training and technical support build the capacity of local officials to conduct future assessments.
- Community Engagement: Involving residents in safety planning fosters ownership and responsibility.

Phase 3

Training: UNDERSTANDING: ASSESSMENT OF SEISMIC VULNERABILITIES OF EXISTING PUBLIC BUILDINGS OF BARANGAY MALANDAY, MARIKINA CITY USING RAPID VISUAL SCREENING (RVS)

Objective: To provide knowledge on the result of the research conducted with title: "FEMA P- 154: ASSESSMENT OF SEISMIC VULNERABILITIES OF EXISTING PUBLIC BUILDINGS OF BARANGAY MALANDAY, MARIKINA CITY USING RAPID VISUAL SCREENING (RVS)".

Goals: Assessing and addressing the seismic vulnerability of existing public buildings of Barangay Malanday, Marikina can contribute to the following:

- Enhancing the safety of residents, officials, students, faculties, staff, and visitors of Barangay Malanday.
- Analyzing and identifying the vulnerabilities of the existing public buildings of Malanday will help in finding immediate solutions to address building vulnerabilities.
- Assessment of the vulnerabilities can significantly help to identify possible risks and address problems as early as possible by retrofitting and strengthening the buildings that will be more capable of withstanding possible strong earthquakes.
- Assessing the vulnerabilities of the building will help in determining the impact of earthquakes on the building allowing better planning, evacuation procedures, and overall disaster preparedness

Phase 4.

Training: LGU of Barangay Malanday, Marikina City: Using Rvs For All Other Existing Structures and PUP for Technical Assistance

Objective: To assess all other structures existing structures in Barangay Malanday, Marikina City

Goals:

- Improved Emergency Response: Identifying high-risk areas allows for better planning and efficient evacuation routes.
- Infrastructure Prioritization: LGUs can allocate resources to strengthen critical facilities (like schools, hospitals, and government buildings).
- Data-Driven Decision Making: The project provides evidence-based data to support policy formulation and budget allocation for disaster risk reduction.

Phase 5

Training: Risk Mitigation Strategies

Objective: To help them improve their Risk Mitigation Strategies and enhance seismic resilience.

Goals:

- Guide participants in designing effective risk reduction plans tailored to their homes, communities or workplace
- Teach the importance of retrofitting, building code compliance, and securing non-structural elements to reduce earthquake damage.
- Inspire long-term commitment to safety through regular drills, education campaigns, and updated risk-assessments.
- Help participants critically evaluate current strategies and identify gaps and opportunities for improvement.

2. Title: The Salin Kaalaman Tungos a Kaunlaran Project – Plumbing “Dalubhasang Tubero” for Jesus Is Lord Movement

Plumbing is an essential part of daily life, but it is frequently overlooked until something goes wrong. Our homes' plumbing systems are highly important to us; we rely on them for everything from taking a hot shower at the end of the day to preparing meals, doing laundry, and using the restroom when we wake up in the morning. Plumbing is incredibly important for maintaining our health, hygiene, and general well-being, even though we may take it for granted. It includes a variety of fixtures and systems that cooperate to give us access to clean water, effective waste management, and a comfortable living space.

The improper installation of plumbing may affect the health of the occupants of a building and create a center point for the spread of disease.

Plumbing services and expertise are indispensable when it comes to complex plumbing tasks, accurate problem diagnosis, and proper installations. The knowledge and experience of plumbers ensures that plumbing issues are resolved efficiently and effectively, saving homeowners time, money, and resources.

The ability for PUP Extension to improve/develop the knowledge and skills of the beneficiaries through this training will provide opportunity for livelihood and personal development, employment, and source of income.

Phase 1

Training: Basic Plumbing

Objective: To provide knowledge on basic plumbing & performing plumbing repair and Maintenance work

Goals: Livelihood and personal development, employment and source of income Personnel: College of Engineering faculty members, administrative staff with the assistance of student organization.

Beneficiary: at least 30 individuals Timeframe: December 2023 – March 2024 Monitoring & Evaluation Schedule: April – September 2024

Budget: P31,900.00

Cooperating Agency: JIL Church Iba Bayan Chapter

Phase 2

Training: Plumbing Estimation

Objective: To provide knowledge on Preparing Estimation of Materials for Multiple Plumbing Units

Goals: Livelihood and personal development, employment and source of income Personnel: College of Engineering faculty members, administrative staff with the assistance of student organization.

Beneficiary: at least 30 individuals Timeframe: October - December 2024 Monitoring & Evaluation Schedule: January – June 2025

Budget: Internally Funded

Cooperating Agency: JIL Church Iba Bayan Chapter

Phase 3

Training: Multiple Plumbing

Objective: To provide knowledge on Performing Multiple Plumbing Units Installation and Assembly & Performing Leak Testing

Goals: Livelihood and personal development, employment and source of income, NCII Certification

Personnel: College of Engineering faculty members, administrative staff with the assistance of student organization.

