A LEADING COMPREHENSIVE
POLYTECHNIC UNIVERSITY IN ASIA

QUALITY MANAGEMENT
SYSTEM IS CERTIFIED
ACCORDING TO ISO 9001

EDUCATIONAL ORGANIZATION
MANAGEMENT SYSTEM IS CERTIFIED
ACCORDING TO ISO 21001

CRITERION I. PROGRAM EDUCATIONAL OBJECTIVES

Program Educational Objectives (PEOs) for the Civil Engineering program have been published on the university website, course catalogue, and department bulletin board. They are consistent with the mission and vision of the Polytechnic University of the Philippines. These objectives were developed in consultation with the program's stakeholders and are periodically reviewed and evaluated.

A. Vision and Mission Statement

Provide the institutional vision and mission statements.

The vision and mission statements of Polytechnic University are published on the school's website (<https://www.pup.edu.ph/about/vm>), faculty, employees, and student manuals, Outcomes-Based Teaching Learning Plan (OBTLP) / syllabus, and quality management system manual. This is also posted in strategic locations inside the campus.

This vision and mission of the university were approved by the Board of Regents as incorporated in the University Development Plan for 2024-2028 dated 31

May 2024 under Board Resolution No. 3587 series of 2024. ([Attachment C1-01 – Board Resolution No. 3587](#))

The Polytechnic University of the Philippines officially implemented the following Vision and Mission statements during the academic period of 2022. This batch marked the first cohort enrolled under the 2018 Civil Engineering curriculum, which was aligned with the 2017 Commission on Higher Education (CHED) Memorandum Order (CMO) provisions.

At that time, the University adopted the following Vision and Mission:

It is important to note that while this Vision and Mission guided the university during the implementation of the 2018 curriculum for civil engineering students, a new and updated Vision and Mission have since been enacted to reflect the evolving goals and direction of the university.

Previously, in 2018, during the start of the 2018 curriculum, the vision-mission of the university is as follows:

VISION

Clearing the paths while
laying new foundations to
transform the Polytechnic
University of the
Philippines into an
epistemic community.

MISSION

Reflective of the great emphasis being given by the country's leadership aimed at providing appropriate attention to the alleviation of the plight of the poor, the development of the citizens, and of the national economy to become globally competitive, the University shall commit its academic resources and manpower to achieve its goals through:

- 1 Provision of undergraduate and graduate education which meet international standards of quality and excellence.
- 2 Generation and transmission of knowledge in the broad range of disciplines relevant and responsive to the dynamically changing domestic and international environment.
- 3 Provision of more equitable access to higher education opportunities to deserving and qualified Filipinos; and
- 4 Optimization, through efficiency and effectiveness, of social, institutional, and individual returns and benefits derived from the utilization of higher education resources.

B. Program Educational Objectives

List the program educational objectives, and state where the general public can find these.

Program Educational Objectives (PEOs) are broad statements that describe the career and professional accomplishment of the program in preparing graduates to achieve within 3-5 years from graduation. The current PEO of the Bachelor of Science in Civil Engineering was also approved by the Board of Regents through a Board Referendum No. 162, Series of 2024 dated September 27, 2024. ([Attachment C1-02 – Board Referendum No. 162 s 2024](#))

PROGRAM EDUCATIONAL OBJECTIVES (PEO)

BS CIVIL ENGINEERING

POLYTECHNIC UNIVERSITY OF THE PHILIPPINES

Three to five years after graduation, the **BS Civil Engineering alumni** shall be:

01

Employed and/or practiced in the field of Civil Engineering such as but not limited to Construction Engineering and Management, Geotechnical Engineering, Structural Engineering, Transportation Engineering, and Water Resources Engineering, or other related fields (Demonstrating Engineering Profession).

02

Committed members of professional and other allied organizations engaging in community development and nation-building (Social and Ethical Responsibility).

03

Involved in continuous training and development in current trends and advancements in their fields of specialization (Lifelong Learning).