Beneficiary: at least 30 individuals Timeframe: July- December 2025 Monitoring & Evaluation Schedule: January – June 2026

Budget: Internally Funded

Cooperating Agency: JIL Church Iba Bayan Chapter

Figure 8.18 Participants of the Salin Kaalaman Tungo sa Kaunlaran Project – Plumbing “Dalubhasang Tubero” for the Jesus Is Lord Movement are captured in action as they carry out real-world plumbing tasks, showcasing their newly acquired skills through this meaningful community development initiative

Figure 8.19 Participants of the Salin Kaalaman Tungo sa Kaunlaran Project – Plumbing “Dalubhasang Tubero” for the Jesus Is Lord Movement proudly demonstrates newly acquired plumbing skills, reflecting the program’s commitment to empowering communities through practical and sustainable knowledge transfer

3. Title: The Salin Kaalaman Tungo sa Kaunlaran Project for Jesus Is Lord Movement

The Bachelor of Science in Civil Engineering (BSCE) department of the Polytechnic University of the Philippines (PUP) jointly spearheaded an extension project in collaboration with the Jesus Is Lord (JIL) Movement. The project, titled Salin Kaalaman Tungos sa Kaunlaran, aimed to empower selected members of JIL chapters, including JIL Iba Bayan, JIL Maligaya, JIL Sampaloc, JIL Simon, and JIL U-Belt, through a skills training program on Basic House Wiring. The initiative initially targeted 28 participants.

This extension initiative aligns with the University's thrust to assess and enhance the effectiveness of its extension programs by focusing on key components such as relevance, planning, implementation, resource utilization, and monitoring and evaluation. A quantitative needs assessment was conducted using a Community Assessment Needs (CAN) tool to identify the specific training demands of the target beneficiaries. The study revealed that among the various aspects of community extension, planning plays the most critical role in ensuring effectiveness and impact.

Recognizing the extensive membership and influence of the JIL Movement, the College of Engineering, through its BSREM and BSCE departments, strategically partnered with the organization to offer practical training that promotes livelihood development and employability. The CAN assessment guided faculty members and extension coordinators in crafting a program responsive to the real needs of the community. The result was a carefully designed extension project that imparted essential electrical skills, particularly in basic electricity and residential house wiring.

The specific objectives of the project were to:

1. Reduce the number of unemployed and underemployed individuals within the partner communities.
2. Promote livelihood opportunities through practical, marketable skills.
3. Encourage the application of newly acquired skills for personal growth and income generation.

The training, conducted from July to December 2022, successfully imparted foundational knowledge in electrical safety, circuitry, and house wiring. While 28 participants were initially expected, a total of 21 individuals completed the program, including walk-in participants who were not part of the original CAN survey but expressed interest in the training. The training of Basic Electricity and House Wiring with the objective and goals is to provide knowledge on basic electricity and basic house wiring skills Livelihood and personal development, employment and source of income was successfully implemented. More individual that has not filled CNA has also joined the training with total of 21 beneficiary completed the program. The extension project was done on the course of July 2022 to December 2022. It was organized by the project team of the extension project of College of

Engineering. Topics that were discussed is the result of our community needs assessment which selected trainings via CNA offered by the college for the community.

This extension activity not only enriched the lives of the participants but also reinforced the University's commitment to community engagement and nation-building. It served as a meaningful platform for promoting lifelong learning, socio-economic development, and inclusive growth by transferring technical knowledge and fostering a spirit of community collaboration.

The project was divided into two (2) Phases, namely, Phase 1: Basic House Wiring and Phase 2: Plumbing Training.

The 2nd Phase of the extension project focused on PLUMBING TRAINING (DALUBHASANG TUBERO) which has an objective to provide knowledge on basic of plumbing and aims to improve the livelihood and personal development, employment and source of income of the participants.

Plumbing is the art and technique of installing pipes, fixtures, and other apparatuses in buildings for bringing in the supply of liquids, substances and/or ingredients and removing them; and such water, liquid and other carried-wastes hazardous to health, sanitation, life and property; also, the pipes and fixtures after installation i.e., the 'plumbing system'. Plumbing system includes all potable water supply and distribution pipes, all plumbing fixtures and traps; all sanitary and storm drainage systems; vent pipes, roof drains, leaders and downspouts; and all building drains and sewers, including their respective joints and connections; devices, receptacles and appurtenances within the property; waterlines in the premises; potable, tap, hot and chilled water piping; potable water treating or using equipment; fuel gas piping; water heaters and vents for same.

Plumbing course will base on "Dalubhasang Tubero" Handbook that consists of both lecture and actual attendance where a student will achieve in assembling and installing plumbing materials and plumbing systems as well as, repairing and maintaining pipes, fixtures and fittings used for water distribution, wastewater disposal systems and storm drainage systems. A student is required to undergo a 3-day training with 4 hours a day and Day 3 would be an actual attendance to assess the student.

At the end of the training, the participants were able to:

- Learn how to prepare construction materials and tools
- Observe procedures, specifications and manual of instruction
- Perform mensuration and calculations
- Maintain tools and equipment
- Prepare pipes for installation
- Make pipe joints and connections
- Perform minor construction works

- Perform plumbing repair and maintenance works
- Conduct pipe leak test

Figure 8.20 Participants of the extension program “Dalubhasang Tubero” pose with Department Extension Coordinator Engr. Edna Arojado and the Dean of the College of Engineering, Dr. Remedios G. Ado, marking a successful and meaningful engagement in plumbing skills training aimed at community empowerment and practical engineering application

Figure 8.21 Participants of the “Dalubhasang Tubero” extension program are shown engaging in hands-on plumbing activities, applying practical skills and techniques as part of the community-based training initiative

4. Title: Salin Kaalaman: Advancing Sustainable Construction through Fiber-Reinforced Concrete Using Natural and Recycled Materials

In support of sustainable and innovative construction practices at the community level, the department will implement the extension project “Salin Kaalaman: Advancing Sustainable Construction through Fiber-Reinforced Concrete Using Natural and Recycled Materials” in 2025. The initiative introduces local stakeholders—including community representatives, local builders, and interested residents—to the concept of fiber-reinforced concrete, with emphasis on the use of natural and recycled materials as reinforcing fibers. It aims to raise awareness of sustainable construction techniques that can help reduce material waste, minimize environmental impact, and maximize the use of locally available resources.

The specific objectives of the project were to:

- Promote awareness of fiber-reinforced concrete using natural and recycled materials.
- Enhance community knowledge on sustainable and resource-efficient construction practices.
- Encourage the use of locally available and recyclable materials in small-scale construction.
- Support the adoption of practical, climate-resilient building techniques at the community level.

Through a series of lectures, demonstrations, and discussions, faculty members present the fundamental principles of fiber reinforcement, its practical applications in small-scale construction, and its relevance to climate-resilient and resource-efficient infrastructure. By translating technical knowledge into accessible learning experiences, the project promotes inclusive innovation and demonstrates how emerging engineering solutions can be adapted to local community contexts.

B.2. Community-Outreach Programs

The Civil Engineering Department has actively conducted and participated in various community-oriented programs through its community outreach services. These initiatives aim to address local needs while promoting social responsibility, civic engagement, and a sense of volunteerism among both faculty members and students.

The contributions of these programs have been invaluable in supporting the various initiatives of *Damay ng Dangal*. These include providing educational assistance to

underprivileged children, conducting health and wellness programs, and organizing environmental campaigns.

The dedication and commitment of the students and faculty members involved in these programs have made a significant impact on the lives of the people in the community. Their efforts have not only helped improve the quality of life of the beneficiaries but have also instilled a sense of purpose and fulfillment among the volunteers.

Here are the community-outreach programs spearheaded by the Civil Engineering department through the College of Engineering:

1. College of Engineering: Pamaskong Harana and Outreach Program

The "College of Engineering: Pamaskong Harana and Outreach Program" was a heartwarming outreach initiative held by the College of Engineering at the Polytechnic University of the Philippines, aimed at honoring and giving back to the often-unsung heroes of the campus, the janitors and security guards of the College of Engineering and Architecture (CEA).

Recognizing their tireless dedication and essential role in maintaining a safe, clean, and orderly learning environment, the faculty, staff, and students came together to organize a simple yet meaningful Christmas celebration. The event featured heartfelt performances through Pamaskong Harana, where students and faculty serenaded the beneficiaries with songs of gratitude and hope, embodying the spirit of bayanihan and community appreciation. In addition to the musical tribute, the program included gift-giving and shared meals, symbolizing the College's commitment not only to academic excellence but also to compassion and social responsibility. The initiative also served as an opportunity for students to develop a deeper understanding of servant leadership and empathy, essential values in the field of engineering.

The Pamaskong Harana and Outreach Program is a testament to the College of Engineering's mission to foster holistic development, where technical knowledge is coupled with genuine care for the people who help sustain the university's daily life. The event was conducted last December 20, 2024, at CEA Room 109.

Figure 8.22 Pamaskong Harana and Outreach Program 2024

2. Brgy. Paskuhan. Children Gift Giving 2022

The Brgy. Paskuhan: Children Gift Giving 2022 was a heartwarming outreach initiative spearheaded by the College of Engineering in collaboration with the Jesus Is Lord (JIL) Simoun chapter. Held during the festive Christmas season, the project was dedicated to bringing joy and hope to children from a partner barangay community, many of whom come from underprivileged backgrounds.

Rooted in the spirit of generosity and compassion, the program centered on the distribution of gifts and essential items to the children, creating a moment of celebration and warmth. Volunteers from the College of Engineering and JIL Simoun worked hand in hand to prepare care packages filled with toys, school supplies, snacks, and hygiene kits. The smiles and laughter of the children were a testament to the impact of even the simplest acts of kindness.

Beyond material support, the event also featured interactive games, storytelling sessions, and musical performances, transforming the activity into a full Christmas experience. The outreach fostered a sense of belonging and joy for the children, many of whom expressed excitement and gratitude for the thoughtful gesture.

Brgy. Paskuhan: Children Gift Giving 2022 showcased the College of Engineering's commitment to social responsibility and community engagement. It emphasized the value of faith-based partnerships, such as with JIL Simoun, in delivering meaningful service to the broader community. Through this project, the true essence of Christmas—sharing, unity, and love—was brought to life.