These PEOs are published on the school's website (<https://www.pup.edu.ph/ce/BSCE>), OBTLP / syllabus, Catalog, and Bulletin boards. ([Attachment C1-03 – Sample Syllabus](#))

Previously, in 2022, the following Program Educational Objectives (PEOs) guided the academic direction and professional development of the civil engineering students:

PROGRAM EDUCATIONAL OBJECTIVES (PEO)

BS CIVIL ENGINEERING

POLYTECHNIC UNIVERSITY OF THE PHILIPPINES

Three to five years after graduation, the Bachelor of Science in Civil Engineering alumni shall:

PEO
1

In the field of Construction Engineering and Management, Structural Engineering, Transportation Engineering, Water Resources Engineering, Geotechnical Engineering, or other related fields (Demonstrating Engineering Profession).

PEO
2

Committed members of professional and other allied organizations engaging in community development and nation-building (Social and Ethical Responsibility).

PEO
3

Involved in continuous training and development in current or emerging trends, and advancement in their chosen field of specialization (Lifelong Learning).

These objectives were intended to reflect the university's mission of producing industry-ready, socially responsible, and lifelong learners in the civil engineering profession.

However, in response to the dynamic demands of the civil engineering profession and the valuable feedback of the Government-Industry Advisory Board (GIAB), the BSCE program adopted a revised set of Program Educational Objectives (PEOs). These updated objectives were formulated to ensure stronger alignment with current industry practices, technological advancements, and the evolving expectations for civil engineering graduates.

On April 11, 2024, the Government-Industry Advisory Board (GIAB) was formally convened and held its first meeting to discuss concerns regarding the revision of the PEOs. During this meeting, the Board provided recommendations that were taken into consideration in reviewing and improving the department's teaching and learning processes. ([Attachment C1-04 – GIAB Minutes of Meeting dated April 11, 2024](#)). A year later, the GIAB convened again on May 30, 2025, to review the

department's accomplishments and discuss recommendations. ([Attachment C1-05 – GIAB Minutes of Meeting dated May 30, 2025](#)).

The Board convened again during its second GIAB meeting on March 16, 2026. The discussion focused on the assessment results of the Program Educational Objectives (PEOs) and Student Outcomes (SOs). Suggestions from representatives of the various sectors were likewise noted for further discussion and consideration in enhancing the BSCE curriculum. ([Attachment C1-06 – GIAB Minutes of Meeting dated March 16, 2026](#))

Table 1-1. Meetings of GIAB

No.	Date of GIAB Meetings
1	<u>April 11, 2024</u>
2	<u>May 30, 2025</u>
3	<u>March 16, 2026</u>

This revision demonstrates the university's commitment to continuous quality improvement and stakeholder engagement, ensuring that the civil engineering program remains relevant, responsive, and globally competitive.

In 2018, the Polytechnic University of the Philippines (PUP) implemented a revised curriculum for the Bachelor of Science in Civil Engineering (BSCE) program, aligned with the 2017 CHED Memorandum Order. The first cohort to be enrolled under this new curriculum was Batch 2018.

Previously, in 2018, during the start of the implementation of the CHED CMO series 2017 and the 2018 BSCE curriculum, the department implemented the following department objectives:

1. Strengthen the Civil Engineering program consistent with global trends;
2. Develop faculty as competent mentors and quality researchers, through advanced study and other facets of continuing professional education;
3. Develop critical thinking and communication skills of students; giving emphasis to research and extension services;

4. Equip graduates with appropriate knowledge and technical skills, imbued with desirable work attitude and moral values through enhanced teaching/learning process by using multi-media facilities on top of traditional methods;
5. Create a conducive teaching and learning atmosphere with emphasis to faculty and students' growth and academic freedom;
6. Establish network with educational institution industry, GO's and NGO's, local and international which could serve as:
 - a. Funding sources and/or partners of researchers;
 - b. Sources of new techniques;
 - c. Centers for faculty and student exchange programs and On – the – Job Training, and;
 - d. Grantees of scholarship/additional facilities, and;
7. Continuously conduct action research on the needs of laboratory and other facilities that could be locally produced or innovated using local materials and adapted technologies.

C. Consistency of the Program Educational Objectives with the Vision and Mission of the Institution

Describe how the program educational objectives are consistent with the vision and mission of the institution.

The Program Educational Objectives (PEOs) were formulated from the attributes of PUP Graduate known as the Graduate Attributes. These attributes were derived from the institution's core values, namely listing all the CORE VALUES. The core values are known as the PUP pride and integrity which is taken from the vision and mission statements of the University. Table 1-2a shows the consistencies of PEOs with the current Vision and Mission statement of PUP, while Table 1-2b shows the consistencies of PEOs with the old Vision and Mission statement of PUP. Two different versions of vision and mission were presented to showcase the transition of the change of vision and mission from 2018 up to the current period.