Figure 8.23 Volunteers from the College of Engineering are captured in action during the Brgy. Paskuhan: Children Gift Giving 2022, as they joyfully distribute gifts and spread holiday cheer to children, embodying the spirit of compassion and community service this Christmas season

3. Pamaskong Harana and Outreach Program: Celebrating the Spirit of Christmas through Service and Fellowship 2025

The Pamaskong Harana and Outreach Program, organized by the Department of Civil Engineering of the Polytechnic University of the Philippines, was held on December 18, 2025, at CEA Room 109 (CE AVR). The program was spearheaded by the College of Engineering

under the leadership of Dean Remedios G. Ado, with the support of Dr. Florante D. Poso Jr., Research and Extension Coordinator of the College, and Engr. Edna P. Arrojado, Extension and Community Outreach Coordinator of the Department of Civil Engineering. The program was dedicated to the personnel of the College of Engineering, particularly those from Housekeeping, Maintenance, and Security, together with their families, in recognition of their invaluable contributions to the daily operations of the college. Through this outreach, the Civil Engineering community expressed sincere appreciation for their commitment and service.

In line with the department's extension mandate, the activity featured a lecture on earthquake safety, emphasizing the importance of disaster awareness and preparedness. This educational component reinforced the department's commitment to translating engineering knowledge into meaningful and practical community service. The outreach was further enlivened through a harana or serenade, followed by fun games and a shared kainan, creating a warm and festive atmosphere that reflected the spirit of Christmas and collective gratitude.

Following the outreach program, a separate faculty fellowship was conducted at CEA Room 105, where members of the Civil Engineering faculty gathered to share food and engage in fellowship. This activity strengthened camaraderie within the department and provided an opportunity for reflection and appreciation, further reinforcing unity and collaboration among faculty members during the holiday season. Overall, the Pamaskong Harana and Outreach Program exemplified how the Department of Civil Engineering integrates celebration, education, and service—sharing the passion of Christmas through purposeful outreach, community care, and institutional solidarity.

Figure 8.24 Pamaskong Harana and Outreach Program at CEA Room 109

4. Project SOS: Saklolo on the Spot – Surviving the Shake and Strengthening the School Community

Project SOS: Saklolo on the Spot – Surviving the Shake and Strengthening the School Community was an earthquake preparedness outreach program organized by the BSCE 4-4 students of the Polytechnic University of the Philippines as part of the requirements for CIEN 408: Earthquake Engineering. Conducted at Balingasa High School, the initiative aimed to strengthen disaster awareness among students by equipping them with practical knowledge and essential skills to prepare for and respond to earthquake emergencies.

The program featured a series of engaging activities, including an opening program, an interactive Go Bag activity, informative discussions on earthquake hazards and preparedness, and sessions on proper evacuation procedures and hazard identification. Students also participated in creative group activities that reinforced their understanding of earthquake safety while encouraging teamwork, critical thinking, and active participation.

Throughout the event, the participants showed enthusiasm and responsiveness during the lectures, discussions, and activities. Their ability to identify safe practices, recognize hazards, and apply disaster preparedness concepts demonstrated that the program effectively transformed technical earthquake concepts into practical and meaningful learning experiences.

Figure 8.25 Earthquake Preparedness Program Conducted by BSCE 4-4

5. YANIG: Youth Awareness for Nurturing Informed Ground-Safety

YANIG: Youth Awareness for Nurturing Informed Ground-Safety was a community engagement program conducted by Civil Engineering students at Quirino High School to promote earthquake awareness and disaster preparedness among young learners. The initiative aimed to bridge engineering knowledge with community education by introducing earthquake concepts through interactive discussions, demonstrations, and experiential learning activities.

The program consisted of an opening ceremony, a keynote lecture on earthquake engineering and disaster resilience, and eight educational booth activities that demonstrated important concepts such as liquefaction, slope stability, emergency preparedness, first aid, and proper earthquake response. Participants also received mini “Go Bags” containing emergency essentials, allowing them to apply the lessons beyond the event.

The students actively participated in every station and responded positively to the hands-on activities, making the learning experience engaging and memorable. Despite minor logistical and technical challenges, the organizers successfully delivered all planned activities, and participant evaluations reflected high satisfaction with the overall program and its educational value. The outreach successfully achieved its objective of increasing earthquake awareness while strengthening partnerships between the university and the local community.

Figure 8.26 Earthquake Preparedness Program Conducted by BSCE 4-2

6. Super LISTO: Ang Wonder Kid na Laging Handa

Super LISTO: Ang Wonder Kid na Laging Handa was an earthquake preparedness outreach program designed for elementary students to introduce disaster awareness through fun, interactive, and age-appropriate learning activities. Developed as part of the Earthquake Engineering course, the program aimed to equip children with essential knowledge and practical skills to respond safely during earthquakes while encouraging them to become advocates of preparedness within their homes and communities.

The outreach featured a series of mini talks, storytelling sessions, interactive games, and hands-on activities that taught participants about earthquakes, safe and unsafe places during emergencies, emergency Go-Bag essentials, and the importance of strong structures and prepared communities. These activities encouraged active participation and reinforced disaster preparedness concepts in a creative and engaging manner, making the lessons easy for young learners to understand and remember.

Overall, the program successfully promoted earthquake awareness among children by combining education with enjoyable learning experiences. Beyond strengthening the participants' preparedness, the outreach also provided valuable opportunities for the organizers to develop leadership, teamwork, and community engagement skills while contributing to the long-term goal of building safer and more disaster-resilient communities.

Figure 8.27 Earthquake Preparedness Program Conducted by BSCE 4-5

7. Project QuakeSmart: Bida ang Batang Handa

Project QuakeSmart: Bida ang Batang Handa was a community extension initiative conducted by the BSCE 4-3 students of the Polytechnic University of the Philippines at Pio Del Pilar Elementary School. The program aimed to strengthen the earthquake preparedness of Grade 6 students by equipping them with essential knowledge and practical skills on disaster risk reduction. Through this initiative, the organizers translated engineering concepts into age-appropriate lessons that promoted safety, awareness, and community resilience.

The activity featured informative discussions on earthquake hazards, preparedness measures, and proper response before, during, and after an earthquake. Participants rotated through interactive learning stations where they practiced the "Duck, Cover, and Hold" technique, learned about emergency go-bags, family preparedness plans, evacuation procedures, and post-earthquake safety. To further reinforce disaster readiness, first aid kits were distributed to both the students and the school, providing tangible resources that support emergency response efforts.

Overall, the participants actively engaged in the discussions and demonstrations, while teachers commended the structured and practical approach of the program. Project QuakeSmart successfully achieved its objective of promoting a culture of preparedness among young learners and demonstrated the important role of future civil engineers in advancing disaster awareness, community engagement, and public safety.

Figure 8.28 Earthquake Preparedness Program Conducted by BSCE 4-3

8. Kampo Kamalayan: A Trail to Resilient and Confident Heroes

Kampo Kamalayan: A Trail to Resilient and Confident Heroes was an inclusive earthquake preparedness outreach program organized by the BSCE 4-1 students for learners with autism at the Special Needs Education (SNED) Department of Legarda Elementary School. Recognizing the unique needs of children with autism, the program was designed to provide disaster preparedness education through structured, sensory-friendly, and developmentally appropriate learning activities that fostered confidence and understanding.

The outreach featured five interactive learning stations that introduced participants to earthquake concepts, proper emergency response, safe evacuation practices, emergency go-bag essentials, and decision-making during disasters. Using tactile models, visual guides, role-playing activities, and adaptive teaching strategies, the organizers created an engaging environment where each learner could participate comfortably and progress at their own pace. Upon completing the stations, participants received preparedness loot bags and recognition for their accomplishments, reinforcing both learning and participation.

The program received positive feedback from both students and teachers, who appreciated its inclusive and well-structured approach to disaster education. Kampo Kamalayan successfully demonstrated that earthquake preparedness can be made accessible to all learners through thoughtful program design, while emphasizing the

importance of empathy, inclusivity, and community partnership in building disaster-resilient communities.

Figure 8.29 Earthquake Preparedness Program Conducted by BSCE 4-1

9. PUPCE Handang Bayan: Earthquake Preparedness for Everyone

PUPCE Handang Bayan: Earthquake Preparedness for Everyone was a community outreach initiative organized by the BSCE 4-6 students at Moisés Salvador Elementary School to promote earthquake preparedness among elementary learners. The program aimed to bridge engineering education and community service by introducing earthquake concepts, disaster awareness, and emergency preparedness through interactive and age-appropriate learning activities. By empowering students with practical knowledge, the initiative sought to cultivate a culture of safety that extends beyond the classroom and into the wider community.

The activity included discussions on earthquake science, structural safety, and disaster risk reduction, followed by demonstrations of essential emergency go-bag items and the proper execution of the "Drop, Cover, and Hold On" technique. Interactive games and quizzes reinforced the lessons learned, allowing participants to apply their knowledge in an enjoyable and engaging manner while encouraging active participation throughout the program.

The initiative successfully enhanced the disaster preparedness and confidence of the participating students, who demonstrated a clear understanding of earthquake safety and expressed their willingness to share what they learned with their families. Beyond achieving its educational objectives, the outreach also strengthened the organizers' commitment to

community service and social responsibility, highlighting the significant role of civil engineering students in promoting public safety and resilience.

. **Figure 8.30** Earthquake Preparedness Program Conducted by BSCE 4-6

Table 8.12 Civil Engineering Community Outreach Activities

CES ACTIVITY	OBJECTIVES	DATE CONDUCTED	NO. OF BENEFICIARIES	EVALUATION RESULTS
Damay ng Dangal - "Tuloy-tuloy na Pagtulong sa Inaasam na Pagbabago,"	To deliver Christmas packets that include a sharing time and to disseminate information and skills from the individual colleges to the community.	December 10, 2022	558	The performance of the extension program Damay ng Dangal Gift Giving 2022 overall rating of 4.74 (Excellent) , it shows how happy the participants with the extension initiatives implemented last December 10, 2022 for 6 barangay.
Jolly Christmas	To give treats to children of PNC Employee	December 12, 2022	99	The rating of 4.76 (Excellent)

	ages 1 -13			shows how happy the kids and PNC Community with the extension initiatives
Call for Donation - Bagyong Paeng Donation Drive	To assist the communities affected by Typhoon Paeng under the municipality of Cabuyao.	October 30, 2022	80+	The Donation drive conducted got an excellent rating of 4.75
Damay ng Dangkal – Tulong sa Panahon ng Pandemya	To help students who struggles financially during online classes.	October 19-20, 2021	10	The extension program Damay ng Dangkal Gift Giving Tulong sa Panahon ng Pandemya for selected student got an excellent rating of 5
				from the selected students.
	To help and donate to the people affected by Typhoon	November 14 - 21, 2020	320+	The Donation drive conducted by the USG and CSG officers got an excellent rating of 4.86
Community Pantry	To establish the Gulod Community Pantry, which strives to offer basic necessities to the residents of Brgy. Gulod, Cabuyao, Laguna	April 2021	300+	The Community Pantry conducted got an excellent rating of 4.88