Table 1-2a. Consistency of the Program Educational Objectives with the current Vision and Mission of the Institution

Program Educational Objectives	VISION	MISSION (2024)					
	<i>PUP: A Leading Comprehensive Polytechnic University in Asia</i>	<i>Provide democratized access to educational opportunities for the holistic development of individuals with global perspective.</i>	<i>Offer industry-oriented curricula that produce highly skilled professionals with managerial and technical capabilities and a strong sense of public service for nation building</i>	<i>Embed a culture of research and innovation</i>	<i>Continuously develop faculty and employees with the highest level of professionalism</i>	<i>Engage public and private institutions and other stakeholders for the attainment of social development goal</i>	<i>Establish a strong presence and impact in the international academic community</i>
Three to five years after graduation, the Bachelor of Science in Civil Engineering alumni shall be: 1. In the fields of Construction Engineering and Management, Structural Engineering, Transportation Engineering, or Water Resources Engineering, or Geotechnical Engineering, or other related fields.	✓	✓	✓	✓		✓	
2. Committed members of professional and other allied organizations engaging in community development or nation-building.	✓	✓	✓		✓	✓	
3. Involved in continuous training and development in current trends and advancements in their fields of specialization.	✓	✓		✓	✓		✓

Table 1-2b. Consistency of the Program Educational Objectives with the 2022 Vision and Mission of the Institution.

Program Educational Objectives	VISION	MISSION (Advance an Inclusive) 2022					
	<i>PUP: The National Polytechnic University</i>	<i>Provide democratized access to educational opportunities for the holistic development of individuals with global perspective</i>	<i>Offer industry-oriented curricula that produce highly skilled professionals with managerial and technical capabilities and a strong sense of public service for nation building</i>	<i>Embed a culture of research and innovation</i>	<i>continuously develop faculty and employees with the highest level of professionalism</i>	<i>engage public and private institutions and other stakeholders for the attainment of social development goal</i>	<i>establish a strong presence and impact in the international academic community</i>
Three to five years after graduation, the Bachelor of Science in Civil Engineering alumni shall be:							
1. Employed and/or practiced in the field of Civil Engineering, such as but not limited to Construction Engineering and Management, Geotechnical Engineering, Structural Engineering, Transportation Engineering, and Water Resources Engineering, or other related fields.	✓	✓	✓	✓		✓	
2. Committed members of professional and other allied organizations engaging in community development or nation-building.	✓	✓	✓		✓	✓	
3. Involved in continuous training and development in current trends and advancements in their fields of specialization.	✓	✓		✓	✓		✓

C.1 Consistency of the Program Education Objectives with the Vision of the Institution

PEO1 is consistent with the vision of the first national Polytechnic University as evidenced by graduates who are employed and/or practicing in the field of Civil Engineering such as but not limited to Construction Engineering and Management, Geotechnical Engineering, Structural Engineering, Transportation Engineering, and Water Resources Engineering, or other related fields. This is demonstrated in the tracer studies conducted by the institution. Also, PEO1 is consistent with the vision to develop globally competitive and value-laden professionals and leaders, considering that PUP graduates can demonstrate their skills needed by the industry by providing relevant training and seminars in the field of specialization for the students of their Alma Mater. In addition, PEO1 is also consistent with the vision instrumental to community development and nation-building, by involving the graduates in different community and extension services and activities of PUP.

PEO2. “Committed members of professional and other organizations engaging in community development or nation-building.” is consistent with the vision as the first national Polytechnic University as evidenced by graduates who possess globally competitive skills evidenced by certificates of graduates in Training, Seminars, Workshops provided by recognized certifying bodies. Also, PEO2 is consistent with the vision to develop globally competitive and value-laden professionals and leaders as demonstrated by the graduates who are employed in different international and multi-national companies relevant to their field of specialization. In addition, PEO2 is also consistent with the vision instrumental to community development and nation-building, as demonstrated by implemented or commercialized internationally presented or published papers.

PEO3. “Involved in continuous training and development in current trends and advancements in their fields of specialization.” relies on continuous learning and applying advancements in civil engineering education. Graduates are also expected to obtain certifications and competencies that will contribute to the enhancement of their skills.