Outreach Activity "Earthquake Awareness and Preparedness : "Kampo Kamalayan: A Trail to Resilient and Confident Heroes	To enhance the awareness and preparedness of students and school personnel of Legarda Elementary School in responding to earthquake hazards	December 9, 2025	100+	The Community Outreach program conducted got an excellent rating of 4.85
Community Earthquake Engagement: "YANIG: Youth Awareness for Nurturing Informed Ground-Safety	To strengthen the knowledge and preparedness of the youth in responding to earthquake hazards	December 9, 2025	100+	The Community Outreach program conducted got an excellent rating of 4.86
Community Earthquake Awareness and Preparedness : PUPCE Handang Bayan: Earthquake Preparedness for Everyone	To promote widespread awareness and readiness among community members in responding to earthquake hazards	December 4, 2025	100+	The Community Outreach program conducted got an excellent rating of 4.85
Community Earthquake Awareness and Preparedness : Project SOS: Saklolo on the Spot – Surviving the Shake and Strengthening the School Community	To enhance the preparedness of students, teachers, and school personnel in responding effectively to earthquake hazards	November 24, 2025	100+	The Community Outreach program conducted got an excellent rating of 4.86

Community Earthquake Awareness and Preparedness : Project Quakesmart: Bida ang Batang Handa	To equip the students of Pio Del Pilar Elementary School with essential earthquake preparedness knowledge and life-saving skills through interactive seminars and practical demonstrations to ensure their safety and resilience during disasters.	December 5, 2025	100+	The Community Outreach program conducted got an excellent rating of 4.88
Community Earthquake Awareness and Preparedness : SUPER LISTO: Ang Wonder Kid na Laging Handa	To empower elementary students with essential earthquake preparedness and safety knowledge through engaging, interactive, and age-appropriate activities.	January 5, 2026	50 +	The Community Outreach program conducted got an excellent rating of 4.84

C. Engagement in Professional Practice

Engineering faculty members are not just limited to teaching in the classroom. They also provide extension services to share their knowledge and expertise with the community. The faculty of Civil Engineering provides a range of consultancy and non-teaching services to both professionals and the wider community.

The department offers consultancy and other services (non-teaching) to professionals and the community. Table 8.13 shows some of the consultancy and other services (non-teaching) currently conducted by the faculty members.

Table 8.13 Consultancy and Other Services Extended (Non-Teaching) by Faculty Members

FACULTY NAME	TYPE OF ACADEMIC APPOINTMENT	STATUS	CONSULTANCY AND OTHER SERVICES EXTENDED (NON-TEACHING)
Dr. Florante D. Poso, Jr.	Full-Time	Permanent	Secretariat, Philippine Association of Engineering Schools PTC-ACBET Accreditor PAASCU Accreditor TAAS Journal Paper Reviewer
Engr. Kenneth Bryan M. Tana	Full-Time Chairperson	Permanent	AACCUP Accreditor
Dr. Manuel M. Muhi	Full-Time President	Permanent	PTC Evaluator
Lorenzo Galicia	Full-Time	Permanent	TAAS Attendee

Figure 8.31 Official Travel Order for PAASCU Accreditation Participation

Figure 8.32 Official Travel Orders for Technical Assistance and Advisory Services (TAAS)

Figure 8.33 Official Travel Orders for DOST–PNRI Collaborative Activities

As part of their continued engagement with the broader engineering community, several Civil Engineering faculty members were invited to serve as resource speakers and technical presenters in various local and national forums, seminars, and workshops organized by higher education institutions, professional organizations, and government agencies. These speaking engagements covered a wide range of topics, including structural engineering

innovations, sustainable infrastructure, transportation planning, geotechnical advancements, and engineering education.

In addition to serving as resource speakers and technical presenters, faculty members from the Institute of Technology (ITECH) and Civil Engineering programs actively participated in Faculty Immersion activities with industry and community partners. These immersion experiences provided valuable opportunities for faculty members to gain firsthand exposure to current technologies, industry best practices, sustainable development initiatives, and emerging trends relevant to their respective fields of specialization. Through direct interaction with practitioners and experts, participants were able to broaden their professional perspectives and acquire practical insights that complement their academic expertise.

The Faculty Immersion Program also served as a platform for strengthening linkages between the University and external organizations, fostering potential collaborations in instruction, research, extension, and training initiatives. The knowledge and experiences gained from these engagements contribute significantly to curriculum enhancement, the development of industry-relevant learning activities, and the continuous improvement of teaching and learning processes. By participating in such activities, faculty members are better equipped to deliver current and practice-oriented instruction, ensuring that both the ITECH and Civil Engineering programs remain responsive to the evolving demands of industry, technology, and society. Evidence of faculty participation and successful completion of the immersion activity is presented in Figure 8.34 through the Certificate of Completion awarded to participating faculty members.