C.2 Consistency of the Program Education Objectives with the Mission of the Institution

PEO1, — “Employed and/or practiced in the field of Civil Engineering such as but not limited to Construction Engineering and Management, Geotechnical Engineering, Structural Engineering, Transportation Engineering, and Water Resources Engineering, or other related fields.”, is aligned with the mission statement “equip individuals with knowledge, skills, and values”. Also, PEO1, — “be employed/or practiced in the field of

civil engineering,” is addressed in the mission statement, “that will enable them to achieve professional goals”.

PEO2, — “Committed members of professional and other allied organizations engaging in community development or nation-building”. Moreso, PEO2 is evident in the mission statement, “*engage public and private institutions and other stakeholders for the attainment of social development goal,*”. Lastly,

PEO3, — “Involved in continuous training and development in current trends and advancements in their fields of specialization.” is consistent with the mission statements, “*Provide democratized access to educational opportunities for the holistic development of individuals with global perspective*” and “*continuously develop faculty and employees with the highest level of professionalism*”, as evidenced by feedback from employers, professional societies, and community on work ethics demonstrated by the Alumni.

D. Program Constituencies and Stakeholders

List the program constituencies and stakeholders. Describe how the program educational objectives meet the current and future needs of these constituencies and stakeholders.

Constituencies are bodies that influence decisions (e.g. Alumni, Employers, Industry, APO). Stakeholders are persons or entities with interest or concern in something (e.g. Students, Parents, Faculty Members, Community, Regulatory Bodies).

D.1 Program Constituencies

The program constituencies of the Civil Engineering program are members of professional organizations, employers, alumni, faculty members, and students. A Government–Industry Advisory Board (GIAB) was created to facilitate consultation with the program constituencies.

The current members of the **Government–Industry Advisory Board** for Civil Engineering for SY 2023 – 2026 are listed in Table 1-3.

Table 1-3. Industry Advisory Board for BS Civil Engineering Program

NAME	GIAB Representation	COMPANY	Alumni/ Industry/ Prof. Organization	E-MAIL ADDRESS
Dr. Emmanuel C. De Guzman	Chair	Polytechnic University of the Philippines	VPAA	ecdeguzman@pup.edu.ph vpaa@pup.edu.ph

Engr. Abner Bondoc	Member, Geotechnical Engineering Specialist	Reinforced Earth Company Philippines	Industry	abner.bondoc@reinforcedearth.com

Dr. Donamel M. Saiyari	Member, Water Resource Engineering Specialist	Department of Science and Technology	Industry	dmsaiyari@pup.edu.ph
Engr. Jonathan V. Aquino	Member, Alumni Representative	Katahira & Engineers Asia Inc	Alumnus	jonathan.v.aquino@gmail.com
Engr. Ramir M. Cruz	Member, Faculty representative	Polytechnic University of the Philippines	Faculty (Former Chairperson, CE Dept.)	rm.cruz@pup.edu.ph
Tristan R. Suayan	Member, Student Representative	Polytechnic University of the Philippines	Student	tristansuayan@gmail.com

D.2 PEOs Meeting the needs of the program constituencies

To ensure that the needs of program constituencies are met, the PEOs were formulated in consultation with the members of professional organizations, employers, alumni, faculty members, and students through regular advisory board meetings, feedback on the latest trends in industry desired competency skills and knowledge among others discussed during meetings and considered in the PEOs. This also ensures that the PEOs are relevant to the changing needs of the program constituencies.

E. Process for Formulation, Review, and Revision of the Program Educational Objectives.

Describe the process for the formulation and periodic review and revision, as necessary, of the program educational objectives including how the program’s various constituencies are involved in this process. Include the results of this process and provide a description of any changes that were made to the program educational objectives and the timeline associated with those changes since the last general review.

Survey results and such other information as maybe available which are used in the process of formulation, review and revision of PEO shall be referenced in the appropriate section of the SSR and be made available during the review visits.

The Program Educational Objectives (PEOs) were developed by the Committees composed of the Vice President for Academic Affairs, College administrators composed of all program chairs, and the college Dean. The initial educational objectives were

subjected to review by the Government–Industry Advisory Board of the Department. Recommendations reflecting the needs of the primary constituencies were received from the GIAB. The College council, reflecting the recommendations of the GIAB and the interest of the faculty and students, developed a final version of the PEOs.

The Civil Engineering Department follows a systematic and participatory process for the formulation, periodic review, and revision of its Program Educational Objectives (PEOs) to ensure continuous alignment with the Vision and Mission of the university, stakeholder expectations, and the evolving demands of the engineering profession.

In 2018, the Government-Industry Advisory Board of the Civil Engineering program signed a resolution to approve the three (3) PEOs. The University President approved the PEOs in 2018. In 2018, the initial comprehensive curriculum review was conducted during a stakeholder consultation. This event marked a pivotal moment where the department strategically aligned its educational objectives with the Vision and Mission of the university. Key stakeholders, including faculty, students, alumni, industry representatives, and government partners, provided insights that shaped the foundational structure of the department's PEOs, ensuring relevance and responsiveness to societal and industry needs.

By 2022, another round of curriculum review was carried out through a formal stakeholder consultation process. This session focused on reinforcing the alignment of the PEOs and Student Outcomes (SOs) with the university's Vision and Mission. It also incorporated feedback from program performance indicators, tracer studies, and accreditation recommendations. This phase led to a more refined and outcome-based approach to curriculum development and objective setting.

In 2024, the Graduate-Industry Advisory Board (GIAB), composed of academic leaders, industry experts, and civil engineering alumni, formally reviewed and approved the revised PEOs and SOs. GIAB's endorsement validated that the educational objectives effectively reflected industry expectations and supported graduates in achieving career and professional milestones in alignment with institutional values.

Looking ahead to 2025, GIAB convened once again to revisit the PEOs and SOs. This upcoming meeting signifies the department's commitment to continual improvement and quality assurance. It also ensures that the Civil Engineering program remains forward-looking, responsive to technological advancements, and adaptive to changes in national and global engineering practice.

Through this structured timeline of review and stakeholder engagement, the Civil Engineering Department demonstrates its dedication to maintaining a dynamic and

relevant academic program that nurtures competent, ethical, and globally competitive engineers.

The review and possible revisions of the PEOs are initiated by the Industry Advisory Board during its annual meeting April 11, 2024. The following factors will guide the review and possible revision of the PEOs ([Attachment C1-04 Minutes of Meeting dated April 11, 2024](#)).

1. External factors such as changes in policies of regulatory or statutory agencies, changes in policies of local and international accrediting and certifying bodies, as well as input from alumni, employers, and professional associations, among others.
2. Internal factors such as inputs from students and the faculty, changes in the Polytechnic University of the Philippines, Vision, Mission, Core Values and graduate attributes, quality objectives, and quality policy, among others.

The agenda of the annual advisory board meeting shall include the following:

1. Review of the minutes of the previous meeting.
2. Introduction of the present composition of the advisory board.
3. Discussion of the process for the review and revision of the PEOs, as needed.
4. Approval of the process for the review and revision of the PEOs by the advisory board, if applicable.
5. Review of factors that may impact the possible revision of the PEOs, if any; and
6. Formulation of the proposed course of action for the PEOs, creation of new PEOs, revision of the existing PEOs, or retention of existing PEOs.

E.1 Process for Formulation, Review, and Revision of the Program Educational Objectives

To ensure that the needs of the program constituencies are met, the PEOs were formulated in consultation with members of professional organizations, employers, alumni, faculty members, and students through a regular advisory board meeting. Regular meetings were conducted with the Board of Advisers. Feedback on the latest trends, industry desired competencies, skills, and knowledge, among others, were discussed during the meetings and considered in the PEO statement. This also ensures that the PEOs are relevant to the changing needs of the program constituencies.

E.2 Process of Developing the Program Educational Objectives

The PEO committee of Civil Engineering program was responsible for the crafting of PEO statements.