Figure 8.34 Certificate of Completion to Lorenzo Galicia for completing the Faculty Industry Immersion Program

By sharing their specialized knowledge, research findings, and professional experiences, faculty members actively contribute to the dissemination of current engineering practices and emerging technologies. This level of involvement not only strengthens linkages between the academe and industry but also enhances the credibility and visibility of the CE program within professional circles.

These activities directly address Student Outcome (SO) 9 – Recognize the need for, and engage in lifelong learning, as they exemplify the faculty’s commitment to continuous professional development and the advancement of engineering knowledge. Furthermore, they indirectly support SO 7 – Communicate effectively, by modeling effective oral and technical communication in diverse professional settings.

To monitor the performance and impact of these engagements, the department maintains documentation including speaker invitations, program brochures, certificates of participation, and feedback from organizing bodies. Insights and materials gathered from these events are often integrated into classroom instruction, ensuring that students benefit from current and real-world engineering practices, and are inspired to pursue professional involvement in the future.

Table 8.14 CE Faculty Members invited as Resource Speakers/Presenters

FACULTY NAME	DETAILS OF THE EVENT
Kenneth Bryan M. Tana	2nd International Conference on Innovative Research in Science, Technology & Management (ICIRSTM-II 2018) Date: September 29-30, 2018 Host Venue: U-Town (National University of Singapore), Singapore Organized by: International Institute of Research & Journals
	The International Conference on Sustainable Science and Technology 2025 (ICSST 2025) Theme: "Green Solutions for Climate Change Adaptation" Date: October 31, 2025 Host Venue: Nguyen Tat Thanh University, Ho Chi Minh City, Vietnam
Florante D. Poso, Jr.	15th International Conference on Humanoid, Nanotechnology, Information Technology, Communication and Control, Environment, and Management (HNICEM 2023) Dates: November 19-23, 2023 Host Venue: TAG Resort, Coron, Philippines Mode: Hybrid Conference
	Crack Analysis, Repair & Control in Mass Concrete Structures Date: January 9, 2024 Hosted by: Upswing Learning Center Venue: Zoom App Webinar
	Settlement & Stability Analysis of Foundations Structures Date: January 12, 2024 Hosted by: Upswing Learning Center Venue: Zoom App Webinar
	Surveying Methods and Its Application to Site Construction & Estimates Date: January 15, 2024 Hosted by: Upswing Learning Center Venue: Zoom App Webinar
	Concreting Works Estimate Methods in Construction Projects Date: January 16, 2024 Hosted by: Upswing Learning Center Venue: Zoom App Webinar
	Thermal Cracking in Mass Concrete and the Recent Prevention Practices in Hot Weather Condition Date: January 22, 2024 Hosted by: Upswing Learning Center Venue: Zoom App Webinar

	Slope Stability Analysis of Embankment & Dams Date: January 23, 2024 Hosted by: Upswing Learning Center Venue: Zoom App Webinar
	Design of Earth Dams by Numerical Modeling Date: January 29, 2024 Hosted by: Upswing Learning Center Venue: Zoom App Webinar
	Basics of Irrigation Engineering Date: January 30, 2024 Hosted by: Upswing Learning Center Venue: Zoom App Webinar
	Soil Exploration and Analysis for Engineering Utilization Date: February 6, 2024 Hosted by: Upswing Learning Center Venue: Zoom App Webinar
	Crack Analysis, Repair & Control in Mass Concrete Structures Date: February 9, 2024 Hosted by: Upswing Learning Center Venue: Zoom App Webinar
	Settlement & Stability Analysis of Foundations Structures Date: February 13, 2024 Hosted by: Upswing Learning Center Venue: Zoom App Webinar
	Basics of Irrigation Engineering Date: February 20, 2024 Hosted by: Upswing Learning Center Venue: Zoom App Webinar
	Thermal Cracking in Mass Concrete and the Recent Prevention Practices in Hot Weather Condition Date: February 27, 2024 Hosted by: Upswing Learning Center Venue: Zoom App Webinar
	Civil Engineering Research Colloquium 2024 Theme: "Building a Sustainable Future: Innovations and Practices in Civil Engineering" Date: May 15, 2024 Host Venue: Adamson University, Manila
	SPARKS 2024: Engineering Symposium Theme: "The COECSA Sustainability & Progressive Advances in Research and Knowledge Symposium 2024" Date: May 22, 2024 Host Venue: Lyceum of the Philippines University, General Trias City, Cavite, Philippines