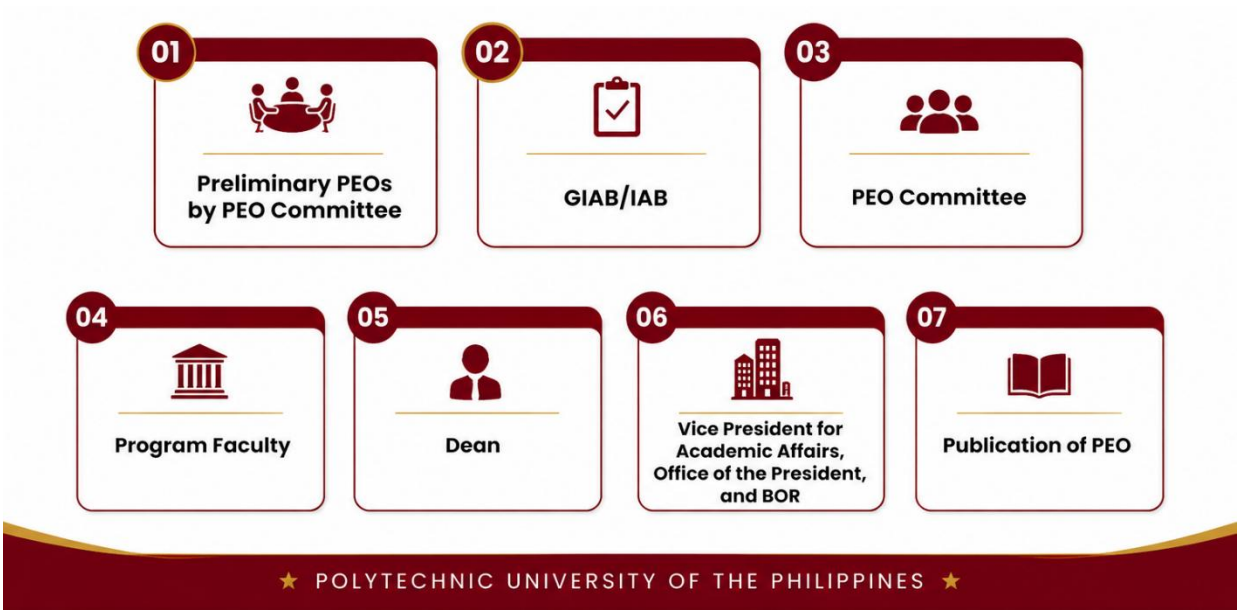

Figure 1-1. Process Flowchart of the Initial Formulation of Program Educational Objectives

The initial PEOs of the Civil Engineering program were drafted by the PEO Committee through consultation with the faculty members of the program and provided to the GIAB/IAB as preliminary documents. After a thorough discussion with Advisory Board members, they suggested PEOs which satisfy their needs. The inputs of the Advisory Board were taken and refined by the PEO Committee. The PEO committee submits the PEO statement to the Program Chair for review. The Program Chair conducts meetings with faculty members for final revision. The Program Chair endorsed the PEO statement for Dean's review. The Dean recommends to the office of the Vice President for Academic Affairs, and the office of the President for final approval. The approved PEOs were published in the college manuals, bulletin boards, and university websites.

The process of reviewing PEOs of the Civil Engineering program will be done every three (3) years. The PEO Committee will use the Government-Industry Advisory Board (GIAB) minutes of the meetings as one of the inputs in reviewing the PEOs. The same process will be followed for the approval of refined and recommended PEOs from the PEO Committee. The review and possible revision of the PEOs will be guided by the following factors:

1. External factors such as changes in policies of regulatory or statutory agencies, changes in policies of local and international accrediting and certifying bodies, as well as inputs from alumni, employers, and professional associations among others.

2. Internal factors such as input from students and the faculty, changes in the PUP vision, mission and core values and core competencies, and quality policy among others.

The agenda of the annual advisory board meeting shall include the following items:

1. Review of the minutes of the previous meeting.
2. Introduction of the present composition of the advisory board.
3. Discussion of the process of the review and revision of the PEO, as needed.
4. Approval of the process for the review and revision of the PEOs by the advisory board, if applicable; and
5. Formulate the proposed course of action for PEOs: the creation of new PEOs, revision of existing PEOs, or retention of existing PEOs.

During the annual meeting, each member of the advisory board will be given the chance to articulate inputs leading to the possible creation of new PEO, revision of the existing PEOs, or retention of the existing PEOs. The critical decision as to the course of action may be dependent on the following decision parameters:

- a. Mandatory compliance with new regulatory and statutory requirements.
- b. Latest trends in technology.
- c. Changes in the industry are needed.
- d. Changes in institutional thrust along instruction, research, and extension; and
- e. Latest trends in professional fields of practice among others.

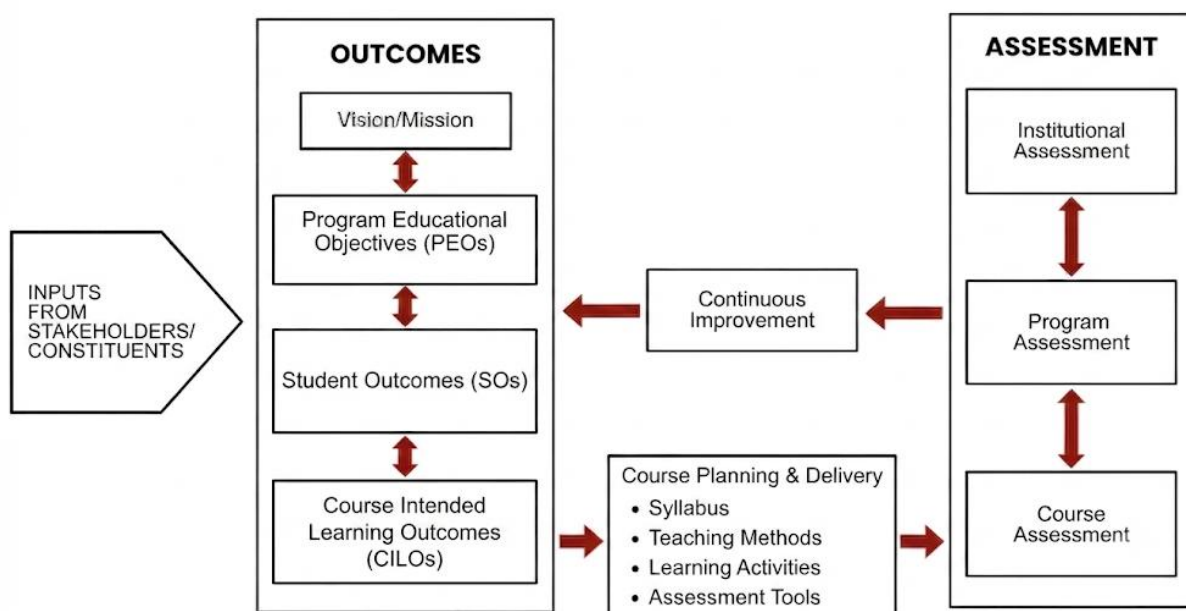

Figure 1-2. OBE Framework

F. Performance Indicator in Each of the PEO

Show the performance indicators for each of the program educational outcome and describe the monitoring, assessment and evaluation process.

Table 1-4. PEO Performance Indicators

PROGRAM EDUCATIONAL OBJECTIVES	PERFORMANCE INDICATOR
Employed and/or practiced in the field of Civil Engineering such as but not limited to Construction Engineering and Management, Geotechnical Engineering, Structural Engineering, Transportation Engineering, and Water Resources Engineering, or other related fields.	1. Graduates demonstrate technical expertise within their chosen field of specialization in civil engineering practice.
	2. Graduates develop management skills to lead within their chosen field of specialization in civil engineering practice.
	3. Graduates adhere to the national and global requirements, policies and standards of the civil engineering practice.
Committed members of professional and other allied organizations engaging in community development or nation-building.	1. Graduates are committed members of professional and other allied organizations.
	2. Graduates are members of organizations adhering to the interests of society.
	3. Graduates participate in the upholding of ethical standards in the civil engineering profession.
Involved in continuous training and development in current trends and advancements in their fields of specialization.	1. Graduates are pursuing studies and academic activities for their career advancement in their chosen field of specialization.
	2. Graduates are involved in training and seminars in addressing community needs, current trends and advancement in their chosen field of specialization.

G. Deployment process of PEO

Describe how the PEO is deployed among the various program stakeholders and constituencies. Provide demonstration of compliance.

Each program stakeholder and constituency are properly represented in the advisory board meetings. Upon approval of the PEOs, they are published on the PUP website, program brochure, Course Syllabus, Bulletin Boards, and Catalog. Moreover, these are discussed with faculty members during faculty meetings and with students during orientation. ([Attachment C1-07 – PowerPoint Presentation of Class Orientation](#))

To check the suitability of the PEO's, a survey was conducted starting 2025 to select alumni and employers of the PUP CE graduates. Since the new PEO was already approved, the target respondents are the graduates of 2022, the first graduates of the 2018 curriculum. Some survey forms were sent with the help of the CE students who are undergoing On-the-Job training in selected companies, alumni, and students. Other forms were sent via email, and others were personally handed by the department chairperson to the respondents.