	DPWH Research Symposium 2024 Theme: "Construction Breakthroughs" Date: October 18, 2024 Host Venue: University of the Philippines-Diliman, Quezon City, Philippines
	42nd Conference of the ASEAN Federation of Engineering Organizations Theme: "Charting ASEAN Growth with Digital Transformation, Smart Engineering and Green Solutions" Dates: October 22-24, 2024 Host Venue: Sabah International Convention Centre, Kota Kinabalu, Sabah, Malaysia
	16th International Conference on Humanoid, Nanotechnology, Information Technology, Communication and Control, Environment, and Management (HNICEM 2024) Dates: November 26-29, 2024 Host Venue: Hotel Supreme Convention Plaza, Baguio City, Philippines Mode: Hybrid Conference
	9th International Conference on Green Urbanism Dates: November 25–27, 2025 Main Host Venue: Sapienza University of Rome, Italy Mode: In-person (organized by IEREK)
Ruffa S. Roxas	The International Conference on Engineering Education (ICEE 2025) Theme: "Innovating Engineering Education for a Sustainable and Digital Future" Dates: September 12–13, 2025 Host Venue: University of Santo Tomas (UST), Manila Occasion: Celebrated the 70th Anniversary of PAES
	The International Conference on Sustainable Science and Technology 2025 (ICSST 2025) Theme: "Green Solutions for Climate Change Adaptation" Dates: October 31, 2025 Host Venue: Nguyen Tat Thanh University, Ho Chi Minh City, Vietnam
	9th International Conference on Green Urbanism Dates: November 25–27, 2025 Main Host Venue: Sapienza University of Rome, Italy Mode: In-person (organized by IEREK)
Lorenzo Galicia	Environmental Integration on Sustainable Perspective and Beyond (EISPB)

	Dates: April 10–12, 2025 Primary Venue: Polytechnic University of the Philippines, Sta. Mesa, Manila Mode: In-person (with some hybrid/online components often supported by IEREK)
	The International Conference on Engineering Education (ICEE 2025) Theme: "Innovating Engineering Education for a Sustainable and Digital Future" Dates: September 12–13, 2025 Host Venue: University of Santo Tomas (UST), Manila Occasion: Celebrated the 70th Anniversary of PAES
	The International Conference on Sustainable Science and Technology 2025 (ICSST 2025) Theme: "Green Solutions for Climate Change Adaptation" Dates: October 31, 2025 Host Venue: Nguyen Tat Thanh University, Ho Chi Minh City, Vietnam
	9th International Conference on Green Urbanism Dates: November 25–27, 2025 Main Host Venue: Sapienza University of Rome, Italy Mode: In-person (organized by IEREK)
Ramir M. Cruz	The International Conference on Engineering Education (ICEE 2025) Theme: "Innovating Engineering Education for a Sustainable and Digital Future" Date: September 12, 2025 Host Venue: University of Santo Tomas (UST), Manila
Razon C. Domingo	The International Conference on Engineering Education (ICEE 2025) Theme: "Innovating Engineering Education for a Sustainable and Digital Future" Date: September 12, 2025 Host Venue: University of Santo Tomas (UST), Manila
Crispin Lictaoa	7th Regional Conference on Campus Sustainability Theme: "Campus Sustainability and Green Technologies: Innovation, Challenges, and Prospects under the New Normal" Date: March 23, 2023 Host Venue: Adamson University, Manila, Philippines
	Week-Long Visiting Professor Program Topic: "English for Construction"

	Date: March 15, 2024 Host Venue: Nguyen Tat Thanh University, Ho Chi Minh City, Vietnam
	8th Regional Conference on Campus Sustainability 2024 Dates: April 24-26, 2024 Host Venue: University Malaysia Sabah, Malaysia
	2024 PICE Midyear National Convention, International Engineering Expo and Technical Conference Theme: "Building Global Partnerships, Bridging Boundaries, and Fostering New Technologies Towards a More Resilient and Sustainable Development" Date: June 13-15, 2024 Host Venue: SMX Convention Center Manila, Mall of Asia Complex, Pasay City, Philippines
Manuel R. Trinidad, Jr.	DPWH Research Symposium 2022 Theme: "Smart Construction" Date: October 14, 2022 Host Venue: University of the Philippines-Diliman, Quezon City, Philippines
Donamel M. Saiyari	Engineering Expo and Forum, 2025 PICE Midyear National Convention and Technical Conference Date: June 25-27, 2025 Host Venue: Iloilo Convention Center, Iloilo City
	Civil Engineering Seminar Date: June 7, 2025 Host Venue: FEU Institute of Technology
	Seminar Series on Environmental Engineering and Management Date: May 8, 2025 Host Venue: College of Engineering, Bicol University
	The Power of Environmental Engineering Towards Climate Resilience Date: April 4, 2025 Host Venue: Adamson University
	Kaizen Principle Application for a Zero-Waste Goal in Building Construction Date: June 1, 2024 Host Venue: Far Eastern University, FEU Tech Main Building
	A Primer to Waste Management in Design and Construction Management Towards Zero Waste Buildings Date: May 4, 2024 Host Venue: Prince Building, 117 Rada, Legazpi Village, Makati City

	GLOWE (Global League of Women Engineers) Hybrid Event for Women's Day Celebration: Diverse Voices, Collective Impact Celebrating Women in Engineering and Environmental Leadership Date: March 22, 2024 Host Venue: Winford Hotel & Casino, Manila
	World's Water Day Symposium Date: March 20, 2024 Host Venue: De La Salle University, Manila
	PICE (Philippine Institute of Civil Engineers) Quezon City Chapter Webinar in Celebration of International Women's Month Date: March 19, 2024 Host Venue: Online Webinar
	Exploration Research Fragments: A Webinar Series 1.0, "Writing results and conclusion" Date: March 3, 2023 Host Venue: Northwest Samar State University
	Undergraduate Chemical Engineering Symposium (UCHES) Theme: ChE You Tomorrow: Building Chemical Engineers of our Future Date: September 21, 2022 Host Venue: Malayan Colleges Laguna
